Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	09 November 2020
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	09 November 2020
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The purpose of this study is to evaluate the efficacy and safety of pembrolizumab plus epacadostat compared to pembrolizumab plus placebo as first-line treatment in participants with metastatic non-small cell lung cancer (NSCLC) expressing high levels of programmed cell death ligand 1 (PD-L1).

Protection of trial subjects:

This study was conducted in conformance with applicable country or local requirements regarding ethical committee review, informed consent, and other statutes or regulations regarding the protection of the rights and welfare of human participants in biomedical research.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	15 December 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Australia: 2
Country: Number of subjects enrolled	Canada: 12
Country: Number of subjects enrolled	Switzerland: 7
Country: Number of subjects enrolled	Denmark: 7
Country: Number of subjects enrolled	Spain: 16
Country: Number of subjects enrolled	United Kingdom: 1
Country: Number of subjects enrolled	Ireland: 1
Country: Number of subjects enrolled	Israel: 7
Country: Number of subjects enrolled	Italy: 5
Country: Number of subjects enrolled	Japan: 29
Country: Number of subjects enrolled	Korea, Republic of: 10
Country: Number of subjects enrolled	Malaysia: 8

Country: Number of subjects enrolled	Russian Federation: 6
Country: Number of subjects enrolled	Turkey: 14
Country: Number of subjects enrolled	Ukraine: 12
Country: Number of subjects enrolled	United States: 14
Worldwide total number of subjects	154
EEA total number of subjects	32

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	71
From 65 to 84 years	80
85 years and over	3

Subject disposition

Recruitment

Recruitment details:

A total of 154 participants were randomized in 1:1 to either combination (Pembrolizumab+Epacadostat) and control (Pembrolizumab+Placebo) groups. As of Amendment 05, study design was changed to unblinded, open-label, and single-arm (epacadostat and placebo were removed).

Pre-assignment

Screening details:

A total of 154 participants were randomized and 152 participants received study treatment.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Carer, Data analyst

Arms

Are arms mutually exclusive?	Yes
Arm title	Pembrolizumab + Epacadostat

Arm description:

Participants received pembrolizumab 200 mg as an intravenous (IV) infusion, every three weeks (Q3W) starting on Day 1 of each cycle for up to 35 administrations in combination with epacadostat 100 mg orally, twice daily. Epacadostat administration was discontinued after the implementation of protocol amendment 05.

Arm type	Experimental
Investigational medicinal product name	epacadostat
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

100mg twice a day

Investigational medicinal product name	pembroluzimab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

200mg every 3 weeks

Arm title	Pembrolizumab + Placebo
------------------	-------------------------

Arm description:

Participants received pembrolizumab 200 mg by IV infusion, Q3W starting on Day 1 of each cycle for up to 35 administrations in combination with matching placebo orally, twice daily. Placebo administration was discontinued after the implementation of protocol amendment 05.

Arm type	Active comparator
Investigational medicinal product name	placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

100mg twice a day

Investigational medicinal product name	pembroluzimab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

200mg every 3 weeks

Number of subjects in period 1	Pembrolizumab + Epacadostat	Pembrolizumab + Placebo
Started	77	77
Completed	46	40
Not completed	31	37
Adverse event, serious fatal	21	28
Physician decision	7	6
Consent withdrawn by subject	3	1
Study terminated by sponsor	-	1
Lost to follow-up	-	1

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
03 November 2017	To provide specific dose modification and toxicity management guidelines for myocarditis
06 March 2018	To align HIV and pregnancy testing with regulatory requirements at German sites.
05 April 2018	To align with regulatory requirements at French sites to exclude participants on coumarin based anticoagulants and prohibit coumarin based anticoagulant treatment for participants receiving epacadostat. In addition, to provide specific dose modification and toxicity management guidelines for myocarditis
31 May 2018	Updated Phase 3 design to Phase 2 design, title of protocol and secondary endpoints.
04 March 2019	Data from the final analysis of KEYNOTE-654/ECHO-305 (data cutoff: 10-JAN-2019) indicated that the study did not meet the pre-specified endpoint of improvement in objective response rate (ORR) for the combination of pembrolizumab plus epacadostat compared with pembrolizumab plus placebo. Based upon these data from the final analysis, the Sponsor and MSD implemented this Amendment 05 to direct that all epacadostat and placebo administration stop, and to reflect that the study is no longer blinded.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
