Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	16 June 2023
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	21 April 2023
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To assess the safety and tolerability profile of durvalumab (MEDI4736) as defined by Grade 3 and Grade 4 Treatment-related adverse events (TRAEs) within 6 months from the initiation of durvalumab (MEDI4736) treatment.

Protection of trial subjects:

This study was performed in accordance with the ethical principles that have their origin in the Declaration of Helsinki and that are consistent with International Council for Harmonisation (ICH) Good Clinical Practice (GCP), applicable regulatory requirements and the AstraZeneca policy on Bioethics. Written informed consent was obtained before the patient was enrolled in the study, along with the date the written consent was obtained.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	16 April 2019
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 2
Country: Number of subjects enrolled	United Kingdom: 12
Country: Number of subjects enrolled	France: 16
Country: Number of subjects enrolled	Germany: 18
Country: Number of subjects enrolled	Italy: 39
Country: Number of subjects enrolled	Spain: 30
Worldwide total number of subjects	117
EEA total number of subjects	103

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0

Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	40
From 65 to 84 years	76
85 years and over	1

Subject disposition

Recruitment

Recruitment details:

The study was conducted from 16 April 2019 to 21 April 2023 at 25 sites in the United States of America (USA), France, Germany, Italy, Spain, and the United Kingdom.

Pre-assignment

Screening details:

Patients who met all the inclusion and none of the exclusion criteria were included in the study. The screening period was from Day -28 to Day -1. Informed consent form was signed prior to screening procedures.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Durvalumab ECOG PS 0 or 1

Arm description:

Patients received 1500 mg Durvalumab monotherapy via Intravenous (IV) infusion every 4 weeks (q4w).

Arm type	Experimental
Investigational medicinal product name	Durvalumab
Investigational medicinal product code	MEDI4736
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use, Intravenous drip use

Dosage and administration details:

Durvalumab 1500 mg was administered via IV infusion every 4 weeks.

Arm title	Durvalumab ECOG PS 2

Arm description:

Patients received 1500 mg Durvalumab monotherapy via IV infusion q4w.

Arm type	Experimental
Investigational medicinal product name	Durvalumab
Investigational medicinal product code	MEDI4736
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use, Intravenous drip use

Dosage and administration details:

Durvalumab 1500 mg was administered via IV infusion every 4 weeks.

Number of subjects in period 1	Durvalumab ECOG PS 0 or 1	Durvalumab ECOG PS 2
Started	114	3
Completed	56	1
Not completed	58	2
Adverse event, serious fatal	50	2
Consent withdrawn by subject	6	-
Lost to follow-up	2	-

Secondary: Progression-free survival (PFS)

End point title	Progression-free survival (PFS)

End point description:

The efficacy of Durvalumab (MEDI4736) treatment in terms of PFS. PFS was defined as the time from the first date of treatment until the date of objective disease progression based on Investigator's assessment according to RECIST 1.1 or death (by any cause in the absence of progression) regardless of whether the patient withdraws from IP or receives another anticancer therapy prior to progression.

Here, arbitrary value 9999.9999 represent not calculated due to low number of events as well as low sample size.
The safety analysis set consisted of all patients who received at least one dose of IP (partial or in full).

End point type	Secondary

End point timeframe:

From the first date of treatment until the date of objective disease progression or death (approximately upto 48 months)

End point values	Durvalumab ECOG PS 0 or 1	Durvalumab ECOG PS 2		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	114	3		
Units: Months				
median (confidence interval 95%)	13.1 (7.36 to 19.91)	3.7 (1.81 to 9999.9999)		

Statistical analyses

No statistical analyses for this end point

Secondary: Overall survival (OS)

End point title	Overall survival (OS)

End point description:

The efficacy of Durvalumab (MEDI4736) treatment in terms of OS were assessed. OS was defined as the time from the first date of treatment until death due to any cause. Any patient not known to have died at the time of analysis will be censored based on the last recorded date on which the patient was known to be alive.

Here, arbitrary value 9999.9999 represent not calculated due to low number of events as well as low sample size.

The safety analysis set consisted of all patients who received at least one dose of IP (partial or in full).

End point type	Secondary

End point timeframe:

From the first date of treatment until death due to any cause (approximately upto 48 months)

End point values	Durvalumab ECOG PS 0 or 1	Durvalumab ECOG PS 2		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	114	3		
Units: Months				
median (confidence interval 95%)	39.0 (30.59 to 9999.9999)	12.3 (4.96 to 9999.9999)		

Statistical analyses

No statistical analyses for this end point

Secondary: Percentage of patients progression-free at 12 months

End point title	Percentage of patients progression-free at 12 months

End point description:

The percentage of patients treated with Durvalumab who are progression-free was estimated. PFS12 according to RECIST 1.1 as assessed by the Investigator.

The safety analysis set consisted of all patients who received at least one dose of IP (partial or in full).

End point type	Secondary

End point timeframe:

From the first date of treatment until the date of objective disease progression or death (upto 12 months)

End point values	Durvalumab ECOG PS 0 or 1	Durvalumab ECOG PS 2		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	114	3		
Units: Percentage of patient				
number (confidence interval 95%)	51.1 (41.29 to 60.02)	33.3 (0.90 to 77.41)		

Statistical analyses

No statistical analyses for this end point

Secondary: Percentage of patients alive

End point title	Percentage of patients alive

End point description:

Percentage of patients alive at 12 months, 24 months, and 36 months were estimated.

Here, arbitrary value 9999.9999 represent not calculated due to low number of events as well as low sample size.

The safety analysis set consisted of all patients who received at least one dose of IP (partial or in full).

End point type	Secondary

End point timeframe:

From the first date of treatment until the date of objective disease progression or death (12 months, 24 months, and 36 months)

End point values	Durvalumab ECOG PS 0 or 1	Durvalumab ECOG PS 2		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	114	3		
Units: Percentage of patient				
number (confidence interval 95%)				
Survival at 12 months	83.9 (75.73 to 89.57)	66.7 (5.41 to 94.52)		
Survival at 24 months	68.2 (58.54 to 76.00)	33.3 (0.90 to 77.41)		
Survival at 36 months	57.2 (46.94 to 66.20)	9999.9999 (9999.9999 to 9999.9999)		

Statistical analyses

No statistical analyses for this end point

Secondary: Objective Response Rate (ORR)

End point title	Objective Response Rate (ORR)

End point description:

Objective response is complete response (CR), or partial response (PR) confirmed by a follow-up visit at least 4 weeks after. Both visits contributing to response should have occurred before any further anti-cancer therapy, in order for the patient to be considered a responder. Responses that occurred after the start of subsequent anti-cancer therapy were not included in the numerator. Response excluded unconfirmed response. Participants with unconfirmed responses include those whose CR, or PR don't have a confirmed response. These responses occur at any time during the study, recur after anti-cancer therapy, and these participants were missing for a follow-up visit 4 weeks after.
Here, arbitrary value 9999.9999 represent not applicable.

The safety analysis set consisted of all patients who received at least one dose of IP (partial or in full).

End point type	Secondary

End point timeframe:

From 8 weeks ±1 week after investigational product (IP) treatment initiation and continue every 8 weeks (q8w) ±1 week through 52 weeks and every 12 weeks (q12w) ±1 week until disease progression (approximately upto 48 months)

End point values	Durvalumab ECOG PS 0 or 1	Durvalumab ECOG PS 2		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	114	3		
Units: Participants				
Number of patients with response	24	0		
Number of patients with unconfirmed response	5	0		

Statistical analyses

No statistical analyses for this end point

Secondary: Duration of Response (DOR) from onset of response

End point title	Duration of Response (DOR) from onset of response

End point description:

The efficacy of Durvalumab (MEDI4736) treatment in terms of DoR were assessed. DoR was defined as the time from the date of first documented response per RECIST1.1 until the first date of documented progression per RECIST1.1 or death in the absence of disease progression. If a patient did not progress following a response, then the patients' DoR was censored at the PFS censoring time.

Here, arbitrary value 9999.9999 represent not applicable - Not calculated due to insufficient number of events.

The safety analysis set consisted of all patients who received at least one dose of IP (partial or in full). The patients with objective response were evaluated.

End point type	Secondary

End point timeframe:

From 8 weeks ±1 week after IP treatment initiation and continue q8w ±1 week through 52 weeks and q12w ±1 week until disease progression (approximately upto 48 months)

End point values	Durvalumab ECOG PS 0 or 1	Durvalumab ECOG PS 2		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	24	0[1]		
Units: Weeks				
median (confidence interval 95%)	9999.9999 (9999.9999 to 9999.9999)	(to)		

Notes:

[1] - Not calculated due to insufficient number of events.

Statistical analyses

No statistical analyses for this end point

Secondary: Lung cancer mortality

End point title	Lung cancer mortality

End point description:

The efficacy of durvalumab (MEDI4736) treatment in terms of lung cancer mortality was assessed. Lung Cancer Mortality was defined as the time from the date of treatment start until death due to lung cancer. Any patient not known to have died due to lung cancer will be censored based on the last recorded date on which the patient was known to be alive or died due to reason other than lung cancer.

Here, arbitrary value 9999.9999 represent not applicable - Not calculated due to insufficient number of events.

The safety analysis set consisted of all patients who received at least one dose of IP (partial or in full). Patients who had died due to causes related to non-small cell lung cancer were evaluated.

End point type	Secondary

End point timeframe:

From date of treatment start until death due to lung cancer (approximately upto 48 months)

End point values	Durvalumab ECOG PS 0 or 1	Durvalumab ECOG PS 2

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
17 July 2019	Section 5.1 (Inclusion criteria): Reference to hepatic metastasis alanine aminotransferase and aspartate aminotransferase limits for patients with hepatic metastases has been removed as patients are required to have non-metastatic disease. Section 5.1 and 5.2 (Eligibility criteria): Eligibility criteria have been updated to allow gemcitabine in combination with cisplatin or carboplatin as a prior sCRT treatment, provided there is no overlap between chemotherapy and radiation. Section 8.2.1 (Haematology safety laboratory assessments): Clarification of language related to coagulation testing at baseline on Day 1. Section 8.4.5.1 (Toxicity management related to durvalumab) and Appendix G: Section has been updated to reflect that Toxicity Management Guidelines (TMGs) are now provided as an Annex to the Protocol. Appendix G has been removed.
20 April 2020	Section 1.1 (Synopsis), Section 1.2, Table 1 (SoA), Section 1.3 (Figure 1), Section 4.1 (Overall Design), Section 4.1 (Overall Design) Figure 2, Section 4.2.5 (Timing of treatment with durvalumab (MEDI4736) relative to sequential chemoradiation therapy), Section 5.1 (Inclusion Criteria), Section 9.2 (Sample Size Determination) Table 13: The time window from end of sCRT to first dose of IP was extended from 28 to 42 days. Section 1.2, Table 1, Footnote l (SoA): The frequency of on study pregnancy testing was changed from “every 4 weeks” to “prior to every dosing visit (within 3 calendar days prior to dosing in line with other laboratory tests)”. Section 5.1 (Inclusion Criterion 7): Inclusion criterion 7 was amended to supplement guidance on acceptable baseline imaging. It was added that assessment of tumour response should be performed based on the latest scan performed per physician assessment/criteria). If the patient has an intermediate scan between chemotherapy and radiotherapy, this scan should be used as baseline scan provided it fulfils the RECIST-defined CT imaging acquisition parameters. Section 5.2 (Exclusion Criterion 11, option (a)): It was added to exclusion criterion 11 that patients with ≥Grade 2 lymphopenia will be evaluated on a case-by-case basis after consultation with the Study Physician. Section 8.2.2 (Physical Examination): Clarification was made that targeted physical examinations during the treatment cycles are not expected in asymptomatic patients. Section 8.2.3 (Vital Signs): Clarification that respiratory rate and temperature measurements are part of the vital signs assessments. Section 9.2 (Sample Size Determination): The sample size per cohort was changed: WHO/ECOG PS 0 to 1 cohort from 120 to 100-120 patients and WHO/ECOG PS 2 cohort from 30 to up to 30, depending on recruitment.

06 July 2021	Section 1.1 (Synopsis), Section 3 (Study objectives), Table 3 footnote: It was clarified that TRAEs and PRAEs are used interchangeably and PRAEs will be reported in the SAP, Tables, Figures, and Listings, and CSR Section 1.1 (Synopsis, Treatments and treatment duration), Section 4.1 (Overall design, Figure 2), and Section 6.1.2 (Dose and treatment regimens): It was clarified that treatment for up to a maximum of 24 months is referring to a maximum of 24 months from Cycle 1 Day 1. Section 4.1 (Overall design, Investigational product, dosage and mode of administration): It was clarified that treatment is for a maximum of 24 months from Cycle 1 Day 1. Section 6.1.1 (Investigational product, Preparation of durvalumab (MEDI4736) doses for administration with an IV bag) and Section 8.2.3 (Vital signs): A time window of ±10 minutes for the durvalumab infusion time was added based on latest AstraZeneca durvalumab protocol template. Section 6.1.3 (Treatment after the end of the study, Treatment after final overall survival data cut-off): The misleading sentence that no OS data will be recorded in the study database after DCO was deleted and it was clarified that in this section the DCO is referring to the final DCO Section 8.3.13 (Safety data to be collected following the final data cut-off of the study): It was clarified that in this section the DCO is referring to the final DCO. Section 8.4.1 (Reporting of serious adverse events): The guidance on how to proceed if the WBDC system is unavailable was updated to match the safety handling plan. Section 8.4.5.1 (Specific toxicity management and dose modification information – Durvalumab and durvalumab + tremelimumab): The reference to the website containing the current Dosing Modification and Toxicity Management Guidelines was removed.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
