

### Change from Baseline in Time to Complete the Repeated Chair Stand Test by Treatment Group Over Time (TRCA-301E MITT Analysis Set)

MITT = modified intent-to-treat; RCS = repeated chair stand test; SE = standard error

Note: Missing time due to the fact that a subject was weak and unable to perform the repeated chair stand test was imputed to 60 seconds. The Week 40 value was used if the Week 52 value was missing.
