

Clinical trial results:

STELLA – A Randomized, Multicenter, Multinational, Double-Blind Study to Assess the Efficacy and Safety of MB02 (Bevacizumab Biosimilar Drug) Versus Avastin® in Combination With Carboplatin and Paclitaxel for the Treatment of Subjects With Stage IIIB/IV Non-squamous Non-Small Cell Lung Cancer (NSCLC)

Summary

EudraCT number	2017-001769-26
Trial protocol	HU BG GR ES
Global end of trial date	27 February 2020

Results information

Result version number	v1 (current)
This version publication date	10 March 2021
First version publication date	10 March 2021

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	31 March 2020
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	27 February 2020
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective of the study is to compare the ORR of MB02 and EU approved Avastin® when they are administered in combination with carboplatin and paclitaxel in subjects with Stage IIIB/IV non-squamous NSCLC as assessed according to RECIST

Protection of trial subjects:

This study was conducted in accordance with the ethical principles in the accepted version of the Declaration of Helsinki and all applicable regulatory authorities' regulations in compliance with International Council for Harmonisation (ICH) good clinical practice (GCP) guidelines (ICH E6), and according to the appropriate regulatory requirements in the countries where the study was conducted. Ethical approval was sought and granted at each centre. All patients provided written informed consent before any study-specific procedures were done.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	23 January 2018
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Bulgaria: 6
Country: Number of subjects enrolled	Greece: 10
Country: Number of subjects enrolled	Hungary: 17
Country: Number of subjects enrolled	India: 60
Country: Number of subjects enrolled	Malaysia: 27
Country: Number of subjects enrolled	Philippines: 13
Country: Number of subjects enrolled	Thailand: 27
Country: Number of subjects enrolled	Georgia: 69
Country: Number of subjects enrolled	Russian Federation: 107
Country: Number of subjects enrolled	Serbia: 55
Country: Number of subjects enrolled	Turkey: 5
Country: Number of subjects enrolled	Ukraine: 189
Country: Number of subjects enrolled	Lebanon: 3
Country: Number of subjects enrolled	Brazil: 6
Country: Number of subjects enrolled	Chile: 27
Country: Number of subjects enrolled	Mexico: 6

Worldwide total number of subjects	627
EEA total number of subjects	33

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	408
From 65 to 84 years	219
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

The Screening period for this study was from 23-January-2018, date of the first ICF, through 18-February-2019, the date of last ICF (804 subjects). The recruitment period was from 06-February-2018 through 05-March-2019 (627 subjects).

Pre-assignment

Screening details:

A total of 804 subjects were screened, of which 177 subjects were screening failures. Most screening failures (144 of 177) were the result of subjects failing to meet eligibility criteria (i.e., protocol-specified inclusion [54 subjects] or exclusion [90 subjects] criteria).

Period 1

Period 1 title	Combination Therapy period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst

Arms

Are arms mutually exclusive?	Yes
Arm title	MB02 (Bevacizumab biosimilar) arm

Arm description:

MB02 (test; bevacizumab biosimilar drug sourced from mAbxience Spain), administered as an IV infusion at an intended dose of 15 mg/kg on Day 1 of every 3-week treatment cycle in combination with chemotherapy (carboplatin and paclitaxel).

Arm type	Experimental
Investigational medicinal product name	MB02 (Bevacizumab Biosimilar Drug) + Carboplatin/Paclitaxel
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for solution for injection/infusion
Routes of administration	Intravenous use

Dosage and administration details:

MB02 (Bevacizumab Biosimilar Drug): 15 mg/kg IV every 3 weeks on Day 1
Carboplatin: Carboplatin AUC 6 IV every 3 weeks on Day 1 for 6 cycles
Paclitaxel: Paclitaxel 200 mg/m² IV every 3 weeks on Day 1 for 6 cycles

Arm title	Avastin® (EU-Bevacizumab, Ref.product) arm
------------------	---

Arm description:

Avastin® (reference; sourced from the EU), administered as an IV infusion at an intended dose of 15 mg/kg on Day 1 of every 3-week treatment cycle in combination with chemotherapy (carboplatin and paclitaxel).

Arm type	Active comparator
Investigational medicinal product name	EU-approved Avastin® + Carboplatin/Paclitaxel
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for solution for injection/infusion
Routes of administration	Intravenous use

Dosage and administration details:

EU-approved Avastin®: 15 mg/kg IV every 3 weeks on Day 1
Carboplatin: Carboplatin AUC 6 IV every 3 weeks on Day 1 for 6 cycles
Paclitaxel: Paclitaxel 200 mg/m² IV every 3 weeks on Day 1 for 6 cycles

Number of subjects in period 1	MB02 (Bevacizumab biosimilar) arm	Avastin® (EU-Bevacizumab, Ref.product) arm
Started	315	312
Completed	207	220
Not completed	108	92
Consent withdrawn by subject	17	12
Physician decision	7	5
Disease progression	27	38
Adverse event, non-fatal	29	20
Subject decision	2	1
Death	14	12
Lost to follow-up	6	2
Did not receive treatment	4	2
Protocol deviation	2	-

Period 2

Period 2 title	Monotherapy
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst

Blinding implementation details:

After 6 cycles (i.e., at the start of Cycle 7), subjects could have continued to receive MB02/Avastin® monotherapy treatment every 3 weeks until evidence of disease progression or until unacceptable toxic effects developed.

Arms

Are arms mutually exclusive?	Yes
Arm title	Avastin® (EU-Bevacizumab, Ref.product)

Arm description:

Avastin® (reference; sourced from the EU), administered as an IV infusion at an intended dose of 15 mg/kg on Day 1 of every 3-week treatment cycle

Arm type	Active comparator
Investigational medicinal product name	EU-approved Avastin®
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for solution for injection/infusion
Routes of administration	Intravenous use

Dosage and administration details:

EU-approved Avastin®: 15 mg/kg IV every 3 weeks on Day 1

Arm title	MB02 (Bevacizumab biosimilar) arm
Arm description:	
MB02 (test; bevacizumab biosimilar drug sourced from mAbxience Spain), administered as an IV infusion at an intended dose of 15 mg/kg on Day 1 of every 3-week treatment cycle	
Arm type	Experimental
Investigational medicinal product name	MB02 (Bevacizumab Biosimilar Drug)
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for solution for injection/infusion
Routes of administration	Intravenous use

Dosage and administration details:

MB02 (Bevacizumab Biosimilar Drug): 15 mg/kg IV every 3 weeks on Day 1

Number of subjects in period 2	Avastin® (EU-Bevacizumab, Ref.product)	MB02 (Bevacizumab biosimilar) arm
Started	220	207
Completed	74	68
Not completed	146	139
Consent withdrawn by subject	6	5
Physician decision	8	6
Disease progression	106	109
Adverse event, non-fatal	11	10
Subject decision	3	3
Death	8	5
Lost to follow-up	4	1

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
03 December 2018	The main reason for the amendment was to implement the FDA recommendations received after the FDA Scientific Advice was provided on 04-October-2018. Other minor updates were also made as a result of recommendations received from the DSMB recommendations and to clarify aspects of the protocol which were unclear in version 1.0.
24 May 2019	The main reason to issue the present amendment was to clarify the procedures applicable to subjects that were responding to treatment at Week 52 and were offered the opportunity to be treated with biosimilar MB02 monotherapy until disease progression, unacceptable toxicity, or death.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
