

Clinical trial results:

A Phase 3, Open-label Study to Evaluate the Pharmacokinetics, Safety, and Tolerability of VX-661 in Combination With Ivacaftor in Subjects 6 Through 11 Years of Age With Cystic Fibrosis, Homozygous or Heterozygous for the F508del-CFTR Mutation

Summary

EudraCT number	2017-001164-38
Trial protocol	Outside EU/EEA
Global end of trial date	11 September 2018

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-001640-PIP01-14
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	20 September 2018
Is this the analysis of the primary completion data?	Yes
Primary completion date	11 September 2018
Global end of trial reached?	Yes
Global end of trial date	11 September 2018
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate the Pharmacokinetics (PK) of Tezacaftor (TEZ) and Ivacaftor (IVA) after administration of multiple doses of TEZ in combination with IVA in Part A and to evaluate the safety and tolerability of TEZ in combination with IVA through Week 24 in Part B.

Protection of trial subjects:

The study was conducted in accordance with the ethical principles stated in the Declaration of Helsinki and the International Council on Harmonization (ICH) Guideline for Good Clinical Practice (GCP).

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	11 November 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 77
Country: Number of subjects enrolled	Canada: 6
Worldwide total number of subjects	83
EEA total number of subjects	0

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	83
Adolescents (12-17 years)	0
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

This study consisted of 2-parts (Part A and B). The planned primary analysis was designed to assess overall treatment arm "TEZ/IVA", irrespective of weight-based dosing regimen. The aim of weight based dosing is to achieve similar exposures in children of different weights, thus analysis is presented for the single treatment arm "TEZ/IVA".

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Part A

Arm description:

Subjects weighing <25 kg received TEZ 50 mg/IVA 75 mg for 14 days.

Subjects weighing ≥25 kg received TEZ 50 mg/IVA 150 mg for 14 days.

Arm type	Experimental
Investigational medicinal product name	TEZ
Investigational medicinal product code	VX-661
Other name	Tezacaftor
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received TEZ 50 mg once daily.

Investigational medicinal product name	IVA
Investigational medicinal product code	VX-770
Other name	Ivacaftor
Pharmaceutical forms	Capsule, Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received IVA 75 mg or 150 mg every 12 hours.

Arm title	Part B
------------------	--------

Arm description:

Subjects weighing <40 kg received TEZ 50 mg/IVA 75 mg as fixed dose combination in the morning and IVA 75 mg in the evening for 24 weeks.

Subjects weighing ≥40 kg received TEZ 100 mg/IVA 150 mg as fixed dose combination in the morning and IVA 150 mg in the evening for 24 weeks.

Arm type	Experimental
Investigational medicinal product name	TEZ/IVA
Investigational medicinal product code	VX-661/VX-770
Other name	Tezacaftor/Ivacaftor
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received TEZ/IVA as fixed dose combination orally once daily in the morning.

Investigational medicinal product name	IVA
Investigational medicinal product code	VX-770
Other name	Ivacaftor
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received IVA as mono tablet once daily in the evening.

Number of subjects in period 1	Part A	Part B
Started	13	70
Completed	13	67
Not completed	0	3
Adverse Event	-	1
Withdrawal of consent (not due to AE)	-	2

Unknown or Not Reported	0	0	0

End points

End points reporting groups

Reporting group title	Part A
Reporting group description:	
Subjects weighing <25 kg received TEZ 50 mg/IVA 75 mg for 14 days.	
Subjects weighing ≥25 kg received TEZ 50 mg/IVA 150 mg for 14 days.	
Reporting group title	Part B
Reporting group description:	
Subjects weighing <40 kg received TEZ 50 mg/IVA 75 mg as fixed dose combination in the morning and IVA 75 mg in the evening for 24 weeks.	
Subjects weighing ≥40 kg received TEZ 100 mg/IVA 150 mg as fixed dose combination in the morning and IVA 150 mg in the evening for 24 weeks.	

Primary: Part A: Maximum Observed Concentration (C_{max}) of TEZ and IVA

End point title	Part A: Maximum Observed Concentration (C _{max}) of TEZ and IVA ^{[1][2]}
End point description:	
Pharmacokinetic (PK) set included subjects who received at least 1 dose of study drug and for whom the primary PK data were considered to be sufficient and interpretable. Here "n" signifies those subjects who were evaluable for this endpoint at specified time points and "99999" represents "Not Applicable" as data for geometric coefficient of variation could not be calculated for the category with n=1 subject.	
End point type	Primary
End point timeframe:	
Day 1 and Day 14	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive data was planned to be reported for this primary PK endpoint.

[2] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: This endpoint is reporting data only for Part A.

End point values	Part A			
Subject group type	Reporting group			
Number of subjects analysed	13			
Units: nanogram per milliliter (ng/mL)				
geometric mean (geometric coefficient of variation)				
Day 1: TEZ (<25 Kg) (n= 2)	6630 (± 10.3)			
Day 1: TEZ (≥25 Kg) (n= 11)	4310 (± 42.6)			
Day 14: TEZ (<25 Kg) (n= 2)	6300 (± 10.3)			
Day 14: TEZ (≥25 Kg) (n= 10)	5340 (± 49.0)			
Day 1: IVA (<25 Kg) (n= 1)	656 (± 99999)			
Day 1: IVA (≥25 Kg) (n= 9)	1010 (± 64.3)			
Day 14: IVA (<25 Kg) (n= 2)	578 (± 60.4)			
Day 14: IVA (≥25 Kg) (n= 10)	1490 (± 105)

End point title	Part B: Absolute Change in Weight-for-age Z-Score ^[15]
-----------------	---

End point description:

z-score is a statistical measure to describe whether a mean was above or below the standard. Weight, adjusted for age and sex, was analyzed as weight-for-age z-score. A z-score of 0 is equal to the mean and is considered normal. Lower numbers indicate values lower than the mean and higher numbers indicate values higher than the mean. Higher values are indicative of higher weight. FAS was used. The aim of weight based dosing is to achieve similar exposures in children of different weights, thus the planned analysis is presented for the single treatment arm irrespective of weight-based dosing regimen.

End point type	Secondary
----------------	-----------

End point timeframe:

From Baseline at Week 24

Notes:

[15] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: This endpoint is reporting data only for Part B.

End point values	Part B			
Subject group type	Reporting group			
Number of subjects analysed	70			
Units: z-score				
least squares mean (confidence interval 95%)	0.00 (-0.05 to 0.05)			

Statistical analyses

No statistical analyses for this end point

Secondary: Part B: Absolute Change in Height

End point title	Part B: Absolute Change in Height ^[16]
-----------------	---

End point description:

FAS was used. The aim of weight based dosing is to achieve similar exposures in children of different weights, thus the planned analysis is presented for the single treatment arm irrespective of weight-based dosing regimen.

End point type	Secondary

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
11 April 2017	- Revised target enrollment, revised inclusion criteria
19 July 2017	- Defined dose for Part B

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
