

Clinical trial results:

A Phase III, Randomized, Double-Blind Placebo-Controlled, Multicenter Study To Evaluate the Efficacy and Safety of Baloxavir Marboxil in Combination With Standard-of-Care Neuraminidase Inhibitor in Hospitalized Participants With Severe Influenza

Summary

EudraCT number	2018-001416-30
Trial protocol	BG EE CZ SE BE DE FR FI HU ES RO
Global end of trial date	16 March 2020

Results information

Result version number	v1 (current)
This version publication date	30 September 2020
First version publication date	30 September 2020

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-002440-PIP01-18
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	30 July 2020
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	16 March 2020
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate the clinical efficacy of baloxavir marboxil plus a standard of care (SOC) neuraminidase inhibitor (NAI) compared with matching placebo plus a SOC NAI

Protection of trial subjects:

All study subjects were required to read and sign an Informed Consent Form.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	08 January 2019
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Argentina: 8
Country: Number of subjects enrolled	Australia: 1
Country: Number of subjects enrolled	Belgium: 4
Country: Number of subjects enrolled	Bulgaria: 71
Country: Number of subjects enrolled	Canada: 7
Country: Number of subjects enrolled	Czech Republic: 2
Country: Number of subjects enrolled	Germany: 6
Country: Number of subjects enrolled	Spain: 31
Country: Number of subjects enrolled	Estonia: 1
Country: Number of subjects enrolled	France: 13
Country: Number of subjects enrolled	Hong Kong: 2
Country: Number of subjects enrolled	Israel: 28
Country: Number of subjects enrolled	Japan: 41
Country: Number of subjects enrolled	Korea, Republic of: 13
Country: Number of subjects enrolled	Mexico: 20
Country: Number of subjects enrolled	Netherlands: 2
Country: Number of subjects enrolled	Peru: 4
Country: Number of subjects enrolled	Romania: 20
Country: Number of subjects enrolled	Singapore: 2
Country: Number of subjects enrolled	Serbia: 49
Country: Number of subjects enrolled	Sweden: 5
Country: Number of subjects enrolled	Turkey: 2

Country: Number of subjects enrolled	Ukraine: 10
Country: Number of subjects enrolled	United States: 21
Worldwide total number of subjects	363
EEA total number of subjects	155

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	11
Adults (18-64 years)	191
From 65 to 84 years	129
85 years and over	32

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

366 participants enrolled into the study and 363 actually received any treatment. All patients who received any study treatment are included in the safety analysis. Patients that received at least one dose of study treatment and were centrally assessed RT-PCR positive for influenza at any time point where included in the efficacy analysis.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	Baloxavir Marboxil

Arm description:

Participants will receive at least two doses of baloxavir marboxil or its matching placebo on Day 1 and 4. A third dose of Baloxavir or its matching placebo will be given on Day 7 for participants who have not improved according to protocol defined criteria on Day 5 Study treatment will be given in combination with SOC NAI (i.e., oseltamivir, zanamivir, or peramivir) in accordance with local clinical practice. SOC NAI will be administered to cover a minimum of treatment exposure from Day 1 to Day 5

Arm type	Experimental
Investigational medicinal product name	Baloxavir marboxil
Investigational medicinal product code	
Other name	Xofluza
Pharmaceutical forms	Tablet, Granules for oral suspension
Routes of administration	Oral use

Dosage and administration details:

Baloxavir marboxil will be administered as a weight-based dose on Days 1 and 4. A third dose of Baloxavir or its matching placebo will be given on Day 7 for participants who have not improved according to protocol defined criteria on Day 5

Arm title	Placebo
------------------	---------

Arm description:

Participants will be assigned in a 2:1 ratio to receive baloxavir marboxil or matching placebo. Study treatment will be given in combination with SOC NAI (i.e., oseltamivir, zanamivir, or peramivir) in accordance with local clinical practice. SOC NAI will be administered to cover a minimum of treatment exposure from Day 1 to Day 5

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet, Granules for oral suspension
Routes of administration	Oral use

Dosage and administration details:

Participants will receive Baloxavir marboxil matching placebo.

Number of subjects in period 1	Baloxavir Marboxil	Placebo
Started	239	124
Completed	217	104
Not completed	22	20
Adverse event, serious fatal	4	7
Consent withdrawn by subject	11	9
Physician decision	1	-
Adverse event, non-fatal	3	-
Patient Not Available	-	2
Lost to follow-up	3	2

End point title	Percentage of Participants with Adverse Events (AEs) and Serious Adverse Events (SAEs)
-----------------	--

End point description:

An adverse event (AE) is any untoward medical occurrence in a participant or clinical investigation participant administered a pharmaceutical product and that does not necessarily have a causal relationship with this treatment. An AE can therefore be any unfavorable and unintended sign (including an abnormal laboratory finding), symptom, or disease temporally associated with the use of a medicinal (investigational) product, whether or not considered related to the medicinal (investigational) product. A serious adverse event (SAE) is any significant hazard, contraindication, side effect that is fatal or life-threatening, requires hospitalization or prolongation of an existing hospitalization, results in persistent or significant disability/ incapacity, is a congenital anomaly/ birth defect, is medically significant or requires intervention to prevent one or other of the outcomes listed above.

Reporting groups

Reporting group title	Baloxavir Marboxil
-----------------------	--------------------

Reporting group description:

Participants will receive at least two doses of baloxavir marboxil or its matching placebo on Day 1 and 4. A third dose of Baloxavir or its matching placebo will be given on Day 7 for participants who have not improved according to protocol defined criteria on Day 5 Study treatment will be given in combination with SOC NAI (i.e., oseltamivir, zanamivir, or peramivir) in accordance with local clinical practice. SOC NAI will be administered to cover a minimum of treatment exposure from Day 1 to Day 5

Reporting group title	Placebo
-----------------------	---------

Reporting group description:

Participants will be assigned in a 2:1 ratio to receive baloxavir marboxil or matching placebo. Study treatment will be given in combination with SOC NAI (i.e., oseltamivir, zanamivir, or peramivir) in accordance with local clinical practice. SOC NAI will be administered to cover a minimum of treatment exposure from Day 1 to Day 5

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
30 May 2019	Major updates included the change from study sample size from approximately 240 to approximately 366, the endpoint "time to clinical response" was moved from an exploratory endpoint to secondary endpoint, and section was added to summarize post-marketing safety data that identified hypersensitivity reactions.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
