Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	11 July 2019
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	11 July 2019
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

The main objective of this trial is to evaluate the efficacy, safety, and tolerability of 225 milligrams (mg) and 450 milligrams (mg) of Rapastinel, compared to placebo in participants with major depressive disorder (MDD).

Protection of trial subjects:

All study participants were required to read and sign an Informed Consent Form.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	30 October 2018
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Japan: 24
Country: Number of subjects enrolled	Poland: 1
Country: Number of subjects enrolled	Russian Federation: 3
Country: Number of subjects enrolled	Slovakia: 7
Country: Number of subjects enrolled	Hungary: 15
Worldwide total number of subjects	50
EEA total number of subjects	23

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	49

From 65 to 84 years	1
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

A total of 68 participants were screened for eligibility; 50 participants randomized to receive double-blind treatment.

Period 1

Period 1 title	Double Blind Treatment Period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Data analyst, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Placebo (prefilled syringe, weekly IV administration).

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

Intravenous IV administration

Arm title	Rapastinel 225mg
------------------	------------------

Arm description:

Rapastinel (prefilled syringe, weekly intravenous IV administration).

Arm type	Experimental
Investigational medicinal product name	Rapastinel
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

Rapastinel intravenous IV administration

Arm title	Rapastinel 450mg
------------------	------------------

Arm description:

Rapastinel (prefilled syringe, weekly intravenous IV administration).

Arm type	Experimental
Investigational medicinal product name	Rapastinel
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

Rapastinel intravenous IV administration

Number of subjects in period 1	Placebo	Rapastinel 225mg	Rapastinel 450mg
Started	15	17	18
Completed	9	11	10
Not completed	6	6	8
Study Terminated by Sponsor	5	6	8
Lack of efficacy	1	-	-

Period 2

Period 2 title	Safety Follow-Up Period
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Data analyst, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Placebo (prefilled syringe, weekly IV administration).

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

Intravenous IV administration

Arm title	Rapastinel 225mg
------------------	------------------

Arm description:

Rapastinel (prefilled syringe, weekly intravenous IV administration).

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Rapastinel
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

Rapastinel intravenous IV administration

Arm title	Rapastinel 450mg
------------------	------------------

Arm description:

Rapastinel (prefilled syringe, weekly intravenous IV administration).

Arm type	Experimental
Investigational medicinal product name	Rapastinel
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

Rapastinel intravenous IV administration

Number of subjects in period 2^[1]	Placebo	Rapastinel 225mg	Rapastinel 450mg
Started	6	8	7
Completed	6	8	7

Notes:

[1] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: Nine patients who entered the extension study (RAP-MD-33) did not enter the Safety Follow Up Period.

Race/Ethnicity, Customized Units: Subjects			
White	7	10	9
Black or African American	0	0	0
Asian	8	7	9
Hispanic	0	0	0
Montgomery-Asberg Depression Rating Scale (MADRS)			
The MADRS is a clinician-rated scale to assess depressive symptomatology during the preceding week. Participants are rated on 10 items (feelings of sadness, lassitude, pessimism, inner tension, suicidality, reduced sleep or appetite, difficulty concentrating, and a lack of interest) each on a 7-point scale from 0 (no symptoms) to 6 (symptoms of maximum severity). The total score ranges from 0 to 60 with a higher score indicating more depression. A negative change score indicates improvement.			
Units: Score on a Scale

Adverse events

Adverse events information

Timeframe for reporting adverse events:

The study consisted of a 6 week double-blind treatment period, followed by a 2-week safety follow-up period.

Adverse event reporting additional description:

Safety Population consisted of all randomized patients who received at least 1 dose of randomized investigational product (IP).

Assessment type	Systematic

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Due to study termination, the target number of participants needed to achieve target power and statistically reliable results was not met.
