

## Clinical trial results:

### A Phase IIb, 2-Arm, Randomized, Double-blind, Placebo-Controlled, Multicentre Study to Optimize Diamyd® Therapy Administered into Lymph Nodes Combined with Oral Vitamin D to Investigate the Impact on the Progression of Type 1 diabetes

#### Summary

EudraCT number	2017-001861-25
Trial protocol	SE CZ ES NL
Global end of trial date	27 April 2021

#### Results information

Result version number	v1 (current)
This version publication date	13 October 2021
First version publication date	13 October 2021

#### Trial information

##### Trial identification

Sponsor protocol code	DIAGNODE-2 (D/P2/17/6)
-----------------------	------------------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT03345004
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Diamyd Medical AB
Sponsor organisation address	Kungsgatan 29, Stockholm, Sweden, SE-111 56
Public contact	Clinical Study Director, Diamyd Medical AB, clinicaltrials@diamyd.com
Scientific contact	Clinical Study Director, Diamyd Medical AB, clinicaltrials@diamyd.com

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-000609-PIP01-09
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	27 April 2021
Is this the analysis of the primary completion data?	Yes
Primary completion date	27 April 2021
Global end of trial reached?	Yes
Global end of trial date	27 April 2021
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary objective was to evaluate the efficacy of Diamyd, administered into lymph nodes in combination with an oral vitamin D regimen, compared to placebo in terms of preserving endogenous insulin secretion as measured by C-peptide.

Protection of trial subjects:

The final study protocol, including any substantial amendments and the final version of the subject information and consent form, were reviewed and approved by an Independent Ethics Committee and Competent Authorities prior to inclusion of subjects. The study was conducted in compliance with the protocol, regulatory requirements, good clinical practice (GCP) and the ethical principles of the latest revision of the Declaration of Helsinki as adopted by the World Medical Association. The investigator was responsible for giving the patients and his/her parents/caregivers full and adequate verbal and written information about the nature, purpose, possible risk and benefit of the study. Patients and, if applicable, his/her parents/caregivers were also notified that they were free to withdraw from the study at any time. The patients and parents/caregivers had reasonable time to read and understand the information before signing. The investigator was responsible for obtaining signed informed consent from all patients before including the patient in any study related procedures.

Background therapy:

Standard of care

Evidence for comparator: -

Actual start date of recruitment	17 December 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Netherlands: 2
Country: Number of subjects enrolled	Spain: 43
Country: Number of subjects enrolled	Sweden: 31
Country: Number of subjects enrolled	Czech Republic: 33
Worldwide total number of subjects	109
EEA total number of subjects	109

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37	0

wk	
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	75
Adults (18-64 years)	34
From 65 to 84 years	0
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Patients were recruited at 18 sites in total, in Spain, Sweden, Czech Republic and the Netherlands. Patients were recruited from 07 December 2017 and the last patient's last visit was on 24 April 2021.

### Pre-assignment

Screening details:

Inclusion: Patients aged 12-24 with type-1 diabetes diagnosed for at least 6 months with fasting C-peptide over 0.12 nmol/L and positive for GAD65A (<50,000 IU/mL) with adequate contraception. Exclusion: patients using immunosuppressants, anti-inflammatory drugs, anti-diabetics (other than insulin), vitamin D, with history of anaemia or epilepsy.

### Period 1

Period 1 title	Main Study
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor

### Arms

Are arms mutually exclusive?	No
<b>Arm title</b>	Diamyd + vitamin D (FAS, Main Study)

Arm description: -

Arm type	Experimental
Investigational medicinal product name	Diamyd® intralymphatic injection
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intralymphatic use

Dosage and administration details:

4 ug administered in the inguinal lymph node on Day 30, 60 and 90.

Investigational medicinal product name	Vitamin D
Investigational medicinal product code	
Other name	D-vitaminolja ACO orala droppar, lösning, 80 IE/droppe
Pharmaceutical forms	Oral drops, solution
Routes of administration	Oral use

Dosage and administration details:

2000 IU/day (25 drops á 80 IE/drop) from Day 1 to Day 120.

<b>Arm title</b>	Placebo (FAS, Main Study)
------------------	---------------------------

Arm description: -

Arm type	Placebo
Investigational medicinal product name	Placebo intralymphatic injection
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intralymphatic use

Dosage and administration details:

Administered in the inguinal lymph node on Day 30, 60 and 90.

Investigational medicinal product name	Placebo oral drops
Investigational medicinal product code	
Other name	

Pharmaceutical forms	Oral drops, solution
Routes of administration	Oral use
Dosage and administration details:	
Administered daily from Day 1 to Day 120.	

<b>Arm title</b>	Diamyd + vitamin D (HLA DR3-DQ2, Main Study)
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	Diamyd® intralymphatic injection
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intralymphatic use
Dosage and administration details:	
4 ug administered in the inguinal lymph node on Day 30, 60 and 90.	
Investigational medicinal product name	Vitamin D
Investigational medicinal product code	
Other name	D-vitaminolja ACO orala droppar, lösning, 80 IE/droppe
Pharmaceutical forms	Oral drops, solution
Routes of administration	Oral use
Dosage and administration details:	
2000 IU/day (25 drops á 80 IE/drop) from Day 1 to Day 120.	

<b>Arm title</b>	Placebo (HLA DR3-DQ2, Main Study)
Arm description: -	
Arm type	Placebo
Investigational medicinal product name	Placebo intralymphatic injection
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intralymphatic use
Dosage and administration details:	
Administered in the inguinal lymph node on Day 30, 60 and 90.	
Investigational medicinal product name	Placebo oral drops
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Oral drops, solution
Routes of administration	Oral use
Dosage and administration details:	
Administered daily from Day 1 to Day 120.	

Number of subjects in period 1	Diamyd + vitamin D (FAS, Main Study)	Placebo (FAS, Main Study)	Diamyd + vitamin D (HLA DR3-DQ2, Main Study)
Started	57	52	29
Completed	56	51	28

## Period 2

Period 2 title	Extension Study
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor

## Arms

Are arms mutually exclusive?	No
<b>Arm title</b>	Diamyd + vitamin D (Extension)

Arm description: -

Arm type	Experimental
Investigational medicinal product name	Diamyd® intralymphatic injection
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intralymphatic use

Dosage and administration details:

4 ug administered in the inguinal lymph node on Day 30, 60 and 90.

Investigational medicinal product name	Vitamin D
Investigational medicinal product code	
Other name	D-vitaminolja ACO orala droppar, lösning, 80 IE/droppe
Pharmaceutical forms	Oral drops, solution
Routes of administration	Oral use

Dosage and administration details:

2000 IU/day (25 drops á 80 IE/drop) from Day 1 to Day 120.

<b>Arm title</b>	Placebo (Extension)
------------------	---------------------

Arm description: -

Arm type	Placebo
Investigational medicinal product name	Placebo intralymphatic injection
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intralymphatic use

Dosage and administration details:

Administered in the inguinal lymph node on Day 30, 60 and 90.

Investigational medicinal product name	Placebo oral drops
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Oral drops, solution
Routes of administration	Oral use
Dosage and administration details:	
Administered daily from Day 1 to Day 120.

occurrences (all)	4	0	

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
16 June 2017	Amendment 1 included: <ul style="list-style-type: none"><li>• Addition of new inclusion criterion</li><li>• Clarification on all visits timing</li><li>• Specification of c-peptid concentration at screening visit</li><li>• Clarification on the physical examination outcome</li><li>• Clarification on the lymph node injection side</li><li>• Clarification on the relationship to study medication</li></ul>
21 August 2017	Amendment 4 included: <ul style="list-style-type: none"><li>• Patients taking Vitamin D before screening had to stop it during trial (new exclusion criterion)</li></ul>
28 June 2018	Amendment 5 included: <ul style="list-style-type: none"><li>• Addition of 2 sites in The Netherlands (new country)</li><li>• Increase the number of total patients 106 instead of 80</li><li>• Increase the recruitment period in 4 months (16 in total)</li><li>• ICFs were updated</li></ul>
18 June 2019	Amendment 6 included: <ul style="list-style-type: none"><li>• All patients that were ongoing, were asked to participate in the Extension Study Period which included Visit 8 at month 24.</li><li>• Exploratory endpoints included all data collected at the 24-month follow-up visit</li><li>• ICFs were updated for the patients that approved to participate in the Extension Study</li></ul>
15 May 2020	Amendment 7 included: <ul style="list-style-type: none"><li>• Addition of key secondary endpoints to evaluate diabetic status</li><li>• Correction of secondary endpoints and addition of new ones (body weight, body mass index and serological test for Covid-19)</li><li>• Upgrade of analysis sets for statistical analysis</li><li>• Upgrade of primary endpoint variable analysis; secondary efficacy endpoint variables analysis; secondary variables of diabetic status analysis; and exploratory endpoints variables analysis</li></ul>

Notes:

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
