### Paediatric regulatory details

|  |    |
|--|----|
| Is trial part of an agreed paediatric investigation plan (PIP)       | No |
| Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial? | No |
| Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial? | No |

Notes:

## Results analysis stage

|  |                 |
|--|-----------------|
| Analysis stage                                       | Final           |
| Date of interim/final analysis                       | 03 October 2020 |
| Is this the analysis of the primary completion data? | No              |
| Global end of trial reached?                         | Yes             |
| Global end of trial date                             | 03 October 2020 |
| Was the trial ended prematurely?                     | No              |

Notes:

## General information about the trial

Main objective of the trial:

The purpose of this study is to evaluate the efficacy and safety of prexasertib in women with platinum-resistant or refractory recurrent ovarian cancer.

Protection of trial subjects:

This study was conducted in accordance with International Conference on Harmonization (ICH) Good Clinical Practice, and the principles of the Declaration of Helsinki, in addition to following the laws and regulations of the country or countries in which a study is conducted.

Background therapy: -

Evidence for comparator: -

|   |               |
|---|---------------|
| Actual start date of recruitment                          | 10 April 2018 |
| Long term follow-up planned                               | No            |
| Independent data monitoring committee (IDMC) involvement? | No            |

Notes:

## Population of trial subjects

### Subjects enrolled per country

|                                      |                        |
|--------------------------------------|------------------------|
| Country: Number of subjects enrolled | Korea, Republic of: 13 |
| Country: Number of subjects enrolled | Belgium: 8             |
| Country: Number of subjects enrolled | United States: 32      |
| Country: Number of subjects enrolled | United Kingdom: 20     |
| Country: Number of subjects enrolled | Italy: 23              |
| Country: Number of subjects enrolled | Israel: 20             |
| Country: Number of subjects enrolled | Australia: 34          |
| Country: Number of subjects enrolled | Spain: 19              |
| Worldwide total number of subjects   | 169                    |
| EEA total number of subjects         | 50                     |

Notes:

### Subjects enrolled per age group

|   |   |
|---|---|
| In utero                                  | 0 |
| Preterm newborn - gestational age < 37 wk | 0 |
| Newborns (0-27 days)                      | 0 |
| Infants and toddlers (28 days-23 months)  | 0 |

|                           |     |
|---------------------------|-----|
| Children (2-11 years)     | 0   |
| Adolescents (12-17 years) | 0   |
| Adults (18-64 years)      | 169 |
| From 65 to 84 years       | 0   |
| 85 years and over         | 0   |

## Subject disposition

### Recruitment

Recruitment details:

Completers included participants who died from any cause and participants who were alive and on study (either on study treatment or in long term follow-up) at study conclusion.

### Pre-assignment

Screening details:

Only 169 participants were assigned to one of the 4 cohorts in this study. Data is not available for 3 participants who discontinued before the start of the treatment.

### Period 1

|                              |                                |
|------------------------------|--------------------------------|
| Period 1 title               | Overall Study (overall period) |
| Is this the baseline period? | Yes                            |
| Allocation method            | Non-randomised - controlled    |
| Blinding used                | Not blinded                    |

### Arms

|                              |                      |
|------------------------------|----------------------|
| Are arms mutually exclusive? | Yes                  |
| <b>Arm title</b>             | Prexasertib Cohort 1 |

Arm description:

Participants received 105 milligram per square meter (mg/m<sup>2</sup>) prexasertib as an approximately 60 (+10) minute IV infusion on Day 1 and 15 of a 28-day cycle. Participants were with platinum-resistant disease, breast cancer susceptibility gene (BRCA) negative and have received  $\geq 3$  lines of prior therapy.

|  |                 |
|--|-----------------|
| Arm type                               | Experimental    |
| Investigational medicinal product name | Prexasertib     |
| Investigational medicinal product code |                 |
| Other name                             | LY2606368       |
| Pharmaceutical forms                   | Infusion        |
| Routes of administration               | Intravenous use |

Dosage and administration details:

Participants received 105 mg/m<sup>2</sup> prexasertib as an IV infusion.

|                  |                      |
|------------------|----------------------|
| <b>Arm title</b> | Prexasertib Cohort 2 |
|------------------|----------------------|

Arm description:

Participants received 105 mg/m<sup>2</sup> prexasertib as an approximately 60 (+10) minute IV infusion on Day 1 and 15 of a 28-day cycle. Participants were with platinum-resistant disease, BRCA negative and have received  $< 3$  lines of prior therapy.

|  |                 |

| Subject analysis set type  | Per protocol         |
| Subject analysis set description:<br>Participants received 105 mg/m <sup>2</sup> prexasertib as an approximately 60 (+10) minute IV infusion on Day 1 and 15 of a 28-day cycle. (Participants combined from all the Cohorts 1 to 4)  |                      |

### Primary: Percentage of Participants Who Achieve Complete Response (CR) or Partial Response (PR): Overall Response Rate (ORR)

|  |  |
|--|--|
| End point title  | Percentage of Participants Who Achieve Complete Response (CR) or Partial Response (PR): Overall Response Rate (ORR) <sup>[1]</sup> |
| End point description:<br>Overall response rate is the best response of complete response (CR) or partial response (PR) as classified by the independent central review according to the Response Evaluation Criteria In Solid Tumors (RECIST v1.1). CR is a disappearance of all target and non-target lesions and normalization of tumor marker level. PR is an at least 30% decrease in the sum of the diameters of target lesions (taking as reference the baseline sum diameter) without progression of non-target lesions or appearance of new lesions. Overall response rate is calculated as a total number of participants with CR or PR divided by the total number of participants per cohort with at least 1 measurable lesion, multiplied by 100.<br>Analysis Population Description (APD): All randomized participants who received at least one dose of study drug. |  |
| End point type   | Primary  |
| End point timeframe:<br>Baseline through Disease Progression (Up to 6 months)  |  |

## Secondary: Disease Control Rate (DCR): Percentage of Participants with a Best Overall Response of CR, PR, or Stable Disease (SD) for at Least 4 Months

|                 |  |
|-----------------|--|
| End point title | Disease Control Rate (DCR): Percentage of Participants with a Best Overall Response of CR, PR, or Stable Disease (SD) for at |
|-----------------|--|

## End point description:

DCR is defined as the number of participants who achieve a best overall response of CR, PR or SD for  $\geq 4$  months as determined by per RECIST version 1.1. CR is the disappearance of all target and non-target lesions; PR is a  $\geq 30\%$  decrease in sum of longest diameter of target lesions without new lesion and progression of non-target lesion; SD is neither sufficient shrinkage to qualify for PR nor sufficient increase to qualify for progressive disease. Disease control rate is calculated as a total number of participants with CR or PR or SD divided by the total number of participants treated, then multiplied by 100.

APD: All randomized participants who received at least one dose of study drug.

## Statistical analyses

No statistical analyses for this end point

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Baseline, upto 26 Months

Adverse event reporting additional description:

All randomized participants who received at least one dose.

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

| Date         | Amendment  |
|--------------|--|
| 28 June 2018 | 1) A criterion explicitly excluding patients that have known factors that may increase the risk of infection while on study drug treatment was added.<br>2) A statement indicating that strong P-gp and BRCP inhibitors should be used with caution was added. |

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
