

## Clinical trial results:

### A Multicenter, Randomized, Double-Blind, Active (Oseltamivir)-Controlled Study to Assess the Safety, Pharmacokinetics, and Efficacy of Baloxavir Marboxil in Otherwise Healthy Pediatric Patients 1 to <12 Years of Age With Influenza-Like Symptoms

#### Summary

EudraCT number	2018-002169-21
Trial protocol	ES PL
Global end of trial date	03 April 2019

#### Results information

Result version number	v2 (current)
This version publication date	12 March 2020
First version publication date	12 October 2019
Version creation reason	

#### Trial information

##### Trial identification

Sponsor protocol code	CP40563
-----------------------	---------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT03629184
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	F. Hoffmann-La Roche AG
Sponsor organisation address	Grenzacherstrasse 124, Basel, Switzerland, CH-4070
Public contact	F. Hoffmann-La Roche AG, F. Hoffmann-La Roche AG, 41 616878333, global.trial_information@roche.com
Scientific contact	F. Hoffmann-La Roche AG, F. Hoffmann-La Roche AG, 41 616878333, global.trial_information@roche.com

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-002440-PIP01-18
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

---

**Results analysis stage**

---

Analysis stage	Final
Date of interim/final analysis	09 July 2019
Is this the analysis of the primary completion data?	Yes
Primary completion date	03 April 2019
Global end of trial reached?	Yes
Global end of trial date	03 April 2019
Was the trial ended prematurely?	No

Notes:

---

**General information about the trial**

---

Main objective of the trial:

To compare the safety of a single dose of baloxavir marboxil with 5 days of oseltamivir administered twice daily.

Protection of trial subjects:

All study subjects were required to read and sign an Informed Consent Form.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	20 November 2018
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

---

**Population of trial subjects**

---

**Subjects enrolled per country**

Country: Number of subjects enrolled	Costa Rica: 2
Country: Number of subjects enrolled	Spain: 3
Country: Number of subjects enrolled	Mexico: 1
Country: Number of subjects enrolled	Poland: 5
Country: Number of subjects enrolled	Russian Federation: 1
Country: Number of subjects enrolled	United States: 161
Worldwide total number of subjects	173
EEA total number of subjects	8

Notes:

---

**Subjects enrolled per age group**

---

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	16
Children (2-11 years)	157
Adolescents (12-17 years)	0
Adults (18-64 years)	0

From 65 to 84 years	0
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

173 participants were enrolled and dosed in this study.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

### Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

<b>Arm title</b>	Baloxavir Marboxil
------------------	--------------------

Arm description:

Participants will receive a single oral dose of baloxavir marboxil on Day 1 (based on body weight). Oseltamivir matching placebo will also be administered orally twice daily (BID) for 5 days.

Arm type	Experimental
Investigational medicinal product name	Baloxavir Marboxil
Investigational medicinal product code	
Other name	Xofluza
Pharmaceutical forms	Granules for oral suspension
Routes of administration	Oral use

Dosage and administration details:

Participants received a single oral dose of baloxavir marboxil on Day 1 (based on body weight)

Investigational medicinal product name	Oseltamivir matching placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for oral suspension
Routes of administration	Oral use

Dosage and administration details:

Oseltamivir matching placebo was administered orally twice daily (BID) for 5 days

<b>Arm title</b>	Oseltamivir
------------------	-------------

Arm description:

Participants will receive oseltamivir orally BID for 5 days (based on body weight). Baloxavir marboxil matching placebo will also be administered orally on Day 1

Arm type	Active comparator
Investigational medicinal product name	Oseltamivir
Investigational medicinal product code	
Other name	Tamiflu
Pharmaceutical forms	Powder for oral suspension
Routes of administration	Oral use

Dosage and administration details:

Participants received oseltamivir orally BID for 5 days (based on body weight)

Investigational medicinal product name	Baloxavir marboxil matching placebo
Investigational medicinal product code	
Other name	

Pharmaceutical forms	Granules for oral suspension
Routes of administration	Oral use

Dosage and administration details:

Baloxavir marboxil matching placebo was administered orally on Day 1

<b>Number of subjects in period 1</b>	Baloxavir Marboxil	Oseltamivir
Started	115	58
Completed	112	57
Not completed	3	1
Consent withdrawn by subject	2	1
Physician decision	1	-

## Baseline characteristics

### Reporting groups

Reporting group title	Baloxavir Marboxil
Reporting group description:	
Participants will receive a single oral dose of baloxavir marboxil on Day 1 (based on body weight). Oseltamivir matching placebo will also be administered orally twice daily (BID) for 5 days.	
Reporting group title	Oseltamivir
Reporting group description:	
Participants will receive oseltamivir orally BID for 5 days (based on body weight). Baloxavir marboxil matching placebo will also be administered orally on Day 1	

Reporting group values	Baloxavir Marboxil	Oseltamivir	Total
Number of subjects	115	58	173

## End points

### End points reporting groups

Reporting group title	Baloxavir Marboxil
Reporting group description:	
Participants will receive a single oral dose of baloxavir marboxil on Day 1 (based on body weight). Oseltamivir matching placebo will also be administered orally twice daily (BID) for 5 days.	
Reporting group title	Oseltamivir
Reporting group description:	
Participants will receive oseltamivir orally BID for 5 days (based on body weight). Baloxavir marboxil matching placebo will also be administered orally on Day 1	

### Primary: Percentage of Participants with Adverse Events (AEs) and Serious Adverse Events (SAEs)

End point title	Percentage of Participants with Adverse Events (AEs) and Serious Adverse Events (SAEs) <sup>[1]</sup>
End point description:	
An adverse event (AE) is any untoward medical occurrence in a participant or clinical investigation participant administered a pharmaceutical product and that does not necessarily have a causal relationship with this treatment. An AE can therefore be any unfavorable and unintended sign (including an abnormal laboratory finding), symptom, or disease temporally associated with the use of a medicinal (investigational) product, whether or not considered related to the medicinal (investigational) product. A serious adverse event (SAE) is any significant hazard, contraindication, side effect that is fatal or life-threatening, requires hospitalization or prolongation of an existing hospitalization, results in persistent or significant disability/ incapacity, is a congenital anomaly/ birth defect, is medically significant or requires intervention to prevent one or other of the outcomes listed above.	
End point type	Primary
End point timeframe:	
Up to Day 29	
Notes:	
[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.	
Justification: Descriptive stats only. No statistical analyses were pre-defined.	

End point values	Baloxavir Marboxil	Oseltamivir		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	115	58		
Units: percentage of participants				
number (not applicable)				
Adverse Events (AEs)	46.1	53.4		
Serious Adverse Events (SAEs)	0	0		

### Statistical analyses

No statistical analyses for this end point

### Secondary: Plasma Concentrations of Baloxavir Marboxil - Sparse PK Population

End point title	Plasma Concentrations of Baloxavir Marboxil - Sparse PK Population <sup>[2]</sup>
-----------------	---

End point description:

Results provided by body-weight groups for participants in the Baloxavir Marboxil arm. Values below lower limit of quantification (0.5 ng/mL) are set to zero. Here 99999 represents results data which was not estimable due to low number of events.

End point type	Secondary
----------------	-----------

End point timeframe:

Days 1 (Post-Dose), 2, 4, 6 and 10

Notes:

[2] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: This endpoint is specific to the arm - Baloxavir Marboxil only.

End point values	Baloxavir Marboxil

## Secondary: Time to Alleviation of Influenza Signs and Symptoms

End point title	Time to Alleviation of Influenza Signs and Symptoms
-----------------	---

End point description:

Time to alleviation of influenza signs and symptoms is defined as the length of time taken from the start of treatment to the point at which all of the following criteria are met and remain so for at least 21.5 hours: - A score of 0 (no problem) or 1 (minor problem) for cough and nasal symptoms (items 14 and 15 of the Canadian Acute Respiratory Illness and Flu Scale [CARIFS]) - A "yes" response to the following question on the CARIFS: "Since the last assessment has the subject been able to return to day care/school, or resume his or her normal daily activity in the same way as performed prior to developing the flu?" - First return to afebrile state (tympanic temperature  $\leq 37.2$  degree Celsius [ $^{\circ}\text{C}$ ])

End point type	Secondary
----------------	-----------
