Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-000645-PIP03-18
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	09 May 2022
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	09 May 2022
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The objective of this study is to evaluate the efficacy of vedolizumab when added to background aGvHD prophylaxis regimen compared to placebo and background aGvHD prophylaxis regimen on intestinal aGvHD-free survival by Day +180 in participants who receive allo-HSCT as treatment for a hematologic malignancy or myeloproliferative disorder.

Protection of trial subjects:

All study participants were required to read and sign an Informed Consent Form.

Background therapy:

Intestinal acute graft-versus-host disease (aGvHD) prophylaxis regimen.

Evidence for comparator: -

Actual start date of recruitment	06 February 2019
Long term follow-up planned	Yes
Long term follow-up rationale	Safety
Long term follow-up duration	12 Months
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Canada: 1
Country: Number of subjects enrolled	United States: 109
Country: Number of subjects enrolled	Argentina: 5
Country: Number of subjects enrolled	Brazil: 4
Country: Number of subjects enrolled	Belgium: 10
Country: Number of subjects enrolled	France: 19
Country: Number of subjects enrolled	Germany: 20
Country: Number of subjects enrolled	Italy: 17
Country: Number of subjects enrolled	Austria: 3
Country: Number of subjects enrolled	Greece: 7
Country: Number of subjects enrolled	Hungary: 2
Country: Number of subjects enrolled	Poland: 2
Country: Number of subjects enrolled	Israel: 7
Country: Number of subjects enrolled	Romania: 2
Country: Number of subjects enrolled	Russian Federation: 5
Country: Number of subjects enrolled	Australia: 20
Country: Number of subjects enrolled	Japan: 37

Country: Number of subjects enrolled	Korea, Republic of: 22
Country: Number of subjects enrolled	Singapore: 4
Country: Number of subjects enrolled	Norway: 10
Country: Number of subjects enrolled	Portugal: 4
Country: Number of subjects enrolled	Spain: 13
Country: Number of subjects enrolled	Sweden: 3
Country: Number of subjects enrolled	Switzerland: 5
Country: Number of subjects enrolled	United Kingdom: 12
Worldwide total number of subjects	343
EEA total number of subjects	112

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	1
Adults (18-64 years)	264
From 65 to 84 years	78
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Participants took part in the study at 95 investigative sites in Canada, United States, Argentina, Brazil, Belgium, France, Germany, Italy, Norway, Portugal, Spain, Sweden, Switzerland, United Kingdom, Austria, Greece, Hungary, Poland, Israel, Romania, Russia, Australia, Japan, Republic of Korea and Singapore from 6 February 2019 to 9 May 2022.

Pre-assignment

Screening details:

Participants undergoing allogeneic hematopoietic stem cell transplantation (Allo-HSCT) were randomized into 1:1 ratio to receive Vedolizumab 300 mg or vedolizumab-matching placebo.

Pre-assignment period milestones

Number of subjects started	343
Number of subjects completed	333

Pre-assignment subject non-completion reasons

Reason: Number of subjects	Protocol Deviation: 1
Reason: Number of subjects	Adverse event, non-fatal: 1
Reason: Number of subjects	Consent withdrawn by subject: 3
Reason: Number of subjects	Reason not Specified: 5

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Vedolizumab placebo-matching, intravenous (IV) infusion, once on Day -1 along with background graft-versus-host disease (GvHD) prophylaxis regimen prior to Allo-HSCT and once on Days +13, +41, +69, +97, +125, and +153 post Allo-HSCT.

Arm type	Experimental
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Vedolizumab placebo-matching intravenous infusion.

Arm title	Vedolizumab 300 mg
------------------	--------------------

Arm description:

Vedolizumab 300 mg, IV, once on Day -1 along with background graft-versus-host disease (GvHD) prophylaxis regimen prior to Allo-HSCT and once on Days +13, +41, +69, +97, +125, and +153 post Allo-HSCT.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Vedolizumab
Investigational medicinal product code	
Other name	MLN0002
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Vedolizumab intravenous infusion.

Number of subjects in period 1^[1]	Placebo	Vedolizumab 300 mg
Started	165	168
Completed	98	116
Not completed	67	52
Unsatisfactory Therapeutic Response	5	3
Adverse event, serious fatal	33	26
Consent withdrawn by subject	17	14
Adverse event, non-fatal	4	6
Protocol Deviation	3	-
Site Terminated	1	-
Death (COVID-19-Related)	1	-
Other Reasons COVID-19-Related	-	1
Reason not Specified	3	2

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: 10 participants from 343 participants were randomized but did not continue the study.

Primary: Intestinal aGvHD-Free Survival After Allo-HSCT

End point title	Intestinal aGvHD-Free Survival After Allo-HSCT
End point description: Intestinal aGvHD Free Survival is the time from the date of first study drug administration (Day-1) to intestinal aGvHD event/death, where an event is defined as death due to any cause or Stage 1-4 intestinal involvement per Acute Graft versus-Host Disease Clinical Stage criteria. Data was censored for participants who have not had the intestinal aGvHD event or died or have had the event after pre-specified timing, e.g., last contact or Day +180 after allo HSCT whichever occurs first. FAS included all participants who were randomized, received at least 1 dose of the treatment, and under-went allo HSCT. 99 indicates that median was not estimable due to fewer number of participants with events.	
End point type	Primary
End point timeframe: From the date of first dose of study drug to first documented intestinal aGvHD or death, whichever occurs first up to Day +180

Adverse events

Adverse events information

Timeframe for reporting adverse events:

From the first dose of study drug until the end of study (up to approximately 281 days)

Adverse event reporting additional description:

At each visit the investigator had to document any occurrence of adverse events and abnormal laboratory findings. Any event spontaneously reported by the participant or observed by the investigator was recorded, irrespective of the relation to study treatment. Safety Population included all participants who received at least 1 dose of study drug.

Assessment type	Systematic

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
10 June 2019	<p>The following is a summary of the changes made in the amendment 06:</p> <ul style="list-style-type: none">• Consolidation of the previous local amendments to meet local regulations into a single global amendment.• Addition of final results from the completed Study Vedolizumab-1015.• Clarification of the screening window and that subjects may be rescreened.• Clarification that randomization may occur within 2 days of the first dose of study drug on Day -1.• Clarification of the inclusion and exclusion criteria.• Clarification of the excluded and permitted concomitant medications.• Addition of a criterion for withdrawal of a subject from the study for lack of efficacy.• Clarification of the management of clinical events.• Clarification regarding unscheduled PK sample collection.• Clarification regarding AEs: management of clinical events, specification of AESIs, and reporting periods for collection of AEs and SAEs.• Clarification of the timing of the primary analysis for efficacy and safety.• Clarifications to the footnotes of the schedule of events to align with updates to text.
18 September 2019	<p>The following is a summary of the changes made in the amendment 07:</p> <ol style="list-style-type: none">1. Clarification of the description of the disease to be treated in adolescent subjects.2. Addition of results from nonclinical studies related to inclusion of adolescent subjects.3. Updated human experience as reported in the 9th development safety update report.4. Update to the study rationale to support the inclusion of adolescent subjects.5. Update to the benefit:risk profile to support the inclusion of adolescent subjects.6. Addition of data supporting the dose regimen in adolescent subjects.7. Update of the inclusion criteria impacted by inclusion of adolescent subjects.8. Update to permitted medications to include use of topical anesthetic in adolescent subjects.9. Clarification to the procedures to be conducted after discontinuation or withdrawal of a subject.10. Added assessment of height to be collected at the end of study visit.11. Updated the pregnancy testing and contraception requirements to include female adolescent subjects aged 12 years and greater.12. Addition of necessary age-appropriate documentation that must be completed for adolescent subjects.13. Addition of blood collection volumes for adolescent and adult subjects.14. Update to the version of Common Terminology Criteria for Adverse Events to be used for the grading of adverse events.15. Update to stratification to include age group and data assessments in adolescent subjects.16. Updates to Appendix A, Schedule of Events footnotes, to align with updates in text.17. Update to Appendix B regarding methotrexate treatment to support the inclusion of adolescent subjects.18. Update to Appendix F to include age-appropriate assessments of aGvHD clinical stage and Mount Sinai Acute GVHD International Consortium severity index for aGvHD.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
