#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Interim
Date of interim/final analysis	30 June 2021
Is this the analysis of the primary completion data?	Yes
Primary completion date	11 May 2021
Global end of trial reached?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary purpose of this study is to evaluate the safety and efficacy of ravulizumab for the treatment of participants with generalized myasthenia gravis (gMG).

Protection of trial subjects:

This study was conducted in accordance with the protocol and with the following: • Consensus ethical principles derived from international guidelines including the Declaration of Helsinki and Council for International Organizations of Medical Sciences (CIOMS) International Ethical Guidelines • Applicable International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH) Good Clinical Practice (GCP) guidelines • Applicable laws and regulations

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	26 March 2019
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Canada: 6
Country: Number of subjects enrolled	Czechia: 8
Country: Number of subjects enrolled	Denmark: 8
Country: Number of subjects enrolled	France: 7
Country: Number of subjects enrolled	Germany: 14
Country: Number of subjects enrolled	Israel: 2
Country: Number of subjects enrolled	Italy: 13
Country: Number of subjects enrolled	Japan: 13
Country: Number of subjects enrolled	Netherlands: 4
Country: Number of subjects enrolled	Korea, Republic of: 18
Country: Number of subjects enrolled	Spain: 6
Country: Number of subjects enrolled	Switzerland: 2
Country: Number of subjects enrolled	United States: 74
Worldwide total number of subjects	175
EEA total number of subjects	60

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	115
From 65 to 84 years	60
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

Participants were randomized 1:1 to either the ravulizumab or placebo group during the Randomized-Controlled Period. Following the placebo-controlled part of the study, participants were transitioned to the ongoing Open-Label Extension Period to receive treatment with ravulizumab.

### Period 1

Period 1 title	Randomized-Controlled Period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Carer

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Ravulizumab

Arm description:

Participants received a weight-based single loading dose (2400 to 3000 milligrams [mg]) of ravulizumab intravenously (IV) on Day 1, followed by regular maintenance IV weight-based doses (3000 to 3600 mg) of ravulizumab beginning on Day 15 once every 8 weeks (q8w), during the 26-week Randomized-Controlled Period of the study. After the randomized-controlled part of the study, participants were transitioned to the ongoing open-label extension period to receive treatment with ravulizumab IV for up to 2 years.

Arm type	Experimental
Investigational medicinal product name	Ravulizumab
Investigational medicinal product code	
Other name	ALXN1210 Ultomiris
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Participants received ravulizumab at prespecified dose and timepoints.

<b>Arm title</b>	Placebo
------------------	---------

Arm description:

Participants received a weight-based single loading dose of placebo IV on Day 1, followed by regular maintenance IV weight-based doses of placebo beginning on Day 15 q8w, during the 26-week Randomized-Controlled Period of the study. After the randomized-controlled part of the study, participants were transitioned to the ongoing open-label extension period to receive treatment with ravulizumab IV for up to 2 years.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Participants received placebo at prespecified dose and timepoints.

Number of subjects in period 1	Ravulizumab	Placebo
Started	86	89
Received at Least 1 Dose of Study Drug	86	89
Completed	79	83
Not completed	7	6
Adverse event, serious fatal	2	-
Consent withdrawn by subject	2	1
Physician decision	1	2
Adverse event, non-fatal	-	2
Sponsor Decision	-	1
Protocol deviation	1	-
Noncompliance	1	-

## Period 2

Period 2 title	Open- Label Extension Period
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded

## Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Ravulizumab to Ravulizumab

### Arm description:

Participants received a weight-based single loading dose (2400 to 3000 milligrams [mg]) of ravulizumab intravenously (IV) on Day 1, followed by regular maintenance IV weight-based doses (3000 to 3600 mg) of ravulizumab beginning on Day 15 once every 8 weeks (q8w), during the 26-week Randomized-Controlled Period of the study. After the randomized-controlled part of the study, participants were transitioned to the ongoing open-label extension period to receive treatment with ravulizumab IV for up to 2 years.

Arm type	Experimental
Investigational medicinal product name	Ravulizumab
Investigational medicinal product code	
Other name	ALXN1210 Ultomiris
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

### Dosage and administration details:

Participants received ravulizumab at prespecified dose and timepoints.

<b>Arm title</b>	Placebo to Ravulizumab
------------------	------------------------

### Arm description:

Participants received a weight-based single loading dose of placebo IV on Day 1, followed by regular maintenance IV weight-based doses of placebo beginning on Day 15 q8w, during the 26-week Randomized-Controlled Period of the study. After the randomized-controlled part of the study, participants were transitioned to the ongoing open-label extension period to receive treatment with ravulizumab IV for up to 2 years.

Arm type	Placebo
----------	---------

Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Participants received placebo at prespecified dose and timepoints.

<b>Number of subjects in period 2<sup>[1]</sup></b>	Ravulizumab to Ravulizumab	Placebo to Ravulizumab
Started	78	83
Completed	60	63
Not completed	18	20
Consent withdrawn by subject	7	9
Physician decision	5	3
Subjects transitioned to other t/t by Investigator	3	5
Death	3	3

Notes:

[1] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: 1 participant in the Ravulizumab group withdrew from the study and did not enter the open label extension period.

## Baseline characteristics

### Reporting groups

Reporting group title	Ravulizumab
-----------------------	-------------

Reporting group description:

Participants received a weight-based single loading dose (2400 to 3000 milligrams [mg]) of ravulizumab intravenously (IV) on Day 1, followed by regular maintenance IV weight-based doses (3000 to 3600 mg) of ravulizumab beginning on Day 15 once every 8 weeks (q8w), during the 26-week Randomized-Controlled Period of the study. After the randomized-controlled part of the study, participants were transitioned to the ongoing open-label extension period to receive treatment with ravulizumab IV for up to 2 years.

Reporting group title	Placebo
-----------------------	---------

Reporting group description:

Participants received a weight-based single loading dose of placebo IV on Day 1, followed by regular maintenance IV weight-based doses of placebo beginning on Day 15 q8w, during the 26-week Randomized-Controlled Period of the study. After the randomized-controlled part of the study, participants were transitioned to the ongoing open-label extension period to receive treatment with ravulizumab IV for up to 2 years.

Reporting group values	Ravulizumab	Placebo	Total
Number of subjects	86	89	175

### Primary: Change From Baseline In Myasthenia Gravis-Activities Of Daily Living (MG-ADL) Total Score At Week 26

End point title	Change From Baseline In Myasthenia Gravis-Activities Of Daily Living (MG-ADL) Total Score At Week 26
End point description: MG-ADL: 8-point questionnaire focusing on relevant symptoms/functional performance of activities of daily living in participants with MG. The 8 items of MGADL questionnaire derived from symptom-based components of original 13-item QMG scale to assess disability secondary to ocular (2 items), bulbar (3 items), respiratory (1 item), and gross motor or limb (2 items) impairment related to effects from MG. In this functional status instrument, each response was graded 0 (normal)-3 (most severe). Range of total MG-ADL score: 0-24. Decrease in score indicated improvement. Estimates based on MMRM that included treatment group, stratification factor region, and MG-ADL total score at baseline, study visit, and study visit by treatment group interaction. Full Analysis Set: All randomized participants who received at least 1 dose of study drug.	
End point type	Primary

## Secondary: Change From Baseline In The Quantitative Myasthenia Gravis (QMG) Total Score At Week 26

End point title	Change From Baseline In The Quantitative Myasthenia Gravis (QMG) Total Score At Week 26
-----------------	-----------------------------------------------------------------------------------------

End point description:

The QMG scoring system consisted of 13 items: ocular (2 items), facial (1 item), bulbar (2 items), gross motor (6 items), axial (1 item), and respiratory (1 item); each graded 0 to 3, with 3 being the most severe. The range of total QMG score is 0 to 39. The QMG scoring system was considered to be an objective evaluation of therapy for MG and was based on quantitative testing of sentinel muscle groups. A decrease in score indicated improvement. Estimates were based on MMRM that included treatment group, stratification factor region, and QMG total score at baseline, study visit, and study visit by treatment group interaction. Full Analysis Set: All randomized participants who received at least 1 dose of study drug.

End point type	Secondary

### Secondary: Percentage of Participants With a Quantitative Myasthenia Gravis (QMG) Total Score Reduction of at Least 5 Points At Week 26

End point title	Percentage of Participants With a Quantitative Myasthenia Gravis (QMG) Total Score Reduction of at Least 5 Points At Week 26
-----------------	------------------------------------------------------------------------------------------------------------------------------

End point description:

The QMG scoring system consisted of 13 items: ocular (2 items), facial (1 item), bulbar (2 items), gross motor (6 items), axial (1 item), and respiratory (1 item); each graded 0 to 3, with 3 being the most severe. The range of total QMG score is 0 to 39. A decrease in score indicated improvement. Percentage of participants with a ≥5-point reduction in the QMG total score are reported. Estimates were based on a generalized linear mixed model (GLMM) that included treatment group, stratification factor region and QMG total score at baseline, study visit and study visit by treatment group interaction. Full Analysis Set: All randomized participants who received at least 1 dose of study drug.

End point type	Secondary

### Secondary: Change From Baseline In the Revised 15 Component Myasthenia Gravis Quality of Life (MG-QOL15r) At Week 26

End point title	Change From Baseline In the Revised 15 Component Myasthenia Gravis Quality of Life (MG-QOL15r) At Week 26
-----------------	-----------------------------------------------------------------------------------------------------------

End point description:

The revised Myasthenia Gravis Quality of Life 15-item scale (MG-QOL15r) is a health-related QoL evaluative instrument specific to participants with MG. MG-QOL15r was designed to provide information about participants' perception of impairment and disability, determine the degree to which disease manifestations are tolerated, and to be administered and interpreted easily. Each item was graded on a

scale of 0 to 2, with 2 being the most severe. The range of MG-QOL15r score is 0 to 30. Higher scores indicated greater extent of and dissatisfaction with MG-related dysfunction. Estimates are based on MMRM that included treatment group, stratification factor region and MG-QOL15r score at baseline, study visit and study visit by treatment group interaction. Full Analysis Set: All randomized participants who received at least 1 dose of study drug.

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
11 December 2018	The purpose of this amendment was to change duration of safety follow-up after last dose; add additional details on assessments, align pregnancy and clinical laboratory testing frequency with infusions; change supplemental dosing recommendations and sample collection when rescue therapy is provided; and update adverse event and pregnancy/contraception language.
25 October 2019	The purpose of this amendment was to revise secondary and exploratory endpoints, to decrease burden to participants by reduction in assessment and visit frequency, to provide additional guidance for supplemental dosing, and to clarify minor operational aspects of the protocol.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
