Notes:

General information about the trial

Main objective of the trial:

To demonstrate Pharmacokinetic (PK) bioequivalence of 20 mg ofatumumab injected by the pre-filled syringe (PFS) or autoinjector devices (AI)

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial

Anti-drug antibodies (ADA) were assessed to evaluate the immunogenicity potential of ofatumumab. Samples for ADA assessment were taken prior to dosing at the visit. Samples were analyzed as per laboratory's SOPs by a Meso Scale Discovery (MSD) electrochemiluminescence assay. All samples confirmed to be positive for the presence of anti-ofatumumab antibodies were assessed to evaluate their ability to neutralize the ofatumumab biologic effect.
