

Clinical trial results:

A placebo-controlled, double-blind (sponsor open), randomised, crossover study to assess the efficacy, safety, and tolerability of GSK2798745 in participants with chronic cough

Summary

EudraCT number	2017-002265-21
Trial protocol	GB
Global end of trial date	08 October 2018

Results information

Result version number	v1 (current)
This version publication date	22 September 2019
First version publication date	22 September 2019

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	22 March 2019
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	08 October 2018
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

To compare the efficacy of 7 days dosing of GSK2798745 with placebo in participants with idiopathic or treatment-resistant chronic cough.

Protection of trial subjects:

Not Applicable

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	05 April 2018
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United Kingdom: 17
Worldwide total number of subjects	17
EEA total number of subjects	17

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	10
From 65 to 84 years	7
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Study was conducted at 4 centers in the United Kingdom. Participants who met eligibility criteria entered a 2-period crossover study. Participants were randomized to either placebo or GSK2798745 in each Treatment Period (each 7 days, with a 14-21 day washout). Total duration of participation was 10.5 weeks. Study terminated on grounds of futility

Pre-assignment

Screening details:

A total of 34 participants were screened of which 17 failed screening and 17 participants were included in the study.

Period 1

Period 1 title	Treatment Period 1 (Up to 7 days)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Data analyst, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo/GSK2798745

Arm description:

Participants were administered two tablets of placebo on Day 1 followed by one tablet of placebo on Days 2 to 7 of treatment period 1. In treatment period 2, participants received two tablets of 2.4 milligrams (mg) GSK2798745 each on Day 1 followed by one tablet of 2.4 mg GSK2798745 on Days 2 to 7. All doses were administered once daily via the oral route with a glass of water. The treatment periods were separated by a wash-out period of 14 to 21 days.

Arm type	Experimental
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Participants were randomized to receive two tablets of placebo on Day 1 and one tablet on Days 2 to 7, via the oral route with a glass of water.

Investigational medicinal product name	2.4 mg GSK2798745
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Participants were randomized to receive two tablets of 2.4 mg GSK2798748 on Day 1 and one tablet on Days 2 to 7, via the oral route with a glass of water.

Arm title	GSK2798745/Placebo

Primary: Total cough counts during day time hours following 7-days of dosing	
End point title	Total cough counts during day time hours following 7-days of dosing
End point description:	
Coughs were monitored using the VitaloJAK cough monitor. Total cough counts during day-time (10 hours) was calculated from the time of monitor being attached i.e. immediately after dosing on Day 7 to 10 hours past the time of monitoring. Total cough counts were log-transformed prior to analysis. A non-informative prior was used. Analysis was performed using a Bayesian mixed model adjusting for subject-level and period-adjusted baselines, treatment and period. Subject-level baseline is defined as the mean of two period-specific baselines. Period-adjusted baseline is defined as difference between the period-specific baseline and subject-level baseline for each period. Posterior median and 95% credible interval is reported. All Subjects Population included all randomized participants who took at least 1 dose of study treatment. Participants were analyzed according to treatment they actually received. Only those participants with data available at specified data points were analyzed.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
09 October 2017	Amendment No.01: The primary reason for amending the protocol was the removal of the Simplified Nutritional Appetite Questionnaire (SNAQ).
22 November 2017	Amendment No.02: Medicines and Healthcare Products Regulatory Agency (MHRA) requested: <ul style="list-style-type: none">• Addition of the Columbia Suicidality Severity Rating Scale (CSSRS) at Follow-up.• That in case of an emergency, the investigator has the sole responsibility for determining if unblinding of a participant's treatment assignment is warranted.• Addition of adverse event stopping criteria.
25 June 2018	Amendment No.03: A non-substantial protocol amendment was made to clarify the inclusion criteria and make administrative corrections.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
