Clinical trial results:
Otitis Media and Nasopharyngeal Microbiome in Children.

The change of nasopharyngeal microbiome and its role as a risk factor of otitis media. Streptococcus salivarius K12 and the change of nasopharyngeal microbiome.

Summary

EudraCT number	2017-000820-83
Trial protocol	FI
Global end of trial date	25 November 2017

Results information

Result version number	v1 (current)
This version publication date	21 August 2024
First version publication date	21 August 2024
Summary attachment (see zip file)	Article file (inf-40-0394.pdf)

Trial information

Trial identification

Sponsor protocol code	NNL-2017

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	31 August 2020
Is this the analysis of the primary completion data?	Yes
Primary completion date	25 November 2017
Global end of trial reached?	Yes
Global end of trial date	25 November 2017
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

We investigate the role of microbiota as a risk factor of acute otitis media in children. We conclude the acceptability and microbial efficiency (change in the microbiome of nasopharyngeal/oral cavity) of two Streptococcus salivarius K12 BLIS products in children.

Protection of trial subjects:

Normal protection under the laws of Finland.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	05 October 2017
Long term follow-up planned	Yes
Long term follow-up rationale	Scientific research
Long term follow-up duration	2 Months
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Finland: 121
Worldwide total number of subjects	121
EEA total number of subjects	121

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	25
Children (2-11 years)	96
Adolescents (12-17 years)	0
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Randomly allocated to a treatment (S. salivarius K12) or control group 2:1. Children ≤3 years old were randomly allocated to receive either S. salivarius K12 soluble powder or no treatment and older children were randomly allocated to receive S. salivarius K12 chewable tablets or no treatment.

Pre-assignment

Screening details:

We sent information letters about the clinical trial to all the parents of children 1–6 years of age who attended 15 daycare centers in the city of Oulu, Finland. We attended parents' meetings in daycare centers. We excluded children with present chronic secretory otitis media or other middle ear effusionat study entry.

Period 1

Period 1 title	Recruitment
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Single blind
Roles blinded	Data analyst[1]

Blinding implementation details:

The study design of this research was a randomized controlled clinical trial that was open to the families but blinded for the microbiologic analyses.

Arms

Are arms mutually exclusive?	Yes
Arm title	Streptococcus salivarius K12

Arm description:

S. salivarius K12 oral soluble powder or tablet for 30 days

Arm type	Experimental
Investigational medicinal product name	Streptococcus salivarius K12
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Oral powder in sachet
Routes of administration	Oral use

Dosage and administration details:

1 sachet per day for 30 days

Investigational medicinal product name	Streptococcus salivarius K12
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Chewable/dispersible tablet
Routes of administration	Oral use

Dosage and administration details:

1 tablet per day in the evening after teeth brushing for 30 days.

Arm title	No treatment

Arm description: -

Arm type	No intervention

No investigational medicinal product assigned in this arm

Notes:

[1] - The roles blinded appear inconsistent with a simple blinded trial.

Justification: This trial was blinded for the microbiological analyses but open for the families.

Number of subjects in period 1	Streptococcus salivarius K12	No treatment
Started	81	40
Completed	81	40

Period 2

Period 2 title	Study period
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Single blind
Roles blinded	Data analyst[2]

Arms

Are arms mutually exclusive?	Yes
Arm title	Streptococcus salivarius K12

Arm description: -

Arm type	Experimental
Investigational medicinal product name	Streptococcus salivarius K12
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Oral powder in sachet
Routes of administration	Oral use

Dosage and administration details:

1 sachet per day for 30 days

Arm title	No treatment

Arm description: -

Arm type	No intervention

No investigational medicinal product assigned in this arm

Notes:

[2] - The roles blinded appear inconsistent with a simple blinded trial.

Justification: This trial was blinded for the microbiological analyses but open for the families.

Number of subjects in period 2	Streptococcus salivarius K12	No treatment
Started	81	40
Completed	81	40

Period 3

Period 3 title	Follow-up period
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Single blind
Roles blinded	Data analyst[3]

Arms

Are arms mutually exclusive?	Yes
Arm title	Streptococcus salivarius K12

Arm description:

S. salivarius treatment, ended

Arm type	Experimental
Investigational medicinal product name	Streptococcus salivarius K12
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Oral powder in sachet
Routes of administration	Oral use

Dosage and administration details:

1 sachet per day for 30 days

Arm title	No treatment

Arm description:

No treatment, follow-up

Arm type	No intervention

No investigational medicinal product assigned in this arm

Notes:

[3] - The roles blinded appear inconsistent with a simple blinded trial.

Justification: This trial was blinded for the microbiological analyses but open for the families.

Number of subjects in period 3	Streptococcus salivarius K12	No treatment
Started	81	40
Completed	81	40

Secondary: Recruitment nasopharyngeal s. salivarius abundance

End point title	Recruitment nasopharyngeal s. salivarius abundance[2]

End point description:

End point type	Secondary

End point timeframe:

Recruitment

Notes:

[2] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.
Justification: The outcome was the change of S. salivarius abundance in those receiving active treatment, so the baseline needs to be reported as well.

End point values	Streptococcus salivarius K12

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
22 November 2017	Some adjustuments in the wording of the EudraCT sheet were made. Viral analysis and FISH analysis were omitted in the amendment. Webropol questionnaires 6 and 12 months post recruitment were removed from the study protocol during the study. The primary and secondary outcomes were met during the 2 month study period.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
