Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Interim
Date of interim/final analysis	21 April 2022
Is this the analysis of the primary completion data?	Yes
Primary completion date	21 April 2022
Global end of trial reached?	No

Notes:

General information about the trial

Main objective of the trial:

The main purpose of Part 1 of the study is to determine the dose of atezolizumab (atezo) given as subcutaneous (SC) injection that is predicted to yield drug exposure that is comparable to that of atezolizumab intravenous (IV) infusion. The purpose of Part 2 of the study is to demonstrate non-inferiority of exposure to atezolizumab SC compared with atezolizumab IV.

Protection of trial subjects:

All participants were required to sign the informed consent form (ICF).

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	21 December 2018
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Korea, Republic of: 5
Country: Number of subjects enrolled	New Zealand: 17
Country: Number of subjects enrolled	Spain: 37
Country: Number of subjects enrolled	France: 7
Country: Number of subjects enrolled	United Kingdom: 2
Country: Number of subjects enrolled	Italy: 2
Country: Number of subjects enrolled	Latvia: 13
Country: Number of subjects enrolled	Poland: 11
Country: Number of subjects enrolled	Chile: 50
Country: Number of subjects enrolled	China: 10
Country: Number of subjects enrolled	Thailand: 69
Country: Number of subjects enrolled	Argentina: 7
Country: Number of subjects enrolled	Brazil: 22
Country: Number of subjects enrolled	Costa Rica: 8
Country: Number of subjects enrolled	Guatemala: 7
Country: Number of subjects enrolled	Mexico: 8
Country: Number of subjects enrolled	Peru: 18
Country: Number of subjects enrolled	Greece: 9
Country: Number of subjects enrolled	Hungary: 7
Country: Number of subjects enrolled	Russian Federation: 44
Country: Number of subjects enrolled	Turkey: 54
Country: Number of subjects enrolled	Ukraine: 28

Country: Number of subjects enrolled	South Africa: 3
Worldwide total number of subjects	438
EEA total number of subjects	86

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	229
From 65 to 84 years	207
85 years and over	2

Subject disposition

Recruitment

Recruitment details:

A total of 438 cancer immunotherapy (CIT)-naïve participants with non-small cell lung cancer (NSCLC) who failed prior platinum-based therapy took part in the study in 24 countries from 21 Dec 2018 to 21 Apr 2022. The study is ongoing.

Pre-assignment

Screening details:

The study has 2 parts-Part 1 and Part 2. Participants received atezolizumab [co-mixed with recombinant human hyaluronidase (rHuPH20)] at the assigned dose as SC and IV in Part 1 and atezolizumab [co-formulated with recombinant human hyaluronidase (rHuPH20)] as SC or IV in Part 2.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Part 1 Cohort 1: Atezo SC 1800 mg then Atezo 1200mg IV

Arm description:

Participants received 1800 milligrams (mg) of atezolizumab co-mixed with rHuPH20 as SC injection on Day 1 of Cycle 1 (1 cycle=21 days), followed by 1200 mg of atezolizumab as intravenous (IV) infusion every 3 weeks (Q3W) on Day 1 of subsequent cycles until disease progression, loss of clinical benefit, unacceptable toxicity, or withdrawal of consent.

Arm type	Experimental
Investigational medicinal product name	rHuPH20
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

rHuPH20 will be administered as per the schedule specified in the cohort 1 for Part 1.

Investigational medicinal product name	Atezolizumab
Investigational medicinal product code	RO5541267/F01
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Atezolizumab SC co-mix 1800 mg on Day 1 of Cycle 1.

Investigational medicinal product name	Atezolizumab
Investigational medicinal product code	RO5541267
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Atezolizumab IV 1200 mg, Q3W, from Day 1 Cycle 2 for all subsequent cycles.

Arm title	Part 1 Cohort 2: Atezo SC 1200 mg Q2W, then Atezo 1200mg IV
------------------	---

Arm description:

Participants received 1200 mg of atezolizumab co-mixed with rHuPH20, as SC injection, every two

weeks (Q2W), for 3 cycles (Cycle 1-3=14 days), followed by 1200 mg of atezolizumab as IV infusion, Q3W, on Day 1 of subsequent cycles (1 cycle=21 days) until disease progression, loss of clinical benefit, unacceptable toxicity, or withdrawal of consent.

Arm type	Experimental
Investigational medicinal product name	Atezolizumab
Investigational medicinal product code	RO5541267/F01
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Subcutaneous use

Dosage and administration details:

Atezolizumab SC co-mix 1200 mg Q2W for Cycles 1-3.

Investigational medicinal product name	Atezolizumab
Investigational medicinal product code	RO5541267
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Atezolizumab IV 1200 mg, Q3W, from Day 1 of Cycle 4 onwards for all subsequent cycles.

Investigational medicinal product name	rHuPH20
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

rHuPH20 will be administered as per the schedule specified in the cohort 2 for Part 1.

Arm title	Part 1 Cohort 3: Atezo SC 1800 mg Q3W then Atezo 1200 mg IV
------------------	---

Arm description:

Participants received 1800 mg of atezolizumab co-mixed with rHuPH20, as SC injection, every 3 weeks (Q3W), for 3 cycles (1 cycle=21 days), followed by 1200 mg of atezolizumab IV injection Q3W on Day 1 for subsequent cycles until disease progression, loss of clinical benefit, unacceptable toxicity, or withdrawal of consent.

Arm type	Experimental
Investigational medicinal product name	Atezolizumab
Investigational medicinal product code	RO5541267/F01
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Atezolizumab SC co-mix 1800 on Day 1 of Cycles 1-3.

Investigational medicinal product name	Atezolizumab
Investigational medicinal product code	RO5541267
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Atezolizumab IV 1200 mg, Q3W, from Day 1 of Cycle 4 onwards for all subsequent cycles.

Investigational medicinal product name	rHuPH20
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

rHuPH20 will be administered as per the schedule specified in the cohort 3 for Part 1.

Arm title	Part 2: Atezolizumab IV 1200 mg
------------------	---------------------------------

Arm description:

Participants will receive 1200 mg of atezolizumab, as IV infusion, Q3W, on Day 1 of each 21-day cycle until disease progression, loss of clinical benefit, or unacceptable toxicity.

Arm type	Experimental
Investigational medicinal product name	Atezolizumab
Investigational medicinal product code	RO5541267/F03
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Atezolizumab IV 1200 mg Q3W on Day 1 of each 21 day cycle.

Arm title	Part 2: Atezolizumab SC 1875 mg
------------------	---------------------------------

Arm description:

Participants will receive 1875 mg of atezolizumab co-formulated with rHuPH20, as SC injection, on Day 1 of each 21-day cycle until disease progression, loss of clinical benefit, or unacceptable toxicity.

Arm type	Experimental
Investigational medicinal product name	Atezolizumab
Investigational medicinal product code	RO5541267/F01
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Atezolizumab co-formulated with rHuPH20, SC 1875 mg Q3W on each 21 day cycle.

End points

End points reporting groups

Reporting group title	Part 1 Cohort 1: Atezo SC 1800 mg then Atezo 1200mg IV
Reporting group description: Participants received 1800 milligrams (mg) of atezolizumab co-mixed with rHuPH20 as SC injection on Day 1 of Cycle 1 (1 cycle=21 days), followed by 1200 mg of atezolizumab as intravenous (IV) infusion every 3 weeks (Q3W) on Day 1 of subsequent cycles until disease progression, loss of clinical benefit, unacceptable toxicity, or withdrawal of consent.	
Reporting group title	Part 1 Cohort 2: Atezo SC 1200 mg Q2W, then Atezo 1200mg IV
Reporting group description: Participants received 1200 mg of atezolizumab co-mixed with rHuPH20, as SC injection, every two weeks (Q2W), for 3 cycles (Cycle 1-3=14 days), followed by 1200 mg of atezolizumab as IV infusion, Q3W, on Day 1 of subsequent cycles (1 cycle=21 days) until disease progression, loss of clinical benefit, unacceptable toxicity, or withdrawal of consent.	
Reporting group title	Part 1 Cohort 3: Atezo SC 1800 mg Q3W then Atezo 1200 mg IV
Reporting group description: Participants received 1800 mg of atezolizumab co-mixed with rHuPH20, as SC injection, every 3 weeks (Q3W), for 3 cycles (1 cycle=21 days), followed by 1200 mg of atezolizumab IV injection Q3W on Day 1 for subsequent cycles until disease progression, loss of clinical benefit, unacceptable toxicity, or withdrawal of consent.	
Reporting group title	Part 2: Atezolizumab IV 1200 mg
Reporting group description: Participants will receive 1200 mg of atezolizumab, as IV infusion, Q3W, on Day 1 of each 21-day cycle until disease progression, loss of clinical benefit, or unacceptable toxicity.	
Reporting group title	Part 2: Atezolizumab SC 1875 mg
Reporting group description: Participants will receive 1875 mg of atezolizumab co-formulated with rHuPH20, as SC injection, on Day 1 of each 21-day cycle until disease progression, loss of clinical benefit, or unacceptable toxicity.	

Primary: Part 1: Serum Trough Concentration (Ctrough) of Atezolizumab at Cycle 1

End point title	Part 1: Serum Trough Concentration (Ctrough) of Atezolizumab at Cycle 1 ^[1] [2]
End point description: Pharmacokinetic (PK)-evaluable population included all participants who received at least one dose of atezolizumab and had at least 1 evaluable post dose PK sample and did not have protocol deviations that could affect PK results. Overall number analysed is the number of participants with data available for analysis.	
End point type	Primary
End point timeframe: Pre-dose on Day 1 of Cycle 2 (Cycle length=21 days for cohorts 1 and 3 and 14 days for cohort 2)	
Notes: [1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point. Justification: Descriptive statistics were not planned for this endpoint. [2] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period. Justification: The endpoint is specific for Part 2 and hence included only Part 2 arms.	

End point values	Part 1 Cohort 1: Atezo SC 1800 mg then Atezo 1200mg IV	Part 1 Cohort 2: Atezo SC 1200 mg Q2W, then Atezo 1200mg IV	Part 1 Cohort 3: Atezo SC 1800 mg Q3W then Atezo 1200 mg IV

End point title	Part 2: Functioning and Global Health Status Over Time, as assessed by European Organization for Research and Treatment of Cancer (EORTC) Item Library (IL)57 ^[31]
-----------------	---

End point description:

EORTC IL57 questionnaire has 10 items and covers 3 scales: physical functioning (PF), role functioning (RF) & global health status/quality of life (GHS/QoL) & 1 item from EORTC Item Library. PF scale has 5 items evaluating the extent to which participants have trouble doing strenuous activities; taking long walks & short walks; need to stay in bed or a chair; need help with eating, dressing, bathing/using toilet. RF scale has 2 items evaluating extent to which participants are limited in doing work & pursuing leisure activities in previous week. GHS/QoL scale has 2 items evaluating participants' overall health & QoL in previous week. Questions are answered on a 4-point Likert scale (where 1="Not at all" to 4="Very much") for physical and role functioning & a 7-point scale (where 1="Very poor" to 7="Excellent") for GHS/QoL. For each scale, mean of the items are linearly transformed to obtain scores from 0-100, where 100 =best possible score. Higher score = better outcome.

Statistical analyses

No statistical analyses for this end point

Secondary: Part 2: Convenience, Potential Time Savings, and Overall Satisfaction with Atezolizumab SC Compared with Atezolizumab IV as Assessed Using HCP Subcutaneous Versus IV Perspective Questionnaire

End point title	Part 2: Convenience, Potential Time Savings, and Overall Satisfaction with Atezolizumab SC Compared with Atezolizumab IV as Assessed Using HCP Subcutaneous Versus IV Perspective Questionnaire ^[46]
-----------------	---

End point description:

HCP Subcutaneous Versus IV Perspective Questionnaire consists of five items evaluating the number of atezolizumab SC and IV administrations done, convenience, potential time savings, and overall satisfaction with atezolizumab SC and atezolizumab IV, as well as reasons for HCP-reported satisfaction or dissatisfaction. Data collection is still ongoing and the results will be disclosed within 1 year from the Study Completion Date.

End point type	Secondary
----------------	-----------

End point timeframe:

After HCP has completed administering at least 3 doses of atezolizumab SC and IV across all participants in Part 2 (Up to approximately 72 months)

Notes:

[46] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: The endpoint is specific for Part 2 and hence included only Part 2 arms. Data collection is ongoing and results will be disclosed within 1 year from Study Completion Date.

End point values	Part 2: Atezolizumab IV 1200 mg	Part 2: Atezolizumab SC 1875 mg		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	0 ^[47]	0 ^[48]		
Units: participants				
number (not applicable)				

Notes:

[47] - Data collection is ongoing and results will be disclosed within 1 year from Study Completion Date.

[48] - Data collection is ongoing and results will be disclosed within 1 year from Study Completion Date.

Statistical analyses

No statistical analyses for this end point

Adverse events

Adverse events information

Timeframe for reporting adverse events:

From signing of ICF to primary completion date (Up to approximately 40 months)

Adverse event reporting additional description:

Safety-evaluable population included all participants who received at least one dose of atezolizumab (atezolizumab SC or atezolizumab IV).

Assessment type	Systematic

Reporting groups

Reporting group title	Part 1 Cohort 1: Atezo SC 1800 mg Co-mix
-----------------------	--

Reporting group description:

Participants received 1800 mg of atezolizumab co-mixed with rHuPH20, as SC injection on Day 1 of Cycle 1 (1 cycle=21 days), followed by 1200 mg of atezolizumab as IV infusion Q3W on Day 1 of subsequent cycles until disease progression, loss of clinical benefit, unacceptable toxicity, or withdrawal of consent.

Reporting group title	Part 1 Cohort 2: Atezolizumab SC 1200mg, Q2W, Co-mix
-----------------------	--

Reporting group description:

Participants received 1200 mg of atezolizumab co-mixed with rHuPH20, as SC injection, every two weeks (Q2W) on Day 1 of the first 3 cycles (Cycle 1-3=14 days), followed by 1200 mg of atezolizumab as IV infusion, Q3W, on Day 1 of subsequent cycles (1 cycle=21 days) until disease progression, loss of clinical benefit, unacceptable toxicity, or withdrawal of consent.

Reporting group title	Part 2: Atezolizumab SC 1875 mg
-----------------------	---------------------------------

Reporting group description:

Participants will receive 1875 mg of atezolizumab co-formulated with rHuPH20, as SC injection, on Day 1 of each 21-day cycle until disease progression, loss of clinical benefit, or unacceptable toxicity.

Reporting group title	Part 2: Atezolizumab IV 1200 mg
-----------------------	---------------------------------

Reporting group description:

Participants will receive 1200 mg of atezolizumab, as IV infusion, Q3W, on Day 1 of each 21-day cycle until disease progression, loss of clinical benefit, or unacceptable toxicity.

Reporting group title	Part 1 Cohort 3: Atezolizumab SC 1800 mg, Q3W, Co-mix
-----------------------	---

Reporting group description:

Participants received 1800 mg of atezolizumab co-mixed with rHuPH20, as SC injection, every 3 weeks (Q3W) on Day 1, for 3 cycles (1 cycle=21 days), followed by 1200 mg of atezolizumab IV injection Q3W on Day 1 for subsequent cycles until disease progression, loss of clinical benefit, unacceptable toxicity, or withdrawal of consent.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
01 June 2019	<p>Subcutaneous site of first drug administration for Cohort 3 was changed from thigh to abdomen to accommodate patient convenience, increased patient privacy, and possible administration of higher drug volume.</p> <p>Study drug dosage for Cohort 3 was changed from 2400 mg Q4W to 1800 mg Q3W to assess the alternate administration site (abdomen).</p> <p>Enrollment for Cohort 3 was increased to approximately 20-30 patients to provide enough participants who could be assessed for feasibility of abdominal administration.</p>
30 March 2020	No changes impacted study conduct.
28 August 2020	A randomized control arm comprising of patients treated with atezolizumab IV as per standard of care was added in Part 2. Investigational treatment in Part 2 was modified to atezolizumab monotherapy and inclusion criteria modified to include patients in whom platinum therapy had failed, to allow for assessment of atezolizumab SC without confounding factors associated with use in combination with chemotherapy.
10 February 2021	<p>Subcutaneous site of first drug administration for Cohort 3 was changed from thigh to abdomen to accommodate patient convenience, increased patient privacy, and possible administration of higher drug volume. Study drug dosage for Cohort 3 was changed from 2400 mg Q4W to 1800 mg Q3W to assess the alternate administration site (abdomen).</p> <p>Enrollment for Cohort 3 was increased to approximately 20-30 patients to provide enough patients who could be assessed for feasibility of abdominal administration.</p>
25 February 2022	<p>Amendment 1: 1. Adverse event management guidelines have been updated to align with the atezolizumab investigator's brochure, version 18. 2. References to an extended recruitment in China have been removed. 3. Estimand language in Section 6.6.2 has been corrected to match the definition of Per Protocol PK analysis population provided in Section 6.2.2. 4. Benefit-risk assessment and guidance on concomitant administration of severe acute respiratory syndrome coronavirus 2 vaccines with atezolizumab has been added. 5. Medical term "primary biliary cirrhosis" has been replaced by the term "primary biliary cholangitis" to align with the updated preferred term in MedDRA. 6. Responsibilities of the Principal Investigator and the role of the medical monitor in determining patient eligibility have been clarified. 7. Other minor changes.</p>

07 February 2023	<p>The medical term “Wegener granulomatosis” has been replaced by the term “granulomatosis with polyangiitis” to align with the updated preferred term in MedDRA.</p> <ul style="list-style-type: none"> • The list of identified risks for atezolizumab has been revised to include pericardial disorders. • The list of identified risks for atezolizumab has been revised to include myelitis and facial paresis. • Hemophagocytic lymphohistiocytosis has been updated from a potential risk to an identified risk associated with atezolizumab and language has been revised accordingly. • The list of adverse events of special interest has been revised to include myelitis and facial paresis. • A description of the technical and organizational security measures taken to protect personal data has been added to align with CTR requirements. • Appendix 8 has been revised to indicate that caution should be used when considering atezolizumab for participants who have previously experienced a pericardial disorder while receiving another immunostimulatory anti-cancer agent. • Appendix 8 has been revised to include autoimmune myelitis. • The adverse event management guidelines have been updated to align with the Addendum 1 and the Addendum 2 to the Atezolizumab Investigator’s Brochure, Version 19.
