Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	20 October 2021
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	20 October 2021
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

The primary objectives of this study were as follows:

Phase 2b Dose-Finding Induction Study

-Assess the effect of TD-1473 taken daily for 8 weeks at daily doses of 20 mg, 80 mg, and 200 mg on the change from baseline in the total Mayo score

-Assess the effect of TD-1473 on rates of clinical remission, endoscopic healing, clinical response, and mucosal healing

-Select dose(s) of TD-1473 for evaluation in the Phase 3 dose-confirming Induction Study and the Phase 3 Maintenance Study

Phase 3 Dose-Confirming Induction Study

-Establish the clinical remission rate associated with TD-1473 compared to placebo treatment at Week 8

-To assess the safety and tolerability of TD-1473 when taken for up to 16 weeks

Phase 3 Maintenance Study

-Establish the clinical remission rate associated with TD-1473 compared to placebo treatment at Maintenance Week 44

-Establish the safety and tolerability of TD-1473 with up to 44 additional weeks of treatment

Protection of trial subjects:

This trial was conducted in accordance with the ethical principles of Good Clinical Practice, according to the International Council for Harmonisation (ICH) Harmonised Tripartite Guideline.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	11 March 2019
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Poland: 53
Country: Number of subjects enrolled	Ukraine: 29
Country: Number of subjects enrolled	Bulgaria: 13
Country: Number of subjects enrolled	Serbia: 10
Country: Number of subjects enrolled	Slovakia: 5
Country: Number of subjects enrolled	Georgia: 4
Country: Number of subjects enrolled	Hungary: 4
Country: Number of subjects enrolled	Romania: 2
Country: Number of subjects enrolled	France: 16
Country: Number of subjects enrolled	Italy: 12

Country: Number of subjects enrolled	South Africa: 1
Worldwide total number of subjects	239
EEA total number of subjects	120

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	221
From 65 to 84 years	18
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

A total of 239 participants were enrolled at sites in Europe, Asia/Pacific, the United States, Israel, Australia, and South Africa between 11 March 2019 and 20 October 2021.

Pre-assignment

Screening details:

Participants were screened for eligibility over a 4-week period prior to randomization.

Period 1

Period 1 title	Induction Period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Participants were randomized to receive once-daily administrations of placebo for 8 weeks during the Induction Period.

Participants who achieved clinical response by adapted Mayo Score at Week 8 continued to receive blinded placebo in the Maintenance Period. Participants who did not achieve clinical response at Week 8 received 80 mg TD-1473 for 8 weeks in the Extended Induction Period.

Participants who achieved clinical response to a total of 8 weeks of TD-1473 induction therapy, either at Week 8 or Week 16, were re-randomized to received placebo; 20 mg, 80 mg, or 200 mg TD-1473 for 44 weeks in the Maintenance Period. Participants who did not achieve clinical response to a total of 8 weeks of TD-1473 induction therapy underwent study exit procedures.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Received orally.

Arm title	TD-1473 20 mg
------------------	---------------

Arm description:

Participants were randomized to receive once-daily administrations of 20 mg TD-1473 for 8 weeks during the Induction Period.

Participants who achieved clinical response by adapted Mayo Score at Week 8 continued to receive 20 mg TD-1473 in the Maintenance Period. Participants who did not achieve clinical response at Week 8 continued to receive 20 mg TD-1473 for 8 weeks in the Extended Induction Period.

Participants who achieved clinical response to a total of 16 weeks of TD-1473 induction therapy continued to receive 20 mg TD-1473 for 44 weeks in the Maintenance Period. Participants who did not achieve clinical response to a total of 16 weeks of TD-1473 induction therapy underwent study exit procedures.

Notes:

[1] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: The extended induction period included only participants who did not achieve clinical response at Week 8.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
01 October 2018	Changes were made to the following protocol sections: <ul style="list-style-type: none">• Eligibility criteria• Study drugs• Study procedures• Statistical considerations
09 January 2020	Changes were made to the following protocol sections: <ul style="list-style-type: none">• Objectives and endpoints• Eligibility criteria• Schedule of study procedures• Study procedures• Adverse events• Statistical considerations• Appendices
29 May 2020	Changes were made to the following protocol sections: <ul style="list-style-type: none">• Study design• Eligibility criteria• Schedule of study procedures• Study drugs• Study procedures• Adverse events• Statistical considerations• Appendices

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Stopped early due to company decision. Company decision based on interim analysis results in TD-1473-0157

Notes:
