Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	12 August 2021
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	12 August 2021
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To assess the Complete Metabolic Response (CMR) rate by the Lugano classification 2014 based on central review at the end of treatment.

Protection of trial subjects:

No specific measures.

Background therapy:

All drugs composing the regimens of the study were registered and were available at the hospital pharmacy.
Vinblastine was used according to the protocol and Nivolumab was provided by the sponsor for this study.

Evidence for comparator: -

Actual start date of recruitment	02 May 2018
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Belgium: 4
Country: Number of subjects enrolled	France: 60
Worldwide total number of subjects	64
EEA total number of subjects	64

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	6
From 65 to 84 years	51

Subject disposition

Recruitment

Recruitment details:

Date of first recruitment : France : 30/08/2018 // BELGIQUE : 26/02/2019

Date of last recruitment : France : 28/04/2020 // BELGIQUE : 16/01/2020

Date of last visit : France : 25/05/2021 // BELGIQUE : 05/03/2021

Pre-assignment

Screening details:

Screening set : 67 patients

Enrolled set : 64 patients

Period 1

Period 1 title	Overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	Overall
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	Nivolumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Induction : Nivolumab was given alone at 240mg flat dose as a 30 minute IV infusion every 2 weeks.

Consolidation : Nivolumab was given alone or with Vinblastin (6mg/m² IV) at 240mg flat dose as a 30 minute IV infusion every 2 weeks.

Investigational medicinal product name	Vinblastin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Consolidation : Vinblastin was given at 6mg/m² IV in addition of Nivolumab (240mg) a 30 minute IV infusion every 2 weeks.

Number of subjects in period 1	Overall
Started	64
Completed	19
Not completed	45
Consent withdrawn by subject	2

FORTUITE DISCOVERY NEUROENDOCRINE TUMOR DISEASE DU	1
Adverse event, non-fatal	15
Death	2
Pogression	22
patient decision	1
Protocol deviation	2

Units: Subjects			
Female	25	25	
Male	39	39	

Subject analysis sets

Subject analysis set title	Evaluable Set
Subject analysis set type	Sub-group analysis

Subject analysis set description:

The Efficacy Set includes all patients enrolled in the study and having signed the informed consent, and who received at least one dose of Nivolumab and :

- with an available PET response evaluation at end of treatment or at treatment discontinuation
- or who died from lymphoma before end of treatment or treatment discontinuation
- or who withdrew for progression before end of treatment or treatment discontinuation.

Reporting group values	Evaluable Set		
Number of subjects	56		
Age categorical			
Units: Subjects			
In utero	0		
Preterm newborn infants (gestational age < 37 wks)	0		
Newborns (0-27 days)	0		

Infants and toddlers (28 days-23 months)	0		
Children (2-11 years)	0		
Adolescents (12-17 years)	0		
Adults (18-64 years)	5		
From 65-84 years	45		
85 years and over	6		
Age continuous			
Units: years			
median	75		
inter-quartile range (Q1-Q3)	70 to 81		
Gender categorical

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
21 December 2018	<p>Protocol v2.0 dated 5 Nov 2018:</p> <ul style="list-style-type: none">- Modification of definition of evaluable patients- Sample size calculation method corrected- Vinblastine confirmed IMP- Vinblastine dose adapted to grade of neutropenia- Death not due to lymphoma is not to be reported as an adverse event- Hepatitis B serology at C6, C12 and EoT- Bilirubine dosage includes conjugated and total bilirubine- After C6, evaluation period goes from 2 months to 1 month +/- 14 days <p>Investigator Brochure Nivolumab v17 dated 23/06/2017 with modification of expected adverse events impacting patients' safety. Study documents updated including a complementary information note.</p>
23 December 2019	<p>Protocol v3.0 dated 08 Nov 2019:</p> <ul style="list-style-type: none">- Primary endpoint based on central review- Modification of estimated timelines- After C6, evaluation period goes between 14 and 42 days after C6D1- No obligation of social security for Belgium- Stable patients at C6 eval can continue treatment, only patients in progression will stop the study- Administration of vinblastine and nivolumab adapted- New procedure to handle myocarditis <p>Investigator Brochure v18 dated 25 Jun 2019 with modification of expected adverse events impacting patients' safety. Study documents updated.</p>

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
