

Clinical trial results:

A Phase 3, double-blind, multicenter, placebo-controlled study of PledOx used on top of modified FOLFOX6 (5-FU/FA and Oxaliplatin) to prevent chemotherapy induced peripheral neuropathy (CIPN) in the adjuvant treatment of patients with Stage III or high-risk Stage II colorectal cancer

Summary

EudraCT number	2017-004707-43

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	11 December 2020
Is this the analysis of the primary completion data?	Yes
Primary completion date	31 August 2020
Global end of trial reached?	Yes
Global end of trial date	31 August 2020
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

To compare PledOx (5 µmol/kg) vs placebo with respect to the proportion of subjects with moderate or severe chronic CIPN

Protection of trial subjects:

The study was conducted in accordance with the Declaration of Helsinki, Good Clinical Practice (GCP) guidelines and local law requirements. An independent Data Monitoring Committee monitored accumulating safety, efficacy and other types of data throughout the study.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	07 January 2019
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 64
Country: Number of subjects enrolled	United Kingdom: 12
Country: Number of subjects enrolled	Belgium: 45
Country: Number of subjects enrolled	Czechia: 19
Country: Number of subjects enrolled	France: 28
Country: Number of subjects enrolled	Germany: 9
Country: Number of subjects enrolled	Italy: 39
Country: Number of subjects enrolled	Japan: 53
Country: Number of subjects enrolled	Korea, Republic of: 26
Country: Number of subjects enrolled	Taiwan: 6
Worldwide total number of subjects	301
EEA total number of subjects	204

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0

Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	150
From 65 to 84 years	150
85 years and over	1

Subject disposition

Recruitment

Recruitment details:

Patients were recruited in the EU and Asia between 2018 and 1 March 2020.

Pre-assignment

Screening details:

371 subjects were screened in the 28 days before the start of treatment, 301 were randomised and 297 were treated. The study was prematurely terminated and enrolled patients were followed until the data cut-off date of 31 August 2020; these patients have been assigned as "completed" in the disposition.

Period 1

Period 1 title	Randomised subjects
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	PledOx (5 µmol/kg)

Arm description:

Calmangafodipir [PledOx] (5 µmol/kg) on day 1 every 2 weeks to subjects as an intravenous infusion, combined with mFOLFOX6 chemotherapy.

Arm type	Experimental
Investigational medicinal product name	Calmangafodipir (5 µmol/kg)
Investigational medicinal product code	
Other name	PledOx
Pharmaceutical forms	Solution for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

PledOx 5 µmol/kg + mFOLFOX6 chemotherapy administered every 2 weeks (±2 days) for 12 cycles

Arm title	Placebo
------------------	---------

Arm description:

Placebo on day 1 every 2 weeks to subjects as an intravenous infusion, combined with mFOLFOX6 chemotherapy.

Arm type	Placebo
Investigational medicinal product name	Sodium Chloride 0.9%
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Placebo + mFOLFOX6 chemotherapy administered every 2 weeks (±2 days) for 12 cycles

Number of subjects in period 1	PledOx (5 µmol/kg)	Placebo
Started	151	150
Completed	147	150
Not completed	4	0
Consent withdrawn by subject	3	-
Unknown	1	-

Period 2

Period 2 title	Subjects treated
Is this the baseline period?	Yes ^[1]
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	PledOx (5 µmol/kg)

Arm description:

Calmangafodipir [PledOx] (5 µmol/kg) on day 1 every 2 weeks to subjects as an intravenous infusion, combined with mFOLFOX6 chemotherapy.

Arm type	Experimental
Investigational medicinal product name	Calmangafodipir (5 µmol/kg)
Investigational medicinal product code	
Other name	PledOx
Pharmaceutical forms	Solution for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

PledOx 5 µmol/kg + mFOLFOX6 chemotherapy administered every 2 weeks (±2 days) for 12 cycles

Arm title	Placebo
------------------	---------

Arm description:

Placebo on day 1 every 2 weeks to subjects as an intravenous infusion, combined with mFOLFOX6 chemotherapy.

Arm type	Placebo
Investigational medicinal product name	Sodium Chloride 0.9%
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Placebo + mFOLFOX6 chemotherapy administered every 2 weeks (±2 days) for 12 cycles

Notes:

[1] - Period 1 is not the baseline period. It is expected that period 1 will be the baseline period.

Justification: There were four subjects randomised who were not treated. The baseline period represents subjects who were treated and the baseline data are presented for the subjects treated.

Number of subjects in period 2^[2]	PledOx (5 µmol/kg)	Placebo
Started	147	150
Completed	117	115
Not completed	30	35
Physician decision	1	-
Consent withdrawn by subject	9	11
Study terminated by Sponsor	10	17
Adverse event, non-fatal	2	-
Death	1	1
Unknown	1	-
Lost to follow-up	1	-
Progressive disease	1	-
Site terminated by Sponsor	4	5
Protocol deviation	-	1

Notes:

[2] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: There were four subjects randomised who were not treated. The baseline period represents subjects who were treated and the baseline data are presented for the subjects treated..

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
20 June 2018	<ul style="list-style-type: none"> Updated text to include Asian centers in the study Included input from Competent Authorities into the protocol text Updated information on the use of background therapy
27 September 2018	<ul style="list-style-type: none"> Included input from the United States Food and Drug Administration (FDA) Updated background information
12 July 2019	<ul style="list-style-type: none"> Updated exclusion criteria to add exception for hepatitis B virus (HBV) infection Clarified study procedures and timing in relation to assessments during Screening, Treatment, and Follow-up Phases Clarified blinding procedures, Investigational Medicinal Product (IMP) storage requirements, and IMP destruction guide Specified that adverse events will be collected after signing the informed consent form
09 January 2020	<ul style="list-style-type: none"> Updated exclusion criteria to exclude subjects with any history of seizures Updated infusion duration for PledOx/Placebo Updated potential risks according to recently reported serious adverse events (SAEs) Clarified IDMC review requirement for adverse events/SAEs of seizures, anaphylactoid reactions, and allergic infusion reaction Clarified stopping criteria for subjects with seizures Added details for pre-medications before PledOx/placebo infusion Clarified procedures to be followed in case a death is an outcome of an event Clarified PledOx-related adverse events Specified the situations that trigger a brain magnetic resonance imaging (MRI) investigation and a neurological examination Updated the flow chart of monitoring increased manganese level and/or Parkinson-like symptoms
15 May 2020	<p>To update the protocol regarding the decision to prematurely terminate the study as well as to include changes resulting from the COVID 19 pandemic and associated site/country restrictions.</p> <ul style="list-style-type: none"> Updated study duration with implementation of an estimated data cut-off date by 30 Sep 2020 Discontinuation of IMP, screening and randomisation of patients, PK assessments, ECG measurements, and serum β-HCG pregnancy tests Discontinuation of blood manganese samples with the exception of patients with Parkinson-like symptoms Continuation of study visits as originally planned but without dosing of IMP Collection of AEs and concomitant medications up to 30 days after the end of treatment visit and until resolution Collection of overall survival data until the estimated data cut-off date by 30 Sep 2020 Added an option for remote data collection during the COVID-19 pandemic for some assessments, according to local requirements Amended statistical section, making reference to updated statistical analysis plan

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
01 March 2020	On 01 March 2020, the Sponsor decided to place recruitment and dosing of subjects in the POLAR program on hold. The decision followed interactions with the French regulatory authority, ANSM and the US clinical hold of another study (POLAR-M) on 23 January 2020. As of 02 March 2020, no investigational medicinal product (IMP) was administered and no more subjects were enrolled. Enrolled subjects continued to be followed until the data cut-off date of 31 August 2020.	-
