

Clinical trial results:

Single-dose, open-label, randomized, 2-way crossover bioequivalence study of 20 mg granules for oral suspension rivaroxaban versus 20 mg tablets rivaroxaban under fed condition in healthy subjects

Summary

EudraCT number	2017-000609-18
Trial protocol	DE
Global end of trial date	27 October 2017

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	27 October 2017
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	27 October 2017
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective of the trial was to establish bioequivalence with respect to area under concentration versus time curve from zero to infinity after single dose administration (AUC), AUC from time zero to the last data point (AUC[0-tlast]) and maximum observed drug concentration (Cmax) of 20 milligrams (mg) granules for oral suspension versus 20 mg tablets rivaroxaban (BAY59-7939, Xarelto) when administered as single oral dose under fed conditions.

Protection of trial subjects:

The conduct of this clinical study met all local legal and regulatory requirements. The study was conducted in accordance with ethical principles that have their origin in the Declaration of Helsinki and the International Council for Harmonization guideline E6: Good Clinical Practice. Before entering the study, the informed consent was read by and explained to all the subjects. Participating subjects signed informed consent form and could withdraw from the study at any time without any disadvantage and without having to provide a reason for this decision. Only investigators qualified by training and experience were selected as appropriate experts to investigate the study drug.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	04 July 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Germany: 30
Worldwide total number of subjects	30
EEA total number of subjects	30

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0

Adults (18-64 years)	30
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Study was conducted at one study center in Germany, between 04 July 2017 (first subject first visit) and 04 September 2017 (last subject last visit).

Pre-assignment

Screening details:

Overall, 68 subjects were enrolled, of these 38 subjects were screen failures: 2 subjects withdrew consent, 6 subjects were qualified but not needed and 30 subjects failed screening. A total of 30 subjects were randomized and received at least one dose of rivaroxaban.

Period 1

Period 1 title	Overall study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Treatment A-B

Arm description:

Subjects received a single oral dose of 20 mg rivaroxaban tablet in the fed state on Day 1 (Treatment A) during treatment period 1; followed by a single oral dose of 20 mg rivaroxaban oral suspension in the fed state on Day 1 (Treatment B) during treatment period 2. A wash-out period of at least 7 days was maintained between the treatments.

Arm type	Experimental
Investigational medicinal product name	Rivaroxaban
Investigational medicinal product code	BAY59-7939
Other name	Xarelto
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received a single oral dose of 20 mg rivaroxaban tablet in the fed state on Day 1 (Treatment A).

Investigational medicinal product name	Rivaroxaban
Investigational medicinal product code	BAY59-7939
Other name	Xarelto
Pharmaceutical forms	Granules for oral suspension
Routes of administration	Oral use

Dosage and administration details:

Subjects received a single oral dose of 20 mg rivaroxaban oral suspension in the fed state on Day 1 (Treatment B).

Arm title	Treatment B-A
------------------	---------------

Arm description:

Subjects received a single oral dose of 20 mg rivaroxaban oral suspension in the fed state on Day 1 (Treatment B) during treatment period 1; followed by a single oral dose of 20 mg rivaroxaban tablet in the fed state on Day 1 (Treatment A) during treatment period 2. A wash-out period of at least 7 days was maintained between the treatments.

Arm type	Experimental

Statistical analyses

Statistical analysis title	Statistical analysis 1
----------------------------	------------------------

Statistical analysis description:

Logarithms of AUC were analyzed using analysis of variance (ANOVA) including sequence, subject (sequence), period, and treatment effects. Based on these analyses point estimates (Least squares [LS] mean) and 90% confidence intervals (CIs) for the treatment ratio: 20 mg granules for oral suspension/tablet were calculated by re- transformation of the logarithmic results given by the ANOVA. Database auto-calculates total number of subjects erroneously, analyzed number of subjects was 28.

Comparison groups	20 mg Rivaroxaban oral suspension (Treatment B) v 20 mg Rivaroxaban tablet (Treatment A)
Number of subjects included in analysis	56
Analysis specification	Pre-specified
Analysis type	other
Parameter estimate	LS mean
Point estimate	0.9843
Confidence interval	
level	90 %
sides	2-sided
lower limit	0.9433
upper limit	1.0271

Primary: Area Under the Concentration Versus Time Curve From Time Zero to the Last Data Point Greater Than (>) Lower Limit Of Quantification (LLOQ) (AUC[0-tlast]) of Rivaroxaban in Plasma After Single Dose Administration

End point title	Area Under the Concentration Versus Time Curve From Time Zero to the Last Data Point Greater Than (>) Lower Limit Of Quantification (LLOQ) (AUC[0-tlast]) of Rivaroxaban in Plasma After Single Dose Administration
