

Clinical trial results:

A Phase Ib/II Study Evaluating the Safety and Efficacy of Idasanutlin in Combination with Cytarabine and Daunorubicin in Patients Newly Diagnosed with Acute Myeloid Leukemia (AML) and the Safety and Efficacy of Idasanutlin in the Maintenance of First AML Complete Remission

Summary

EudraCT number	2018-002964-25
Trial protocol	FR ES IT
Global end of trial date	10 August 2021

Results information

Result version number	v1 (current)
This version publication date	19 September 2021
First version publication date	19 September 2021

Trial information

Trial identification

Sponsor protocol code	GO40800
-----------------------	---------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

Sponsors

Sponsor organisation name	Hoffmann-La Roche
Sponsor organisation address	Grenzacherstrasse 124, Basel, Switzerland, +41
Public contact	Roche Trial Information Hotline, Roche Trial Information Hotline, +41 61 6878333,
Scientific contact	Medical Communications, Hoffmann-La Roche, CH-4070 800 8218590, genentech@druginfo.com

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	24 February 2021
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	10 August 2021
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

A Study Evaluating the Safety and Efficacy of Idasanutlin in Combination with Cytarabine and Daunorubicin in Patients Newly Diagnosed with Acute Myeloid Leukemia (AML) and the Safety and Efficacy of Idasanutlin in the Maintenance of First AML Complete Remission

Protection of trial subjects:

The study was conducted in accordance with the principles of the "Declaration of Helsinki" and Good Clinical Practice (GCP) guidelines according to the regulations and procedures described in the protocol.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	25 March 2019
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Australia: 4
Country: Number of subjects enrolled	France: 1
Country: Number of subjects enrolled	Italy: 1
Country: Number of subjects enrolled	United States: 17
Worldwide total number of subjects	23
EEA total number of subjects	2

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	18
From 65 to 84 years	5

85 years and over	0
-------------------	---

Subject disposition

Recruitment

Recruitment details:

24 subjects were enrolled from total of 40 subjects

Pre-assignment

Screening details:

A total of 40 patients were screened; 17 patients failed the screening and 23 patients were enrolled and treated from 11 centers from the following four countries including the USA (7 Centers), Australia (2 centers), France (1 Center), and Italy (1 Center)

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Dose-Escalation Cohort 1

Arm description:

For maintenance, participants were treated with single agent idasanutlin of 150mg

Arm type	Experimental
Investigational medicinal product name	Idasanutlin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

200 mg idasanutlin day 1 to day 5 in combination with cytarabine 200mg day 1 to day 7 and daunorubicin 60mg day 1 to day 3 in induction

Arm title	Dose Escalation Cohort 2
------------------	--------------------------

Arm description:

350mg idasanutlin day 1 to day 5 in combination with cytarabine 200mg day 1 to day 7 and daunorubicin 60mg day 1 to day 3 in induction

Arm type	Experimental
Investigational medicinal product name	Idasanutlin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

350mg idasanutlin day 1 to day 5 in combination with cytarabine 200mg day 1 to day 7 and daunorubicin 60mg day 1 to day 3 in induction

Arm title	Dose Escalation Cohort 3
------------------	--------------------------

Arm description:

For induction, participants will be treated with 250mg idasanultin plus cytarabine. For maintenance, participants will be treated with single agent idasanutlin of 150 mg

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Idasanutlin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

250mg idasanutlin day 1 to day 5 in combination with cytarabine 200mg day 1 to day 7 and daunorubicin 60mg day 1 to day 3 in induction

Arm title	Post Consolidation Cohort
------------------	---------------------------

Arm description:

Post consolidation cohort (experimental). 150mg idasanutlin day 1 to 5 in maintenance of first remission

Arm type	Experimental
Investigational medicinal product name	Idasnutlin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

150mg idasanutlin day 1 to 5 in maintenance of first remission

Number of subjects in period 1	Dose-Escalation Cohort 1	Dose Escalation Cohort 2	Dose Escalation Cohort 3
Started	4	9	6
Completed	0	0	0
Not completed	4	9	6
Sponsor's decision to terminate	4	9	6

Number of subjects in period 1	Post Consolidation Cohort
Started	4
Completed	0
Not completed	4
Sponsor's decision to terminate	4

Reporting groups

Reporting group title	DOSE ESCALATION COHORT 1
-----------------------	--------------------------

Reporting group description:

For induction, participants will be treated with idasanutlin plus cytarabine and daunorubicin. At the investigator's discretion for consolidation, either participants will be treated with idasanutlin and cytarabine or they will undergo Allo-HSCT. For maintenance, participants will be treated with single-agent idasanutlin of 200 mg

Reporting group title	POST CONSOLIDATION PHASE COHORT
-----------------------	---------------------------------

Reporting group description:

Participants who are idasanutlin treatment-naïve, had received induction and chemotherapy consolidation for AML outside of the study, and were in minimal residual disease (MRD)-positive remission after induction will be enrolled in this cohort to receive maintenance treatment with single-agent idasanutlin of 150 mg

Reporting group title	DOSE ESCALATION COHORT 3
-----------------------	--------------------------

Reporting group description:

For induction, participants will be treated with idasanutlin plus cytarabine and daunorubicin. At the investigator's discretion for consolidation, either participants will be treated with idasanutlin and cytarabine or they will undergo Allo-HSCT. For maintenance, participants will be treated with single-agent idasanutlin of 250 mg

Reporting group title	DOSE ESCALATION COHORT 2
-----------------------	--------------------------

Reporting group description:

For induction, participants will be treated with idasanutlin plus cytarabine and daunorubicin. At the investigator's discretion for consolidation, either participants will be treated with idasanutlin and cytarabine or they will undergo Allo-HSCT. For maintenance, participants will be treated with single-agent idasanutlin of 350 mg
