Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	03 January 2020
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	24 October 2019
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective of the study was to establish preliminary safety and tolerability of single-and multiple-ascending oral doses of Danicamtiv in ambulatory patient

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and in compliance with all International Conference on Harmonization Good Clinical Practice Guidelines. All the local regulatory requirements pertinent to safety of trial participants were followed.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	06 February 2018
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 42
Country: Number of subjects enrolled	Netherlands: 5
Country: Number of subjects enrolled	Sweden: 3
Country: Number of subjects enrolled	United Kingdom: 1
Country: Number of subjects enrolled	Germany: 1
Worldwide total number of subjects	52
EEA total number of subjects	9

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	39

From 65 to 84 years	13
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

52 participants randomized and treated

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	SAD Cohort 1
------------------	--------------

Arm description:

Participants received 3 double-blinded single ascending doses in random sequence (1 placebo, Danicamtiv 175mg and Danicamtiv 350mg) in Period A, B, and C with intervals between doses ranging from 3 to 14 days. Some participants received a fourth single dose of Danicamtiv ranging between 350mg-550mg in the optional open-label period D

Arm type	Experimental
Investigational medicinal product name	Danicamtiv
Investigational medicinal product code	MYK-491
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

175mg single-dose

Investigational medicinal product name	Danicamtiv
Investigational medicinal product code	MYK-491
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

350mg single-dose

Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Placebo single-dose

Investigational medicinal product name	Danicamtiv
Investigational medicinal product code	MYK-491
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

450mg single-dose divided to 2 administrations

Investigational medicinal product name	Danicamtiv
Investigational medicinal product code	MYK-491
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
525mg single-dose	
Investigational medicinal product name	Danicamtiv
Investigational medicinal product code	MYK-491
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
550mg single-dose divided to 2 administrations	
Arm title	SAD Cohort 2
Arm description:	
Participants received 3 double-blinded single ascending doses in random sequence (1 placebo, Danicamtiv 400mg and Danicamtiv 500mg) in Period A, B, and C with intervals between doses ranging from 3 to 14 days	
Arm type	Experimental
Investigational medicinal product name	Danicamtiv
Investigational medicinal product code	MYK-491
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
400mg single-dose	
Investigational medicinal product name	Danicamtiv
Investigational medicinal product code	MYK-491
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
500mg single-dose	
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
Placebo single-dose	
Arm title	MAD Cohort 1
Arm description:	
Participants received single-blinded placebo twice daily for 2 days. Participants then received double-blinded Danicamtiv 75mg (fasting) twice daily for 7 days, and 2 days of monitoring following the last dose before discharge.	
Arm type	Experimental
Investigational medicinal product name	Danicamtiv
Investigational medicinal product code	MYK-491
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:	
75mg (fasting) BID for 7 days	
Investigational medicinal product name	Placebo
Investigational medicinal product code

Notes:

[1] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: This is for the number of participants completed treatment in period D only

[2] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: This is for the number of participants completed treatment in period D only

[3] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: This is for the number of participants completed treatment in period D only

[4] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: This is for the number of participants completed treatment in period D only

[5] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: This is for the number of participants completed treatment in period D only

[6] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: This is for the number of participants completed treatment in period D only

[7] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: This is for the number of participants completed treatment in period D only

[8] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: This is for the number of participants completed treatment in period D only

[9] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: This is for the number of participants completed treatment in period D only

[10] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: This is for the number of participants completed treatment in period D only

[11] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: This is for the number of participants completed treatment in period D only

[12] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: This is for the number of participants completed treatment in period D only

[13] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse Events and Serious Adverse Events were monitored from first dose to 30 days post last dose (Up to 2 months). Participants were assessed for All-cause mortality from their date of randomization to study completion (Up to approximately 20 months)

Assessment type	Systematic

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
12 February 2018	Update inclusion/exclusion criteria and study design
11 July 2018	Update inclusion/exclusion criteria and study design
14 December 2018	Update exclusion/inclusion criteria and clarify study design
19 March 2019	Update inclusion criteria

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
