Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	21 October 2021
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	15 February 2021
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

PRO-MSACTIVE is an open label, single-arm phase IV study evaluating the efficacy, safety and impact of ocrelizumab on patient reported outcomes (PROs) in patients with active relapsing multiple sclerosis (RMS).

The objective of the study was to investigate the impact of ocrelizumab on disease activity in active RMS patients according to Lublin's definition of activity (clinical and/or imaging features). Different PRO questionnaires were also evaluated in the PRO-MSACTIVE study to better understand the impact of disease on symptom severity, fatigue, health-related quality of life, work productivity and treatment satisfaction in patients with active RMS.

Participants received a maximum of 2 treatment doses of ocrelizumab: an initial dose of two 300 milligram (mg) infusions separated by 14 days, followed by one single 600 mg infusion 24 weeks after the first infusion.

Protection of trial subjects:

This study was conducted in accordance with the protocol and with the following: - Consensus ethical principles derived from international guidelines including the Declaration of Helsinki and Council for International Organizations of Medical Sciences (CIOMS) International Ethical Guidelines - Applicable ICH Good Clinical Practice (GCP) Guidelines - Applicable laws and regulations

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	08 September 2018
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	France: 422
Worldwide total number of subjects	422
EEA total number of subjects	422

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23	0

months)	
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	415
From 65 to 84 years	7
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

This study included adult patients (age ≥ 18 years) with active RMS (RRMS or SPMS) defined by clinical or imaging features and who might have received prior Disease-Modifying Treatment(s) (DMT).

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Active Relapsing Multiple Sclerosis (RMS)

Arm description:

Each participant received an initial dose of two 300 mg infusions of Ocrelizumab each separated by 14 days followed by one single dose of 600 mg 24 weeks after the initial dose.

Arm type	Experimental
Investigational medicinal product name	Ocrelizumab
Investigational medicinal product code	
Other name	RO4964913
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Two infusions of 300 mg administered 14 days apart.

A single infusion of 600 mg administered 24 weeks after the initial dose.

Arm title	Active Secondary Progressive Multiple Sclerosis (SPMS)
------------------	--

Arm description:

Each participant received an initial dose of two 300 mg infusions of Ocrelizumab each separated by 14 days followed by one single dose of 600 mg 24 weeks after the initial dose.

Arm type	Experimental
Investigational medicinal product name	Ocrelizumab
Investigational medicinal product code	
Other name	RO4964913
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Two infusions of 300 mg administered 14 days apart.

A single infusion of 600 mg administered 24 weeks after the initial dose.

Number of subjects in period 1	Active Relapsing Multiple Sclerosis (RMS)	Active Secondary Progressive Multiple Sclerosis (SPMS)
Started	376	46
Completed	343	41
Not completed	33	5
Consent withdrawn by subject	7	2
Physician decision	1	-
Adverse event, non-fatal	4	-
Pregnancy	2	-
Desire for pregnancy	14	1
Lost to follow-up	5	2

Baseline characteristics

Reporting groups

Reporting group title	Active Relapsing Multiple Sclerosis (RMS)
-----------------------	---

Subject analysis set type	Intention-to-treat
Subject analysis set description: Each participant received an initial dose of two 300 mg infusions of Ocrelizumab each separated by 14 days followed by one single dose of 600 mg 24 weeks after the initial dose.	

Primary: Percentage of participants free of disease activity

End point title	Percentage of participants free of disease activity ^[1]
End point description: This outcome measure evaluates the impact of ocrelizumab on disease activity in participants with active Relapsing Multiple Sclerosis (RMS). Freedom of disease activity is defined as participant without any relapse from enrollment to Week 48 and without T1 Gadolinium-enhancing lesion detected by brain MRI at Week 48 and without any new and/or enlarging T2 lesion detected by brain MRI at Week 48.	
End point type	Primary
End point timeframe: From Enrollment to Week 48	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Statistician analysis details:

Analysis description: Evaluate the impact of ocrelizumab on disease activity at W48

Analysis type: Descriptive

Statistical test of hypothesis:

Not Applicable (no comparison)

Parameter estimate:

Parameter type: Proportion of patients free of disease activity

End point values	Active Relapsing Multiple Sclerosis (RMS)	Active Secondary Progressive Multiple Sclerosis (SPMS)		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	376	46		
Units: Percentage of participants				
number (confidence interval 95%)				
Free of disease activity	62.2 (57.1 to 67.2)	71.7 (56.5 to 84.0)		
Presence of disease activity	37.8 (32.8 to 42.9)	28.3 (16.0 to 43.5)		

Statistical analyses

No statistical analyses for this end point

Secondary: Annualized relapse rate

End point title	Annualized relapse rate
End point description:	
Annualized relapse rate is defined as the total number of clinical relapses divided by the number of participant-years of study treatment exposure. This outcome measure describes the efficacy of ocrelizumab in active RMS participants.	
End point type	Secondary
End point timeframe:	
At Week 48	

End point values	Active Relapsing Multiple Sclerosis (RMS)	Active Secondary Progressive Multiple Sclerosis (SPMS)		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	376	46		
Units: Rate				
number (confidence interval 95%)				
Adjusted annualized relapse rate at W48	0.1503 (0.1089 to 0.2075)	0.0918 (0.0307 to 0.2742)		

Statistical analyses

No statistical analyses for this end point

Secondary: Percentage of participants with stable, improved, or worsened expanded disability status scale (EDSS)

End point title	Percentage of participants with stable, improved, or worsened expanded disability status scale (EDSS)
End point description: This outcome measure describes the efficacy of ocrelizumab in active RMS participants. Improvement: change <-0.5; stability: change within the range of [-0.5 ; +0.5]; worsening: change >+0.5	
End point type	Secondary
End point timeframe: From Enrollment to Week 48

Secondary: Change from baseline in the score of EuroQol 5-Dimension Questionnaire (EQ-5D-5L with Visual Analogue Scale (VAS)) for health-related quality of life

End point title	Change from baseline in the score of EuroQol 5-Dimension Questionnaire (EQ-5D-5L with Visual Analogue Scale (VAS)) for health-related quality of life
-----------------	---

End point description:

EQ-5D-5L comprise 5 dimensions which are evaluated on 5 grading levels. The VAS (Visual Analogue Scale) is used to assess the patient's health state. It provides the utility score based on the preferences of the general French population. The range for Health State Score is 0 (the worst health you can imagine) to 100 (the best health you can imagine). The range for utility score, based on the French value, is -0,530 to 1.

Reporting groups

Reporting group title	Ocrelizumab
-----------------------	-------------

Reporting group description:

Each participant received an initial dose of two 300 mg infusions of Ocrelizumab each separated by 14 days followed by one single dose of 600 mg 24 weeks after the initial dose.

Serious adverse events	Ocrelizumab		
Total subjects affected by serious adverse events			
subjects affected / exposed	36 / 422 (8.53%)		
number of deaths (all causes)	0		
number of deaths resulting from adverse events	0		
Neoplasms benign, malignant and unspecified (incl cysts and polyps)			
GLIOBLASTOMA			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
MALIGNANT MELANOMA			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Vascular disorders			
PHLEBITIS			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Pregnancy, puerperium and perinatal conditions			
ECTOPIC PREGNANCY			

subjects affected / exposed	3 / 422 (0.71%)		
occurrences causally related to treatment / all	0 / 3		
deaths causally related to treatment / all	0 / 0		
General disorders and administration site conditions			
CHEST PAIN			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
FATIGUE			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
GAIT DISTURBANCE			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Reproductive system and breast disorders			
OVARIAN CYST			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Respiratory, thoracic and mediastinal disorders			
PNEUMONITIS			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Psychiatric disorders			
ALCOHOL WITHDRAWAL SYNDROME			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
ANXIETY			

subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
HALLUCINATION			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
PSYCHOTIC BEHAVIOUR			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
SUICIDAL IDEATION			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Injury, poisoning and procedural complications			
INFUSION RELATED REACTION			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
POST LUMBAR PUNCTURE SYNDROME			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
HEAD INJURY			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
FEMORAL NECK FRACTURE			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
FALL			

subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
EXTRADURAL HAEMATOMA			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
SPINAL FRACTURE			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
TOXICITY TO VARIOUS AGENTS			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
TIBIA FRACTURE			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Nervous system disorders			
CEREBROVASCULAR ACCIDENT			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	1 / 1		
deaths causally related to treatment / all	0 / 0		
MULTIPLE SCLEROSIS RELAPS			
subjects affected / exposed	2 / 422 (0.47%)		
occurrences causally related to treatment / all	2 / 2		
deaths causally related to treatment / all	0 / 0		
MENINGISM			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	1 / 1		
deaths causally related to treatment / all	0 / 0		
CEREBRAL HAEMORRHAGE			

subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
HEADACHE			
subjects affected / exposed	2 / 422 (0.47%)		
occurrences causally related to treatment / all	0 / 2		
deaths causally related to treatment / all	0 / 0		
DIZZINESS			
subjects affected / exposed	2 / 422 (0.47%)		
occurrences causally related to treatment / all	0 / 2		
deaths causally related to treatment / all	0 / 0		
EPILEPSY			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Blood and lymphatic system disorders			
FEBRILE NEUTROPENIA			
subjects affected / exposed	2 / 422 (0.47%)		
occurrences causally related to treatment / all	2 / 2		
deaths causally related to treatment / all	0 / 0		
NEUTROPENIA			
subjects affected / exposed	3 / 422 (0.71%)		
occurrences causally related to treatment / all	3 / 3		
deaths causally related to treatment / all	0 / 0		
Ear and labyrinth disorders			
VERTIGO			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
HYPOACUSIS			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
EXTERNAL EAR INFLAMMATION			

subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Hepatobiliary disorders			
DRUG-INDUCED LIVER INJURY			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Skin and subcutaneous tissue disorders			
FACIAL CELLULITIS			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	1 / 1		
deaths causally related to treatment / all	0 / 0		
PEAU D'ORANGE			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Renal and urinary disorders			
CALCULUS BLADDER			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Musculoskeletal and connective tissue disorders			
NECK PAIN			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Infections and infestations			
PYELONEPHRITIS			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	1 / 1		
deaths causally related to treatment / all	0 / 0		
INFLUENZA			

subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	1 / 1		
deaths causally related to treatment / all	0 / 0		
COVID-19 PNEUMONIA			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	1 / 1		
deaths causally related to treatment / all	0 / 0		
URINARY TRACT INFECTION			
subjects affected / exposed	2 / 422 (0.47%)		
occurrences causally related to treatment / all	0 / 3		
deaths causally related to treatment / all	0 / 0		
PYELONEPHRITIS ACUTE			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Metabolism and nutrition disorders			
HYPOCALCAEMIA			
subjects affected / exposed	1 / 422 (0.24%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		

Frequency threshold for reporting non-serious adverse events: 5 %

Non-serious adverse events	Ocrelizumab		
Total subjects affected by non-serious adverse events			
subjects affected / exposed	337 / 422 (79.86%)		
Injury, poisoning and procedural complications			
INFUSION RELATED REACTION			
subjects affected / exposed	206 / 422 (48.82%)		
occurrences (all)	332		
Nervous system disorders			
HEADACHE			
subjects affected / exposed	62 / 422 (14.69%)		
occurrences (all)	88		
General disorders and administration			

site conditions ASTHENIA subjects affected / exposed occurrences (all) FATIGUE subjects affected / exposed occurrences (all)	37 / 422 (8.77%) 40 25 / 422 (5.92%) 29		
Gastrointestinal disorders DIARRHOEA subjects affected / exposed occurrences (all)	21 / 422 (4.98%) 26		
Musculoskeletal and connective tissue disorders ARTHRALGIA subjects affected / exposed occurrences (all)	21 / 422 (4.98%) 24		
Infections and infestations URINARY TRACT INFECTION subjects affected / exposed occurrences (all) NASOPHARYNGITIS subjects affected / exposed occurrences (all)	42 / 422 (9.95%) 54 48 / 422 (11.37%) 60		

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
14 May 2019	Number of participant centers (n=50) Study duration (30 months) Definition of active MS (inclusion criterion) Exclusion criteria (current active infection, elimination procedure of teriflunomide, wash out period only for previous DMTs) Time intervals between ocrelizumab infusion Data collected on previous DMTs Definition of hospitalizations not considered as SAEs Pharmacovigilant contact details
22 August 2019	Time intervals between ocrelizumab infusion and pregnancy test (infusion visits: the day of infusion; non-infusion visits: within 5 days prior to the visit (matching with the wording used in clarification letter which was sent after protocol V 2.0 release)
14 April 2020	Duration of permitted concomitant therapies prior to baseline (8 weeks) In case of a W48 visit delay, the delay was applied for the W72 safety visit (to take into account the COVID-19 pandemic) Addition of safety information regarding the risk of hepatitis reactivation under ocrelizumab treatment (changes in SmPC)

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
