

Clinical trial results:

A Phase 2a, 2-part, Open-label, Non-randomized, Multicenter, Single and Multiple Dose Trial to Evaluate Pharmacokinetics, Safety and Tolerability of Ceftazidime and Avibactam in Neonates and Infants from Birth to Less than 3 Months of Age with Suspected or Confirmed Infections Due to Gram-negative Pathogens Requiring Intravenous Antibiotic Treatment Summary

EudraCT number	2018-002800-16
Trial protocol	SK HU EE GR IT
Global end of trial date	23 July 2022

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-001313-PIP01-12
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	30 December 2022
Is this the analysis of the primary completion data?	Yes
Primary completion date	23 July 2022
Global end of trial reached?	Yes
Global end of trial date	23 July 2022
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

To characterize the pharmacokinetics (PK) of a single intravenous dose of CAZ-AVI in hospitalized neonates and infants from birth to less than 3 months.

To evaluate the safety and tolerability of a single intravenous dose of CAZ-AVI in hospitalized neonates and infants from birth to less than 3 months.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and in compliance with all International Council for Harmonization (ICH) Good Clinical Practice (GCP) Guidelines. All the local regulatory requirements pertinent to safety of trials subjects were followed.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	14 January 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Hungary: 3
Country: Number of subjects enrolled	Italy: 11
Country: Number of subjects enrolled	Estonia: 2
Country: Number of subjects enrolled	Slovakia: 2
Country: Number of subjects enrolled	Taiwan: 4
Country: Number of subjects enrolled	United States: 7
Country: Number of subjects enrolled	Greece: 17
Worldwide total number of subjects	46
EEA total number of subjects	35

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	15
Newborns (0-27 days)	12
Infants and toddlers (28 days-23	19

months)	
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

A total of 52 subjects were screened, 4 subjects were screen failures and 48 were enrolled to the study. 27 subjects in Part A and 21 subjects in Part B. Out of which 2 subjects were not treated from Part A. 46 subjects were assigned to a treatment.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Part A: Cohort 1

Arm description:

On Day 1 subjects aged 28days to less than (<) 3 months old received a single intravenous (IV) infusion of ceftazidime-avibactam (CAZ-AVI) 30 milligrams per kilogram (mg/kg) CAZ and 7.5 mg/kg AVI over a 2-hour (+/-10 min) period.

Arm type	Experimental
Investigational medicinal product name	Avibactam
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

7.5 mg/kg

Investigational medicinal product name	Ceftazidime
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

30 mg/kg

Arm title	Part A: Cohort 2
------------------	------------------

Arm description:

On Day 1 subjects aged greater than or equal to(>=) 37weeks and less than or equal to (<=) 28 days old received a single IV infusion of CAZ-AVI 20 mg/kg CAZ and 5.0 mg/kg AVI over a 2-hour (+/-10 min) period.

Arm type	Experimental
Investigational medicinal product name	Avibactam
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

5 mg/kg

Investigational medicinal product name	Ceftazidime
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use
Dosage and administration details:	
20 mg/kg	
Arm title	Part A: Cohort 3
Arm description:	
On Day 1 subjects aged ≥ 26 week to < 37 week and ≤ 28 days old received a single IV infusion of CAZ-AVI 20 mg/kg CAZ and 5.0 mg/kg AVI over a 2-hour (+/-10 min) period.	
Arm type	Experimental
Investigational medicinal product name	Ceftazidime
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use
Dosage and administration details:	
20 mg/kg	
Investigational medicinal product name	Avibactam
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use
Dosage and administration details:	
5 mg/kg	
Arm title	Part B: Cohort 1
Arm description:	
On Day 1 subjects aged 28 days to < 3 months old received a single IV infusion of CAZ-AVI 30 milligrams per kilogram (mg/kg) CAZ and 7.5 mg/kg AVI over a 2-hour (+/-10 min) period every 8 hours (+/-1 hour).	
Arm type	Experimental
Investigational medicinal product name	Avibactam
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use
Dosage and administration details:	
7.5 mg/kg	
Investigational medicinal product name	Ceftazidime
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use
Dosage and administration details:	
30 mg/kg	
Arm title	Part B: Cohort 2
Arm description:	
On Day 1 subjects aged ≥ 37 week and ≤ 28 days old received a single IV infusion of CAZ-AVI 20 mg/kg CAZ and 5.0 mg/kg AVI over 2-hour (+/-10 min) period every 8 hours (+/-1 hour).

An AE was any untoward medical occurrence in a subject who received study drug without regard to possibility of causal relationship. An SAE was an AE resulting in any of the following outcomes or deemed significant for any other reason: death; initial or prolonged in-patient hospitalization; life-threatening experience (immediate risk of dying); persistent or significant disability/incapacity; congenital anomaly. Treatment-emergent AEs were events between first dose of study drug and up to late follow-up (LFU) visit (28 to 35 days after last dose of study treatment [IV or oral]) that were absent before treatment or that worsened relative to pretreatment state. Safety analysis set for Part A included all subjects who received any amount of the investigational drug (CAZ-AVI) in the Part A.

End point type	Secondary
----------------	-----------

End point timeframe:

Day 1 up to maximum of Day 35 after the last dose of CAZ-AVI

Notes:

[15] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Only descriptive analysis was planned for this endpoint.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
27 June 2019	Primary purpose was to revise the enrollment sequence so Part B Cohort 3 would begin enrollment after data from the other cohorts was evaluated, as requested by the EMA Pediatric Committee (PDCO) on 19-Oct-2018.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
23 March 2020	Enrollment was paused at all sites due to COVID-19.	30 April 2020

Notes:

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

One subject died after the study in Part B: Cohort 1 group. This number was not included in the death number as it occurred after the study (more than 35 days after the last dose of the study drug).
--

Notes:
