

## Clinical trial results:

### Safety of PATANASE® Nasal Spray in Patients With Perennial Allergic Rhinitis

#### Summary

EudraCT number	2017-002726-20
Trial protocol	Outside EU/EEA
Global end of trial date	04 January 2011

#### Results information

Result version number	v1 (current)
This version publication date	02 February 2018
First version publication date	02 February 2018

#### Trial information

##### Trial identification

Sponsor protocol code	C-08-32
-----------------------	---------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT00789555
WHO universal trial number (UTN)	-

Notes:

##### Sponsors

Sponsor organisation name	Alcon Research
Sponsor organisation address	6201 S. Freeway, Fort Worth, Texas, United States, 76134
Public contact	Ophthalmology Unit, Novartis Pharmaceuticals, +44 01276 6673 3391, dennis.wong@novartis.com
Scientific contact	Ophthalmology Unit, Novartis Pharmaceuticals, +44 01276 6673 3391, dennis.wong@novartis.com

Notes:

##### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	04 January 2011
Is this the analysis of the primary completion data?	Yes
Primary completion date	04 January 2011
Global end of trial reached?	Yes
Global end of trial date	04 January 2011
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The purpose of this study was to assess local nasal adverse effects, as well as systemic effects, of PATANASE nasal spray when compared with Patanase Vehicle, pH 3.7 and Patanase Vehicle, pH 7.0 in patients with perennial allergic rhinitis (PAR).

Protection of trial subjects:

Prior to the start of the study, the study protocol, the informed consent and assent documents, patient instruction sheets, the Investigator's Brochure, as well as any advertising materials used to recruit patients were submitted to institutional review boards (IRBs) and independent ethics committees (IECs). The IRB/IECs reviewed all documents and approved required documents; copies of the approval letters were provided to Alcon. Consistent with both the IRB/IEC's requirements and all applicable regulations, the Investigators periodically provided study updates to the IRB/IEC. A patient or parent/legal guardian (if necessary, a legally authorized representative) provided informed consent, and children signed an approved assent form when appropriate. This study was conducted in accordance with Good Clinical Practices (GCP) and the ethical principles that have their origins in the Declaration of Helsinki.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	19 November 2008
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	United States: 1260
Worldwide total number of subjects	1260
EEA total number of subjects	0

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	146

Adults (18-64 years)	1086
From 65 to 84 years	28
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Subjects were recruited and enrolled from 69 US study centers.

### Pre-assignment

Screening details:

234 subjects were enrolled under protocol Version 1.0, then exited due to a revision in the study plan. A new cohort of 1026 subjects was enrolled in protocol Version 2.0, for a total enrollment of 1260 subjects.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Carer

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	PATANASE

Arm description:

Two sprays in each nostril twice a day for up to 12 months

Arm type	Experimental
Investigational medicinal product name	Olopatadine hydrochloride 0.6%
Investigational medicinal product code	
Other name	PATANASE®
Pharmaceutical forms	Nasal spray
Routes of administration	Nasal use

Dosage and administration details:

Olopatadine hydrochloride 0.6% nasal spray (PATANASE)

Two sprays in each nostril twice a day (morning and evening) for up to 12 months

<b>Arm title</b>	Patanase Vehicle, pH 3.7
------------------	--------------------------

Arm description:

Olopatadine nasal spray vehicle, pH 3.7, two sprays in each nostril twice a day (morning and evening) for up to 12 months

Arm type	Placebo Comparator
Investigational medicinal product name	Olopatadine nasal spray vehicle, pH 3.7
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Nasal spray
Routes of administration	Nasal use

Dosage and administration details:

Two sprays in each nostril twice a day (morning and evening) for up to 12 months

<b>Arm title</b>	Patanase Vehicle, pH 7.0
------------------	--------------------------

Arm description:

Olopatadine nasal spray vehicle, pH 7.0, two sprays in each nostril twice a day (morning and evening) for up to 12 months

Arm type	Placebo Comparator
----------	--------------------

Investigational medicinal product name	Olopatadine nasal spray vehicle, pH 7.0
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Nasal spray
Routes of administration	Nasal use

Dosage and administration details:

Two sprays in each nostril twice a day (morning and evening) for up to 12 months

<b>Number of subjects in period 1</b>	PATANASE	Patanase Vehicle, pH 3.7	Patanase Vehicle, pH 7.0
Started	421	417	422
Completed	262	278	263
Not completed	159	139	159
Treatment failure	11	8	12
Protocol Amendment	78	76	80
Adverse event, non-fatal	17	7	10
Patient decision unrelated to adv event	38	29	26
Protocol Violation	6	9	13
Lost to follow-up	9	10	18

## Baseline characteristics

### Reporting groups

Reporting group title	PATANASE
Reporting group description: Two sprays in each nostril twice a day for up to 12 months

### Primary: Self-Rated Relief Assessment at Day 30

End point title	Self-Rated Relief Assessment at Day 30
End point description: Relief assessment as rated by the subject on a 4-point scale, where 1=complete relief and 4=no relief. The subject answered the following question: "I would rate the study medication's effectiveness for relieving my allergy symptoms since my last visit as: (1) Complete Relief; (2) Moderate Relief; (3) Mild Relief; (4) No Relief." This analysis population includes all subjects enrolled under protocol Version 2.0 who received study drug and attended at least one on-therapy study visit (ITT). The LOCF (last observation carried forward method) was used to impute missing data.	
End point type	Primary
End point timeframe: Day 30	

End point values	PATANASE	Patanase Vehicle, pH 3.7	Patanase Vehicle, pH 7.0

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Adverse events were collected for the duration of the study: 2 years, 1 month, 16 days. Adverse events were defined as any untoward (unfavorable and unintended) medical occurrence in a subject administered a test article.

Adverse event reporting additional description:

Adverse events were collected after the first dose of study medication at Visit 1 and during each monthly on-therapy study visit through Visit 13 (or Early Exit). Safety Analysis Set was used for analysis. Only total subjects affected by non-serious AEs that occur at >5% are reported.

Assessment type	Systematic

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
26 June 2009	This study was amended following comments received from the Health Authority. At the time of the amendment's implementation, 234 patients were enrolled in the study. Because the amendment substantially revised the study plan, the analysis variables, and the entry criteria, all of the active patients at the time the amendment was implemented were discontinued and an entirely new cohort of patients was subsequently enrolled.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
