EU Clinical Trials Register

Clinical trial results:
A Phase 2 Placebo-Controlled, Double-Blind, Enriched Enrollment Randomized Withdrawal Study to Evaluate the Efficacy and Safety of BIIB074 (Vixotrigine) in Treating Pain Experienced by Subjects With Confirmed Small Fibre Neuropathy That Is Idiopathic or Associated With Diabetes Mellitus

Summary

EudraCT number	2017-000991-27

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	12 April 2021
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	12 April 2021
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

The primary objective of this study was to evaluate the efficacy of BIIB074 in treating pain experienced by subjects with confirmed small fibre neuropathy (SFN) that was idiopathic or associated with diabetes mellitus. The secondary objectives were: (i) to evaluate the effect on worst pain, neuropathic pain quality, sleep interference due to pain, patient global impression, use of rescue medication, and SFN symptoms in subjects treated with BIIB074; (ii) to investigate the safety and tolerability of BIIB074 in subjects with SFN; and (iii) to characterise the pharmacokinetics (PK) of BIIB074 in subjects with SFN.

Protection of trial subjects:

Written informed consent was obtained from each subject or subject's legally authorised representative (e.g., legal guardian), as applicable, prior to evaluations performed for eligibility. Subjects or the subject's legally authorised representative were given adequate time to review the information in the informed consent/assent and were allowed to ask, and have answered, questions concerning all portions of the conduct of the study.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	31 May 2018
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Poland: 46
Country: Number of subjects enrolled	France: 41
Country: Number of subjects enrolled	Czechia: 29
Country: Number of subjects enrolled	United Kingdom: 26
Country: Number of subjects enrolled	Netherlands: 24
Country: Number of subjects enrolled	Bulgaria: 23
Country: Number of subjects enrolled	Germany: 22
Country: Number of subjects enrolled	Hungary: 17
Country: Number of subjects enrolled	Italy: 17
Country: Number of subjects enrolled	Spain: 9
Country: Number of subjects enrolled	Canada: 5
Country: Number of subjects enrolled	Switzerland: 3
Country: Number of subjects enrolled	Denmark: 3
Worldwide total number of subjects	265
EEA total number of subjects	231

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	184
From 65 to 84 years	81
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Subjects were enrolled at 68 investigative sites in Poland, France, Czech Republic, United Kingdom, Netherlands, Bulgaria, Germany, Hungary, Italy, Spain, Canada, Switzerland, and Denmark from 31 May 2018 to 08 March 2021.

Pre-assignment

Screening details:

The study consisted of screening period of up to 21 days, taper period of up to 14 days, 5-day washout period, and 4-week open-label (OL) run-in period. Number of subjects who completed OL run-in period is number of subjects who completed OL run-in period and were randomised to DB period.

Period 1

Period 1 title	Open-Label (OL) Run-in Period
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	OL Period: BIIB074 350 milligrams (mg)

Arm description:

Subjects received BIIB074 350 mg, tablets, orally, twice daily (BID), for 4 weeks of the open-label run-in period.

Arm type	Experimental
Investigational medicinal product name	BIIB074
Investigational medicinal product code	
Other name	Vixotrigine
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

BIIB074 350 mg administered orally, BID for 4 weeks of the open-label run-in period.

Number of subjects in period 1	OL Period: BIIB074 350 milligrams (mg)
Started	265
Completed	123
Not completed	142
Consent withdrawn by subject	7
Adverse event	14
Lost to follow-up	1
Reason not specified	18
Lack of efficacy	11
Failed to meet randomisation criteria	91

Period 2

Period 2 title	Double-Blind (DB) Period
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	DB Period: Placebo

Arm description:

Subjects received BIIB074-matching placebo, tablets, orally, BID, for 12 weeks of the double-blind period.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

BIIB074-matching placebo administered orally, BID, for 12 weeks of the double-blind period.

Arm title	DB Period: BIIB074 200 mg

Arm description:

Subjects received BIIB074, 200 mg, tablets, orally, BID, for 12 weeks of the double-blind period.

Arm type	Experimental
Investigational medicinal product name	BIIB074
Investigational medicinal product code	
Other name	Vixotrigine
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

BIIB074 200 mg administered orally, BID for 12 weeks of the double-blind period.

Arm title	DB Period: BIIB074 350 mg

Arm description:

Subjects received BIIB074, 350 mg, tablets, orally, BID, for 12 weeks of the double-blind period.

Arm type	Experimental
Investigational medicinal product name	BIIB074
Investigational medicinal product code	
Other name	Vixotrigine
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

BIIB074 350 mg administered orally, BID for 12 weeks of the double-blind period.

Number of subjects in period 2	DB Period: Placebo	DB Period: BIIB074 200 mg	DB Period: BIIB074 350 mg

Primary: Change From Baseline to Double-Blind Week 12 in Mean Average Daily Pain (ADP) Score on the 11-point Numerical Rating Scale (NRS)

End point title	Change From Baseline to Double-Blind Week 12 in Mean Average Daily Pain (ADP) Score on the 11-point Numerical Rating Scale (NRS)

End point description:

The ADP score was based on an 11-point NRS, where, 0 = no pain and 10 = worst pain imaginable. Lower scores indicated less pain. Baseline was defined as the 5 days prior to the first dose of study treatment in the open-label run-in period (Day 1). The values reported are mean values. Full analysis set (FAS) included all randomised subjects who received at least one dose of double-blind study treatment and have at least 1 post-randomisation efficacy assessment. Number of subjects analysed is the number of subjects evaluable in this end point.

End point type	Primary

Secondary: Percentage of Patient Global Impression of Change (PGIC) Responders at Double-Blind Week 12

End point title	Percentage of Patient Global Impression of Change (PGIC) Responders at Double-Blind Week 12

End point description:

A PGIC responder is defined as someone who has answered 'very much improved' or 'much improved' on the PGIC questionnaire. PGIC is a 7-point scale that assesses a subject's perceived change in overall status. Subjects rated their change as 1=very much improved, 2=much improved, 3=minimally improved, 4=no change, 5=minimally worse, 6=much worse, or 7=very much worse relative to the start of the study (since taking study drug). FAS included all randomised subjects who received at least one dose of double-blind study treatment and have at least 1 post-randomisation efficacy assessment.

Secondary: Change from Baseline to Double-Blind Week 12 in Brief Pain Inventory-Short Form (BPI-SF) Interference Score

End point title	Change from Baseline to Double-Blind Week 12 in Brief Pain Inventory-Short Form (BPI-SF) Interference Score

End point description:

The BPI-SF is a self-administered questionnaire for subjects to rate the severity of their pain and the degree to which their pain interferes with common dimensions of feeling and function. Item 9 of the BPI-SF measures how much pain has interfered with 7 daily activities, including general activity, walking, work, mood, enjoyment of life, relations with others, and sleep. Each activity is rated on a scale of 0 (does not interfere) to 10 (completely interferes). The BPI-SF interference score is calculated as the mean of the 7 interference item scores. Baseline was defined as the last value prior to the first dose of study treatment in the open-label run-in period. FAS included all randomised subjects who received at least one dose of double-blind study treatment and have at least 1 post-randomisation efficacy assessment. Number of subjects analysed is the number of subjects evaluable in this end point.

Secondary: Percentage of Subjects with Adverse Events (AEs) and Serious Adverse Events (SAEs) During Double-Blind Period

End point title	Percentage of Subjects with Adverse Events (AEs) and Serious Adverse Events (SAEs) During Double-Blind Period

End point description:

An AE was any untoward medical occurrence in a subject or clinical investigation subject administered a pharmaceutical product and that does not necessarily have a causal relationship with this treatment. An AE could therefore be any unfavourable and unintended sign, symptom, or disease temporally associated with the use of a medicinal (investigational) product, whether or not related to the medicinal (investigational) product. An SAE was any untoward medical occurrence that at any dose resulted in

death; in the view of the investigator, placed the subject at immediate risk of death (a life-threatening event); required inpatient hospitalisation or prolongation of existing hospitalisation; resulted in persistent or significant disability/incapacity; resulted in a congenital anomaly/birth defect. Double-blind (DB) safety population included all randomised subjects who received at least 1 dose of DB treatment.

End point type	Secondary

End point timeframe:

From randomisation of subjects who received at least 1 dose of double-blind treatment to end of study (up to approximately 140 weeks)

Non-serious adverse events	OL Period: BIIB074 350 mg		
Total subjects affected by non-serious adverse events			
subjects affected / exposed	57 / 265 (21.51%)		
Injury, poisoning and procedural complications			
Fall			
subjects affected / exposed	4 / 265 (1.51%)		
occurrences (all)	4		
Nervous system disorders			
Dizziness			
subjects affected / exposed	25 / 265 (9.43%)		
occurrences (all)	28		
Headache			
subjects affected / exposed	25 / 265 (9.43%)		
occurrences (all)	32		
Gastrointestinal disorders			

Diarrhoea			
subjects affected / exposed	6 / 265 (2.26%)		
occurrences (all)	8		
Nausea			
subjects affected / exposed	11 / 265 (4.15%)		
occurrences (all)	12		
Musculoskeletal and connective tissue disorders			
Muscle spasms			
subjects affected / exposed	1 / 265 (0.38%)		
occurrences (all)	1		
Infections and infestations			
Nasopharyngitis			
subjects affected / exposed	6 / 265 (2.26%)		
occurrences (all)	6		
Urinary tract infection			
subjects affected / exposed	3 / 265 (1.13%)		
occurrences (all)	3		

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
30 May 2017	To clarify that pregnancy of a female partner should not impact the study status of a male subject during his participation in the study.
06 September 2017	To change the study design to include a separate washout period prior to the open-label run-in period during which no pain medications are allowed. The taper and washout periods were added to the screening period for a total duration of up to 6 weeks.
06 June 2018	To update the diagnostic criteria for small fiber neuropathy (SFN) in the inclusion criteria.
23 July 2019	To update the details of the interim analysis.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Sponsor decision to close study early; not due to safety concerns.

Notes:
