EudraCT Team  
European Medicines Agency

SUBJECT: Unavailability of results for Study CHF201701 - EudraCT number 2018-000486-37

To Whom It May Concern:

Results are not yet available for Study CHF 201701 sponsored by Heart Initiative (STRONG-HF: Safety, Tolerability and efficacy of Rapid Optimization, helped by NT-proBNP testing, of Heart Failure therapies). As of June 28, 2022, a total of 1030 patients have been randomized.

The estimated date of randomization of the last of the 1800 patients is December 31, 2022. The last patient's last visit is thus projected to occur on June 30, 2023 (the projected global end of trial date).

Kind regards,

Beth Davison, PhD  
President
