Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-001613-PIP01-14
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	12 November 2020
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	12 November 2020
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To assess the effect of 210 mg tezepelumab SC Q4W on asthma exacerbations in adult and adolescent subjects with severe uncontrolled asthma compared with placebo

Protection of trial subjects:

The protocol, protocol amendments, informed consent form (ICF), Investigator Brochure (IB), and other relevant documents (eg, advertisements) were submitted to an Institutional Review Board/Independent Ethics Committee (IRB/IEC) by the Investigator and reviewed and approved by the IRB/IEC before the study was initiated.

The Investigator or his/her representative explained the nature of the study to the subject or his/her legally authorised representative and answered all questions regarding the study. Subjects were informed that their participation was voluntary. Subjects or their legally authorised representative were required to sign a statement of informed consent that met the requirements of 21 CFR 312.62, local regulations, ICH guidelines, Health Insurance Portability and Accountability Act (HIPAA) requirements, where applicable, and the IRB/IEC or study centre.

For subjects under the age of majority (adolescent subjects), the subject's legal guardian provided their informed consent in addition to the subject's informed consent. The medical record must have included a statement that written informed consent was obtained before the subject was enrolled in the study and the date the written consent was obtained. The authorised person obtaining the informed consent must have also signed the ICF.

Subjects must have been re-consented to the most current version of the ICF(s) during their participation in the study.

A copy of the ICF(s) was provided to the subject or the subject's legally authorised representative.

Background therapy:

Subjects who had received a physician-prescribed asthma controller medication with medium- or high-dose ICS as per GINA guideline (GINA 2017) for at least 12 months prior to Visit 1.

Documented treatment with a total daily dose of either medium or high-dose ICS ($\geq 500\mu\text{g}$ fluticasone propionate dry powder formulation equivalent total daily dose) for at least 3 months prior to Visit 1. The ICS could be contained within an ICS/LABA combination product.

At least one additional maintenance asthma controller medication was required according to standard practice of care. Use of additional asthma controller medications must have been documented for at least 3 months prior to Visit 1.

Evidence for comparator: -

Actual start date of recruitment	23 November 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Korea, Republic of: 126
Country: Number of subjects enrolled	Japan: 97
Country: Number of subjects enrolled	Vietnam: 20
Country: Number of subjects enrolled	Taiwan: 9
Country: Number of subjects enrolled	United States: 186
Country: Number of subjects enrolled	Canada: 36
Country: Number of subjects enrolled	Brazil: 93
Country: Number of subjects enrolled	Argentina: 81
Country: Number of subjects enrolled	Germany: 103
Country: Number of subjects enrolled	France: 41
Country: Number of subjects enrolled	Australia: 19
Country: Number of subjects enrolled	Austria: 8
Country: Number of subjects enrolled	South Africa: 109
Country: Number of subjects enrolled	Israel: 47
Country: Number of subjects enrolled	Saudi Arabia: 7
Country: Number of subjects enrolled	Russian Federation: 51
Country: Number of subjects enrolled	Ukraine: 26
Worldwide total number of subjects	1059
EEA total number of subjects	152

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	82
Adults (18-64 years)	807
From 65 to 84 years	170
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

A total of 2420 subjects were enrolled at 297 centres in 18 countries;

Pre-assignment

Screening details:

1061 subjects were randomised to receive treatment with tezepelumab 210mg Q4W or placebo. Of the 1061 randomised, 1059 (99.8%) subjects received treatment. 82 (7.7%) of the subjects randomised and treated were adolescents.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Tezepelumab 210mg Q4W

Arm description:

Tezepelumab administered every 4 weeks subcutaneously

Arm type	Experimental
Investigational medicinal product name	Tezepelumab administered every 4 weeks subcutaneously
Investigational medicinal product code	
Other name	Tezepelumab
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

210 mg Q4W

Arm title	Placebo
------------------	---------

Statistical analyses

No statistical analyses for this end point

Secondary: Immunogenicity of tezepelumab

End point title	Immunogenicity of tezepelumab
-----------------	-------------------------------

End point description:

Anti-drug antibodies (ADA) responses at baseline and post baseline. Persistently positive is defined as positive at ≥ 2 post baseline assessments (with ≥ 16 weeks between the first and the last positive) or positive at last post baseline assessment. Transiently positive is defined as having at least one post baseline ADA positive assessment and not fulfilling the conditions of persistently positive. Treatment boosted ADA defined as baseline positive ADA that was boosted to a 4 fold or higher level following treatment. Treatment emergent ADA defined as sum of treatment induced ADA and treatment boosted ADA.

End point type	Secondary

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
21 November 2017	Inclusion of St George's Respiratory Questionnaire, clarifications on outcomes of secondary endpoints, amended inclusion/exclusion criteria, changes to concomitant medication
16 March 2018	Change in collection times of SNOT-22, added details regarding enrolment in separate extension study, clarification on adjudication committee, amended inclusion/exclusion criteria, clarification on concomitant/prohibited medication
15 April 2019	Neutralizing antibodies moved to exploratory endpoint, additional of baseline eosinophils <300/uL subgroup into the confirmatory hierarchical testing strategy, revised inclusion/exclusion criteria, clarification on dose preparation/administration, clarification on laboratories requiring treatment information for sample analyses, addition of a primary database lock, clarification on procedures for discontinuation of IP,
14 May 2020	Added appendix with guidance for changes related to the COVID-19 pandemic, clarification on subjects enrolling into long term extension study can continue with follow-up visits until an on-site visit is possible, clarification on schedule of assessments due to the COVID-19 pandemic, secondary endpoint proportion of subjects with ≥ 1 asthma exacerbation updated to proportion of subjects who did not experience an asthma exacerbation, clarification that pulmonology, cardiology, neurology and oncology specialists will form part of the independent adjudication committee, safety reporting period updated from post-treatment to on-study.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
