

## Clinical trial results:

### Safety, Tolerability and Efficacy of anti-IL-6 Antibody Clazakizumab in Late Antibody-Mediated Rejection after Kidney Transplantation - A Pilot Trial

#### Summary

EudraCT number	2017-001604-30
Trial protocol	AT DE
Global end of trial date	09 April 2020

#### Results information

Result version number	v1 (current)
This version publication date	07 May 2022
First version publication date	07 May 2022

#### Trial information

##### Trial identification

Sponsor protocol code	1001
-----------------------	------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT03444103
WHO universal trial number (UTN)	-

Notes:

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	09 April 2019
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	09 April 2020
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To investigate safety and tolerability of Interleukin-6 blockade by clazakizumab in kidney transplant recipients on baseline immunosuppression.

Protection of trial subjects:

The study was approved by the institutional review board of the Medical University of Vienna (EK1428/2017), the Berlin State Ethics Committee (17/0485- EK 15), and the regulatory authorities in Austria (Federal Office for Safety in Health Care, Austrian Agency for Health and Food Safety) and Germany (Federal Institute for Vaccines and Biomedicines, Paul-Ehrlich Institute). All patients provided written informed consent before study inclusion, and the study was conducted in accordance with International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use Good Clinical Practice requirements, Good Laboratory Practice, the principles of the Declaration of Helsinki 2008, and the Declaration of Istanbul. Adverse events were closely monitored throughout the study and classified using the Medical Dictionary for Regulatory Activities Version 23.0. The study was monitored by an independent data and safety monitoring board (DSMB), and included two interim analyses, the first after 10 and the second after 20 subjects had completed part A of the study. The DSMB was instructed to consider stopping the trial if the pattern of related serious adverse events or safety laboratory results strongly supported a major safety signal.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	20 November 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Austria: 16
Country: Number of subjects enrolled	Germany: 4
Worldwide total number of subjects	20
EEA total number of subjects	20

Notes:

### Subjects enrolled per age group

In utero	0
----------	---

Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	20
From 65 to 84 years	0
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

The recruitment period was January 2018 to April 2019.

### Pre-assignment

Screening details:

22 Donor-specific antibody-positive kidney transplant recipients were assessed for eligibility.

2 Were not eligible.

### Period 1

Period 1 title	Part A of the trial
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Carer

Blinding implementation details:

Study participants, care providers, and those assessing outcomes were unaware of the randomization sequence. The allocation sequence was generated, and medication or placebo was prepared by independent nonblinded study pharmacists. Study physicians and nurses were provided with blinded subcutaneous medication. The participating investigators, staff with medical interaction, and the study participants were blinded to group allocation until the last patient had completed part A.

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Clazakizumab Group

Arm description:

Clazakizumab is a humanized monoclonal IgG1 antibody with high affinity for IL-6 and a long t<sub>1/2</sub> of approximately 30 days. This antibody has been systematically evaluated in rheumatoid and psoriatic arthritis.

Arm type	Experimental
Investigational medicinal product name	Clazakizumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Clazakizumab (25 mg in 1 ml single-dose vials) were administered via subcutaneous injection in 4-weekly intervals. After amendment dosage reduced to 12.6mg per injection.

<b>Arm title</b>	Placebo
------------------	---------

Arm description:

placebo (0.9% saline)

Arm type	Placebo
Investigational medicinal product name	Isotonische Kochsalzlösung Fresenius Infusionslösung
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

placebo (0.9% saline) were administered via subcutaneous injection in 4-weekly intervals

Number of subjects in period 1	Clazakizumab Group	Placebo
Started	10	10
Completed	9	10
Not completed	1	0
Adverse event, non-fatal	1	-

## Period 2

Period 2 title	Part B of the trial
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded

## Arms

Arm title	clazakizumab (all) Group
-----------	--------------------------

Arm description:

a 40-week open-label extension where all participants received clazakizumab (part B). The rationale behind this design was to offer all participants the option of a potentially effective treatment.

Arm type	Experimental
Investigational medicinal product name	Clazakizumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Clazakizumab (12.6 mg in 1 ml single-dose vials) were administered via subcutaneous injection in 4-weekly intervals.

Number of subjects in period 2	clazakizumab (all) Group
Started	19
Completed	18
Not completed	1
Adverse event, non-fatal	1

## Baseline characteristics

### Reporting groups

Reporting group title	Clazakizumab Group
Reporting group description: Clazakizumab is a humanized monoclonal IgG1 antibody with high affinity for IL-6 and a long t1/2 of approximately 30 days. This antibody has been systematically evaluated in rheumatoid and psoriatic arthritis.	
Reporting group title	Placebo
Reporting group description: placebo (0.9% saline)	

Reporting group values	Clazakizumab Group	Placebo	Total
Number of subjects	10	10	20
Age categorical Units: Subjects			
In utero	0	0	0
Preterm newborn infants (gestational age < 37 wks)	0	0	0
Newborns (0-27 days)	0	0	0
Infants and toddlers (28 days-23 months)	0	0	0
Children (2-11 years)	0	0	0
Adolescents (12-17 years)	0	0	0
Adults (18-64 years)	9	10	19
From 65-84 years	1	0	1
85 years and over	0	0	0
Age continuous Units: years			
median	47.2	39.6	
inter-quartile range (Q1-Q3)	38.7 to 62.1	30.2 to 59.6	-
Gender categorical Units: Subjects			
Female	3	7	10
Male	7	3	10
DSA characterisitics Units: Subjects			
HLA class I DSA only,	1	1	2
HLA class II DSA only	7	7	14
HLA class I and II DSA	2	2	4
DSA characteristics Units: Subjects			
Anti-DQ DSA	7	8	15
no anti-DQ DSA	3	2	5
Variables recorded at trial inclusion: duration until inclusion			
Years to inclusion in the trial Units: Years			
median	9.7	11.4	
inter-quartile range (Q1-Q3)	4.1 to 16.7	5.9 to 16.1	-

Variables recorded at trial inclusion eGFR Units: ml/min median inter-quartile range (Q1-Q3)	40.5 33.3 to 49.8	39.2 32.9 to 51.7	-
Variables recorded at trial inclusion: Protein/creatinine ratio Units: mg/g median inter-quartile range (Q1-Q3)	727 197 to 1311	1387 532 to 3575	-
DSA characteristics: MFI of the peak DSA Units: Intensity median inter-quartile range (Q1-Q3)	10789 3092 to 15437	14207 1252 to 19144	-
DSA characteristics: MFI sum of detected Units: Intensity median inter-quartile range (Q1-Q3)	10789 4244 to 18102	16126 1252 to 19302	-

## End points

### End points reporting groups

Reporting group title	Clazakizumab Group
Reporting group description: Clazakizumab is a humanized monoclonal IgG1 antibody with high affinity for IL-6 and a long t1/2 of approximately 30 days. This antibody has been systematically evaluated in rheumatoid and psoriatic arthritis.	
Reporting group title	Placebo
Reporting group description: placebo (0.9% saline)	
Reporting group title	clazakizumab (all) Group
Reporting group description: a 40-week open-label extension where all participants received clazakizumab (part B). The rationale behind this design was to offer all participants the option of a potentially effective treatment.	

### Primary: Safty: overall AEs during Part A and B

End point title	Safty: overall AEs during Part A and B
End point description: This phase 2 pilot trial, the first randomized controlled trial evaluating IL-6 signaling blockade in transplantation, assessing the safety and tolerability. For more details see category Adverse Events	
End point type	Primary
End point timeframe: 51 Weeks	

End point values	Clazakizumab Group	Placebo	clazakizumab (all) Group	
Subject group type	Reporting group	Reporting group	Reporting group	
Number of subjects analysed	10	10	19	
Units: Events				
Adverse Event	50	44	129	
serious AE	3	1	9	
non-serious AEs	47	43	120	

### Statistical analyses

Statistical analysis title	group comparisons
Comparison groups	Clazakizumab Group v Placebo v clazakizumab (all) Group

Number of subjects included in analysis	39
Analysis specification	Pre-specified
Analysis type	superiority
P-value	< 0.05 <sup>[1]</sup>
Method	t-test, 2-sided

Notes:

[1] - Intergroup differences were tested at a two-sided significance level of 5%. For statistical analysis, IBM SPSS Statistics version 24.

### Secondary: Efficacy: HLA Antibody and Ig Levels

End point title	Efficacy: HLA Antibody and Ig Levels
-----------------	--------------------------------------
