

Clinical trial results:

A pilot study to assess the safety, tolerability, dose finding and efficacy ORY-1001 in combination with platinum-etoposide chemotherapy in patients with relapsed, extensive-stage disease small cell lung cancer
Summary

EudraCT number	2018-000469-35
Trial protocol	ES
Global end of trial date	11 September 2020

Results information

Result version number	v1 (current)

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	15 March 2023
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	11 September 2020
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

To determine the maximum tolerated dose (MTD), schedule and recommended Phase II dose (RP2D) of ORY-1001 in combination with platinum-etoposide based chemotherapy (EP) in patients with relapsed, extensive-stage disease small cell lung cancer (ED SCLC). This will include characterization of ORY-1001 dose-limiting toxicities (DLTs) and overall safety profile in this population.

Protection of trial subjects:

In accordance with European Union RGPD 2016/679 of 27 April, 2016 the data were processed in accordance with the specifications outlined by the local law to ensure that requirements regarding personal data protection are met. If an external organization processed data on behalf of Oryzon, a contractual procedure was signed between Oryzon and the external organization to ensure compliance with the above-mentioned legislation. If applicable, the participation of patients in this study was reported to the appropriate local data protection agencies, in accordance with European Union RGPD 2016/679 of 27 April 2016 and Country-specific guidelines and laws (Spanish Organic Law 3/2018 of 5 December).

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	27 December 2018
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 14
Worldwide total number of subjects	14
EEA total number of subjects	14

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0

Adults (18-64 years)	6
From 65 to 84 years	8
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

A total of 17 subjects were screened to obtain a total of 14 enrolled patients. Patients were assigned to any of the Cohorts by the Sponsor and the Medical Monitor according to the available data and the recruitment rate.

Pre-assignment

Screening details:

ICF for pre-screening specific procedures was obtained in order to confirm tumor biomarkers. If biomarkers positive an ICF was obtained before starting the study procedures.

A total of 17 patients signed informed consent. Three patients were screening failures and therefore only 14 patients were accrued in the study and started treatment.

Period 1

Period 1 title	Part 1 or dose-finding stage (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	1st TREATMENT SCHEME

Arm description:

Dose iadademstat = 60 µg/m²/d. For 4-6 cycles: first week etoposide/platinum + iadademstat; second and third week iadademstat.

Arm type	Experimental
Investigational medicinal product name	Iadademstat
Investigational medicinal product code	ORY-1001
Other name	
Pharmaceutical forms	Oral solution in single-dose container
Routes of administration	Oral use

Dosage and administration details:

Dose iadademstat = 60 µg/m²/d. For 4-6 cycles: first week etoposide/platinum + iadademstat; second and third week iadademstat.

Investigational medicinal product name	Etoposide/platinum
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Infusion
Routes of administration	Infusion

Dosage and administration details:

Platinum-etoposide was given per the SmPC

Arm title	Cohort A
------------------	----------

Arm description:

Dose iadademstat = 60 µg/m²/d. Dosing Scheme #1

Arm type	Experimental
Investigational medicinal product name	Iadademstat
Investigational medicinal product code	ORY-1001
Other name	
Pharmaceutical forms	Oral solution in single-dose container
Routes of administration	Oral use

Dosage and administration details:

Dose iadademstat = 60 µg/m²/d at second and third cycle week.

Investigational medicinal product name	Etoposide/platinum
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Infusion
Routes of administration	Infusion
Dosage and administration details:	
Platinum-etoposide was given per the SmPC	
Arm title	Cohort B
Arm description:	
Dose iadademstat = 60 µg/m2/d. Dosing Scheme #2	
Arm type	Experimental
Investigational medicinal product name	Iadademstat
Investigational medicinal product code	ORY-1001
Other name	
Pharmaceutical forms	Oral solution in single-dose container
Routes of administration	Oral use
Dosage and administration details:	
Dose iadademstat = 60 µg/m2/d. For 4-6 cycles: first week etoposide/platinum + iadademstat; first and third cycle week	
Investigational medicinal product name	Etoposide/platinum
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Infusion
Routes of administration	Infusion
Dosage and administration details:	
Platinum-etoposide was given per the SmPC	
Arm title	Cohort C
Arm description:	
Dose iadademstat = 45 µg/m2/d. Dosing Scheme #3	
Arm type	Experimental
Investigational medicinal product name	Iadademstat
Investigational medicinal product code	ORY-1001
Other name	
Pharmaceutical forms	Oral solution in single-dose container
Routes of administration	Oral use
Dosage and administration details:	
Dose iadademstat = 45 µg/m2/d	
Investigational medicinal product name	Etoposide/platinum
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Infusion
Routes of administration	Infusion
Dosage and administration details:	
Platinum-etoposide was given per the SmPC	
Arm title	Cohort D
Arm description:	
Dose iadademstat = 60 µg/m2/d. Dosing Scheme #4	
Arm type	Experimental

Investigational medicinal product name	Iadademstat
Investigational medicinal product code	ORY-1001
Other name	
Pharmaceutical forms	Oral solution in single-dose container
Routes of administration	Oral use
Dosage and administration details:	
Dose iadademstat = 60 µg/m ² /d. For 4-6 cycles: Three weeks treatment.	
Investigational medicinal product name	Etoposide/platinum
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Infusion
Routes of administration	Infusion
Dosage and administration details:	
Third week etoposide/platinum. Platinum-etoposide was given per the SmPC	
Arm title	Cohort E
Arm description:	
Dose iadademstat = 60 µg/m ² /d. Dosing Scheme #5	
Arm type	Experimental
Investigational medicinal product name	Iadademstat
Investigational medicinal product code	ORY-1001
Other name	
Pharmaceutical forms	Oral solution in single-dose container
Routes of administration	Oral use
Dosage and administration details:	
From cycle 2 to 4 or 6: first week with etoposide/platinum and G-CSF administered on days 4, 5 and 6, starting the first dose at least 24 hours after the last dose of etoposide; second week iadademstat; no treatment in third week.	
Investigational medicinal product name	Etoposide/platinum
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Infusion
Routes of administration	Infusion
Dosage and administration details:	
Platinum-etoposide was given per the SmPC
