

## Clinical trial results:

### A Phase 2 Randomized, Double-Blind, Placebo-Controlled Study to Evaluate Efficacy and Safety of BMS-986165 in Subjects With Systemic Lupus Erythematosus

#### Summary

EudraCT number	2017-001203-79
Trial protocol	HU PL DE ES RO
Global end of trial date	28 October 2021

#### Results information

Result version number	v1 (current)
This version publication date	15 December 2022
First version publication date	15 December 2022

#### Trial information

##### Trial identification

Sponsor protocol code	IM011-021
-----------------------	-----------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Bristol-Myers Squibb
Sponsor organisation address	Chaussée de la Hulpe 185, Brussels, Belgium, 1170
Public contact	EU Study Start-Up Unit, Bristol-Myers Squibb International Corporation, Clinical.Trials@bms.com
Scientific contact	Bristol-Myers Squibb Study Director, Bristol-Myers Squibb, Clinical.Trials@bms.com

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	14 January 2022
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	28 October 2021
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To evaluate the efficacy and safety of BMS-986165 in subjects with Systemic Lupus Erythematosus

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and in compliance with all International Conference on Harmonization Good Clinical Practice Guidelines. All the local regulatory requirements pertinent to safety of trial participants were followed.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	21 September 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Japan: 19
Country: Number of subjects enrolled	Argentina: 19
Country: Number of subjects enrolled	Brazil: 32
Country: Number of subjects enrolled	Colombia: 24
Country: Number of subjects enrolled	Mexico: 33
Country: Number of subjects enrolled	Canada: 2
Country: Number of subjects enrolled	United States: 85
Country: Number of subjects enrolled	Australia: 1
Country: Number of subjects enrolled	Germany: 1
Country: Number of subjects enrolled	Hungary: 11
Country: Number of subjects enrolled	Israel: 1
Country: Number of subjects enrolled	Korea, Republic of: 3
Country: Number of subjects enrolled	Poland: 51
Country: Number of subjects enrolled	Romania: 14
Country: Number of subjects enrolled	Russian Federation: 44
Country: Number of subjects enrolled	Spain: 7
Country: Number of subjects enrolled	Taiwan: 16
Worldwide total number of subjects	363
EEA total number of subjects	84

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	354
From 65 to 84 years	9
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

363 Participants randomized and treated

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer

### Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

<b>Arm title</b>	Placebo
------------------	---------

Arm description:

Placebo PO BID

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Placebo Matching BMS-986165

<b>Arm title</b>	BMS-986165 3 mg
------------------	-----------------

Arm description:

BMS-986165 3 mg PO BID

Arm type	Experimental
Investigational medicinal product name	BMS-986165
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

3 mg PO BID

<b>Arm title</b>	BMS-986165 6 mg
------------------	-----------------

Arm description:

BMS-986165 6 mg PO BID

Arm type	Experimental
Investigational medicinal product name	BMS-986165
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

6 mg PO BID

<b>Arm title</b>	BMS-986165 12 mg
Arm description: BMS-986165 12 mg PO QD	
Arm type	Experimental
Investigational medicinal product name	BMS-986165
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Intratumoral use, Oral use
Dosage and administration details: 12 mg PO QD	

<b>Number of subjects in period 1</b>	Placebo	BMS-986165 3 mg	BMS-986165 6 mg
Started	90	91	93
Completed	66	71	76
Not completed	24	20	17
Consent withdrawn by subject	8	4	4
Adverse event, non-fatal	3	8	6
Other Reasons	2	5	5
Pregnancy	2	1	-
Lost to follow-up	2	-	-
Lack of efficacy	7	2	2

<b>Number of subjects in period 1</b>	BMS-986165 12 mg
Started	89
Completed	62
Not completed	27
Consent withdrawn by subject	4
Adverse event, non-fatal	12
Other Reasons	4
Pregnancy	1
Lost to follow-up	2
Lack of efficacy	4

## Baseline characteristics

### Reporting groups

Reporting group title	Placebo
Reporting group description: Placebo PO BID

**Secondary: Number of Participants Who Achieve British Isles Lupus Assessment Group-Based Composite Lupus Assessment (BICLA) Response**

End point title	Number of Participants Who Achieve British Isles Lupus Assessment Group-Based Composite Lupus Assessment (BICLA) Response
-----------------	---

End point description:

BICLA responder is defined as a patient whose disease course fulfills all of the following:

- (1) Improvement in all organ systems with activity graded as BILAG-2004 A (severe disease activity) or B (moderate disease activity) at baseline
- (2) No new organ system with activity graded as BILAG A; no more than 1 new organ system with activity graded as BILAG B
- (3) No increase from baseline in Systemic Lupus Erythematosus SLEDAI-2K score ( $\leq 0$  points for change from baseline score)
- (4) No increase  $\geq 10\%$  in the Physician's Global Assessment of Disease Activity on a 3-point visual analog scale from no disease activity to severe disease activity
- (5) No discontinuation of investigational product or use of restricted medications beyond the protocol allowed threshold before assessment

End point type	Secondary

### Secondary: Number of Participants With a $\geq 50\%$ Reduction in CLASI Activity Score in the Sub-group With Baseline CLASI Activity Score $\geq 10$

End point title	Number of Participants With a $\geq 50\%$ Reduction in CLASI Activity Score in the Sub-group With Baseline CLASI Activity Score $\geq 10$
End point description: Number of participants with a Cutaneous Lupus Erythematosus Disease Area and Severity Index (CLASI) activity score $\geq 10$ at baseline who achieve a CLASI response, defined as a decrease of $\geq 50\%$ from baseline CLASI activity score (ranges from 0-70, where a higher score is associated with high disease activity). CLASI assesses by body surface area; points are given for presence of erythema, scale, hypertrophy, mucous membrane lesions, recent hair loss, and physician-observed alopecia	
End point type	Secondary

## Secondary: Change from Baseline in the 40-Joint Count

End point title	Change from Baseline in the 40-Joint Count
End point description:	
Change from baseline in the following 40-joint count: phalangeal joints of the hand, second through fifth metacarpophalangeal joints of the hand, and individual metatarsophalangeal joints of the feet, Bilateral first metacarpophalangeal joints and shoulders. Each of 40 joints count is evaluated based upon the presence or absence of: (1) Tender joint count (0 to 40) (2) Swollen joint count (0 to 40) (3) Tender and swollen joint count (0 to 40) A larger joint count indicates more severe disease.	
End point type	Secondary

### Secondary: Number of Participants with Laboratory Abnormalities in Specific Liver Tests

End point title	Number of Participants with Laboratory Abnormalities in Specific Liver Tests
-----------------	--

End point description:

Number of participants with laboratory abnormalities in specific liver tests based on US conventional units. The potential drug-induced liver injury is defined by the presence of all of the following:

(1) Alanine Aminotransferase (ALT) or Aspartate Aminotransferase (AST) elevation > 3× Upper Limit of Normal (ULN)

(2) Total bilirubin > 2× ULN, without initial findings of cholestasis (elevated serum alkaline phosphatase)

(3) No other immediately apparent possible causes of AST or AST elevation and hyperbilirubinemia, including, but not limited to, viral hepatitis, preexisting chronic or acute liver disease, or the administration of other drug(s) known to be hepatotoxic

### Secondary: Number of Participants With Global Systemic Lupus Erythematosus (SLE) Clinical Response Based on Interferon-Regulated Gene (IRG) Status

End point title	Number of Participants With Global Systemic Lupus Erythematosus (SLE) Clinical Response Based on Interferon-Regulated Gene (IRG) Status
End point description: Global systemic lupus erythematosus (SLE) clinical response in participants based on interferon-regulated gene (IRG) status (high versus low IRG signature). IRG-high vs. IRG-low was determined using a 5-interferon (IFN) gene set during the sample collected at screening period. SRI(4) responder is defined as a patient whose disease course fulfills all of the following: (1) A 4-point or greater reduction from baseline in SLEDAI-2K score (2) No new British Isles Lupus Assessment Group (BILAG) A (severe disease activity) or not more than 1 new BILAG B (moderate disease activity) organ domain grade (3) No worsening from baseline in the Physician's Global Assessment of Disease Activity Scale by more	

than 0.3 points on a 3-point visual analog scale from no disease activity to severe disease activity

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Non-serious Adverse Events (NSAEs) and Serious Adverse Events (SAEs) are collected from first dose to 30 days post last dose (Up to 52 weeks). Subjects were assessed for Deaths (all causes) from date of randomization to study completion (Up to 49 months)

Assessment type	Systematic

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
24 January 2018	Updated endpoints, treatment frequency, and inclusion/exclusion criteria
28 January 2019	Updated endpoints and inclusion/exclusion criteria
11 June 2019	Updated endpoints and clarified inclusion criteria
15 April 2020	Updated contact information and endpoints

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
