

Clinical trial results:

A Phase 3 Study Evaluating the Pharmacokinetics, Safety, and Tolerability of VX-445/TEZ/IVA Triple Combination Therapy in Cystic Fibrosis Subjects 6 Through 11 Years of Age

Summary

EudraCT number	2018-001695-38
Trial protocol	GB IE
Global end of trial date	07 August 2020

Results information

Result version number	v2 (current)
This version publication date	10 November 2021
First version publication date	22 February 2021
Version creation reason	

Trial information

Trial identification

Sponsor protocol code	VX18-445-106
-----------------------	--------------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT03691779
WHO universal trial number (UTN)	-

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-002324-PIP01-17
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	24 August 2020
Is this the analysis of the primary completion data?	Yes
Primary completion date	07 August 2020
Global end of trial reached?	Yes
Global end of trial date	07 August 2020
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate the pharmacokinetics (PK), safety and tolerability of elexacaftor (ELX), tezacaftor (TEZ), and ivacaftor (IVA) when dosed in triple combination (TC).

Protection of trial subjects:

The study was conducted in accordance with the ethical principles stated in the Declaration of Helsinki and the International Council on Harmonization (ICH) Guideline for Good Clinical Practice (GCP).

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	02 October 2018
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United Kingdom: 6
Country: Number of subjects enrolled	Ireland: 5
Country: Number of subjects enrolled	United States: 46
Country: Number of subjects enrolled	Australia: 8
Country: Number of subjects enrolled	Canada: 6
Worldwide total number of subjects	71
EEA total number of subjects	5

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	71
Adolescents (12-17 years)	0
Adults (18-64 years)	0
From 65 to 84 years	0

85 years and over	0
-------------------	---

Subject disposition

Recruitment

Recruitment details:

The study was conducted in 2 parts, Part A and Part B. All results were planned to be analyzed and reported separately for Part A and Part B of the study.

Pre-assignment

Screening details:

This study was conducted in cystic fibrosis (CF) subjects 6 through 11 years of age who were homozygous for F508del (F/F) genotype or heterozygous for F508del and a CF transmembrane conductance regulator gene (CFTR) minimal function mutation (F/MF) genotypes.

Period 1

Period 1 title	Triple Combination Treatment Period (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	No
Arm title	Part A: ELX/TEZ/IVA

Arm description:

Subjects in Part A received ELX 100 milligrams (mg) once daily (qd)/TEZ 50 mg qd/IVA 75 mg every 12 hours (q12h) in the treatment period for 15 days.

Arm type	Experimental
Investigational medicinal product name	IVA
Investigational medicinal product code	VX-770
Other name	Ivacaftor
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received IVA once daily in the evening.

Investigational medicinal product name	ELX/TEZ/IVA
Investigational medicinal product code	VX-445/VX-661/VX-770
Other name	Elexacaftor/Tezacaftor/Ivacaftor
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received ELX/TEZ/IVA fixed-dose combination (FDC) once daily in the morning.

Arm title	Part B: ELX/TEZ/IVA
------------------	---------------------

Arm description:

Subjects in Part B weighing less than (<) 30 kilograms (kg) at Day 1 received ELX 100 mg qd/TEZ 50 mg qd/IVA 75 mg q12h and subjects weighing greater than equals to (>=) 30 kg at Day 1 received ELX 200 mg qd/TEZ 100 mg qd/IVA 150 mg q12h in the treatment period for 24 weeks.

Arm type	Experimental
Investigational medicinal product name	IVA
Investigational medicinal product code	VX-770
Other name	Ivacaftor
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received IVA once daily in the evening.

Investigational medicinal product name	ELX/TEZ/IVA
Investigational medicinal product code	VX-445/VX-661/VX-770
Other name	Elexacaftor/Tezacaftor/Ivacaftor
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received ELX/TEZ/IVA FDC once daily in the morning.

Number of subjects in period 1	Part A: ELX/TEZ/IVA	Part B: ELX/TEZ/IVA
Started	16	66
Completed	16	64
Not completed	0	2
Adverse event	-	1
Withdrawal of consent (not due to AE)	-	1

Baseline characteristics

Reporting groups

Reporting group title	Part A: ELX/TEZ/IVA
-----------------------	---------------------

Reporting group description:

Subjects in Part A received ELX 100 milligrams (mg) once daily (qd)/TEZ 50 mg qd/IVA 75 mg every 12 hours (q12h) in the treatment period for 15 days.

Reporting group title	Part B: ELX/TEZ/IVA
-----------------------	---------------------

Reporting group description:

Subjects in Part B weighing less than (<) 30 kilograms (kg) at Day 1 received ELX 100 mg qd/TEZ 50 mg qd/IVA 75 mg q12h and subjects weighing greater than equals to (>=) 30 kg at Day 1 received ELX 200 mg qd/TEZ 100 mg qd/IVA 150 mg q12h in the treatment period for 24 weeks.

Reporting group values	Part A: ELX/TEZ/IVA	Part B: ELX/TEZ/IVA	Total
Number of subjects	16	66	82
Age categorical			
There were 71 unique subjects enrolled in the study. Out of 16 subjects from Part A, 11 subjects also participated in Part B.			
Units: Subjects			
Children (2-11 years)	16	66	71
Gender categorical			
There were 71 unique subjects enrolled in the study. Out of 16 subjects from Part A, 11 subjects also participated in Part B. The total column for gender represents the sum of Part A and Part B numbers as the data for unique 71 subjects was not collected separately.			
Units: Subjects			
Female	11	39	50
Male	5	27	32
Ethnicity (NIH/OMB)			
There were 71 unique subjects enrolled in the study. Out of 16 subjects from Part A, 11 subjects also participated in Part B.			
Units: Subjects			
Hispanic or Latino	0	0	0
Not Hispanic or Latino	16	58	63
Unknown or Not Reported	0	8	8
Race (NIH/OMB)			
There were 71 unique subjects enrolled in the study. Out of 16 subjects from Part A, 11 subjects also participated in Part B.			
Units: Subjects			
American Indian or Alaska Native	0	0	0
Asian	0	0	0
Native Hawaiian or Other Pacific Islander	0	0	0
Black or African American	0	0	0
White	16	57	62
More than one race	0	1	1
Unknown or Not Reported	0	8	8

End points

End points reporting groups

Reporting group title	Part A: ELX/TEZ/IVA
Reporting group description: Subjects in Part A received ELX 100 milligrams (mg) once daily (qd)/TEZ 50 mg qd/IVA 75 mg every 12 hours (q12h) in the treatment period for 15 days.	
Reporting group title	Part B: ELX/TEZ/IVA
Reporting group description: Subjects in Part B weighing less than (<) 30 kilograms (kg) at Day 1 received ELX 100 mg qd/TEZ 50 mg qd/IVA 75 mg q12h and subjects weighing greater than equals to (>=) 30 kg at Day 1 received ELX 200 mg qd/TEZ 100 mg qd/IVA 150 mg q12h in the treatment period for 24 weeks.	

Primary: Part A: Maximum Observed Plasma Concentration (Cmax) of ELX, TEZ, and IVA

End point title	Part A: Maximum Observed Plasma Concentration (Cmax) of ELX, TEZ, and IVA ^{[1][2]}
End point description: PK set for Part A included all subjects who have received at least 1 dose of study drug in Part A. Here, the "n" signifies subjects who were evaluable at the specified time point.	
End point type	Primary
End point timeframe: Part A: Day 15	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive statistics were planned. No statistical comparisons were planned for this endpoint.

[2] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: This endpoint was planned only for Part A arm.

End point values	Part A: ELX/TEZ/IVA			
Subject group type	Reporting group			
Number of subjects analysed	16			
Units: microgram per milliliter (mcg/mL)				
arithmetic mean (standard deviation)				
ELX (n=15)	6.13 (± 1.52)			
TEZ (n=15)	6.93 (± 1.96)			
IVA (n=15)	1.01 (± 0.281)			

Statistical analyses

No statistical analyses for this end point

Primary: Part A: Observed Pre-dose Plasma Concentration (Ctrough) of ELX, TEZ, and IVA

End point title	Part A: Observed Pre-dose Plasma Concentration (Ctrough) of ELX, TEZ, and IVA ^{[3][4]}
-----------------	---

End point description:

PK set (Part A). Here, the "n" signifies subjects who were evaluable at the specified time point.

End point type	Primary
----------------	---------

End point timeframe:

Part A: Day 15

Notes:

[3] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive statistics were planned. No statistical comparisons were planned for this endpoint.

[4] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: This endpoint was planned only for Part A arm.

End point values	Part A: ELX/TEZ/IVA			
Subject group type	Reporting group			
Number of subjects analysed	16			
Units: mcg/mL				
arithmetic mean (standard deviation)				
ELX (n=15)	2.86 (± 1.37)			
TEZ (n=15)	1.06 (± 0.366)			
IVA (n=15)	0.297 (± 0.173)			

Statistical analyses

No statistical analyses for this end point

Primary: Part A: Area Under the Concentration Versus Time Curve From 0 to 24 hours (AUC0-24h) of ELX, TEZ, and IVA

End point title	Part A: Area Under the Concentration Versus Time Curve From 0 to 24 hours (AUC0-24h) of ELX, TEZ, and IVA ^{[5][6]}
-----------------	---

End point description:

PK set (Part A).

End point type	Primary
----------------	---------

End point timeframe:

Part A: Day 15

Notes:

[5] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive statistics were planned. No statistical comparisons were planned for this endpoint.

[6] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: This endpoint was planned only for Part A arm.

End point values	Part A: ELX/TEZ/IVA			
Subject group type	Reporting group			
Number of subjects analysed	16			
Units: hour*microgram per milliliter (h*mcg/mL)				
arithmetic mean (standard deviation)				
ELX	107 (± 28.7)			
TEZ	58.4 (± 13.5)			
IVA	8.12 (± 2.93)			

Statistical analyses

No statistical analyses for this end point

Primary: Part B: Safety and Tolerability as Assessed by Number of Subjects With Treatment Emergent Adverse Events (TEAEs) and Serious Adverse Events (SAEs)

End point title	Part B: Safety and Tolerability as Assessed by Number of Subjects With Treatment Emergent Adverse Events (TEAEs) and Serious Adverse Events (SAEs) ^{[7][8]}
-----------------	--

End point description:

Safety set for Part B included all subjects who received at least 1 dose of study drug in Part B. The safety analysis for Part B was assessed for the overall treatment arm, irrespective of weight based dose regimen. Therefore, the analysis is reported for the single triple combination (Part B: ELX/TEZ/IVA) arm.

End point type	Primary
----------------	---------

End point timeframe:

Part B: Day 1 Through Safety Follow-up Visit (up to Week 28)

Notes:

[7] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive statistics were planned. No statistical comparisons were planned for this endpoint.

[8] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: This endpoint was planned only for Part B arm.

End point values	Part B: ELX/TEZ/IVA			
Subject group type	Reporting group			
Number of subjects analysed	66			
Units: subjects				
Subjects With TEAEs	65			
Subjects With SAEs	1			

Statistical analyses

No statistical analyses for this end point

Secondary: Part A: Cmax of ELX Metabolite (M23-ELX), TEZ Metabolite (M1-TEZ), and IVA Metabolite (M1-IVA)

End point title	Part A: Cmax of ELX Metabolite (M23-ELX), TEZ Metabolite (M1-TEZ), and IVA Metabolite (M1-IVA) ^[9]
End point description:	
PK set (Part A). Here, the "n" signifies subjects who were evaluable at the specified time point.	
End point type	Secondary
End point timeframe:	
Part A: Day 15	

Notes:

[9] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: This endpoint was planned only for Part A arm.

End point values	Part A: ELX/TEZ/IVA			
Subject group type	Reporting group			
Number of subjects analysed	16			
Units: mcg/mL				
arithmetic mean (standard deviation)				
M23-ELX (n=15)	1.60 (± 0.657)			
M1-TEZ (n=15)	6.26 (± 1.54)			
M1-IVA (n=15)	2.36 (± 0.694)			

Statistical analyses

No statistical analyses for this end point

Secondary: Part A: Ctrough of ELX Metabolite (M23-ELX), TEZ Metabolite (M1-TEZ), and IVA Metabolite (M1-IVA)

End point title	Part A: Ctrough of ELX Metabolite (M23-ELX), TEZ Metabolite (M1-TEZ), and IVA Metabolite (M1-IVA) ^[10]
End point description:	
PK set (Part A). Here, the "n" signifies subjects who were evaluable at the specified time point.	
End point type	Secondary
End point timeframe:	
Part A: Day 15	

Notes:

[10] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: This endpoint was planned only for Part A arm.

End point values	Part A: ELX/TEZ/IVA			
Subject group type	Reporting group			
Number of subjects analysed	16			
Units: mcg/mL				
arithmetic mean (standard deviation)				
M23-ELX (n=15)	1.30 (± 0.585)			
M1-TEZ (n=15)	4.64 (± 1.36)			
M1-IVA (n=15)	0.890 (± 0.460)			

Statistical analyses

No statistical analyses for this end point

Secondary: Part A: AUC0-24h of ELX Metabolite (M23-ELX) and TEZ Metabolite (M1-TEZ)

End point title	Part A: AUC0-24h of ELX Metabolite (M23-ELX) and TEZ Metabolite (M1-TEZ) ^[11]

No statistical analyses for this end point

Secondary: Part B: Absolute Change in Height

End point title	Part B: Absolute Change in Height ^[21]
End point description:	
FAS (Part B). The efficacy analysis for Part B was assessed for the overall treatment arm, irrespective of weight based dose regimen. Therefore, the analysis is reported for the single triple combination (Part B: ELX/TEZ/IVA) arm.	
End point type	Secondary
End point timeframe:	
Part B: From Baseline at Week 24	

Notes:

[21] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: This endpoint was planned only for Part B arm.

End point values	Part B: ELX/TEZ/IVA			
Subject group type	Reporting group			
Number of subjects analysed	66			
Units: centimeters (cm)				
least squares mean (confidence interval 95%)	2.3 (1.9 to 2.7)

Secondary: Part B: Absolute Change in Height-for-Age Z-Score

End point title	Part B: Absolute Change in Height-for-Age Z-Score ^[22]
End point description:	
The z-score is a statistical measure to describe whether a value was above or below the standard. A z-score of 0 is equal to the standard. Lower numbers indicate values lower than the standard and higher numbers indicate values higher than the standard. FAS (Part B). The efficacy analysis for Part B was assessed for the overall treatment arm, irrespective of weight based dose regimen. Therefore, the analysis is reported for the single triple combination (Part B: ELX/TEZ/IVA) arm.	
End point type	Secondary
End point timeframe:	
Part B: From Baseline at Week 24	

Notes:

[22] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: This endpoint was planned only for Part B arm.

End point values	Part B: ELX/TEZ/IVA			
Subject group type	Reporting group			
Number of subjects analysed	66			
Units: z-score				
least squares mean (confidence interval 95%)	-0.05 (-0.12 to 0.01)

Secondary: Part B: Drug Acceptability Assessment Using Modified Facial Hedonic Scale

End point title	Part B: Drug Acceptability Assessment Using Modified Facial Hedonic Scale ^[23]
-----------------	---

End point description:

The study drug acceptability (subject reaction) was assessed by a visual analog scale that incorporates a 5 point facial hedonic scale (Liked it Very Much, Liked it a Little, Not sure, Disliked it a Little, Disliked it Very Much). Number of subjects with the indicated categorical response in the drug acceptability assessment were reported. FAS (Part B). The efficacy analysis for Part B was assessed for the overall treatment arm, irrespective of weight based dose regimen. Therefore, the analysis is reported for the single triple combination (Part B: ELX/TEZ/IVA) arm. Here "number analyzed" signifies those subjects who were evaluable for this outcome.

End point type	Secondary
----------------	-----------

End point timeframe:

Part B: At Week 24

Notes:

[23] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: This endpoint was planned only for Part B arm.

End point values	Part B: ELX/TEZ/IVA			
Subject group type	Reporting group			
Number of subjects analysed	33			
Units: subjects				
Liked it Very Much	16			
Liked it a Little	6			
Not sure	10			
Disliked it a Little	1			
Disliked it Very Much	0

Secondary: Part B: Number of Pulmonary Exacerbations Events

End point title	Part B: Number of Pulmonary Exacerbations Events ^[24]
-----------------	--

End point description:

Pulmonary exacerbation was defined as new or changed treatment with oral, inhaled, or intravenous antibiotics and fulfillment of pre-specified protocol defined criteria. FAS (Part B). The total number of pulmonary exacerbations events across all subjects were reported. The efficacy analysis for Part B was assessed for the overall treatment arm, irrespective of weight based dose regimen. Therefore, the analysis is reported for the single triple combination (Part B: ELX/TEZ/IVA) arm.

End point type	Secondary
----------------	-----------

End point timeframe:

Part B: From Baseline Through Week 24

Notes:

[24] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: This endpoint was planned only for Part B arm.

End point values	Part B: ELX/TEZ/IVA			
Subject group type	Reporting group			
Number of subjects analysed	66			
Units: pulmonary exacerbations events	4

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
07 June 2019	Amended to update secondary endpoints and incorporate dose justification and weight cutoff based on data from Part A.
18 December 2019	Amended to update pre-dose assessment window.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
