Bridgewater, NJ 08807*

Dear EudraCT:

This is the update and the reason for delayed result posting for **Study GL-GLAT1-3001**:

The study result analysis and the study report have been delayed because of both technical challenges with data collection which needed verification at the study sites, and Covid-19 over the past year. The Sponsor and the CRO have extended the time for collecting and verifying the data at the site level. The completion of the data analysis and the study report are expected to the end of 2021.

Thank you,

*Jia Lu (Luke)*
