

Clinical trial results:

A phase II, multicenter, randomized, open-label study to evaluate the safety and efficacy of 400 mg of ribociclib in combination with non-steroidal aromatase inhibitors for the treatment of pre- and postmenopausal women with hormone receptor-positive, HER2-negative advanced breast cancer who received no prior therapy for advanced disease

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	30 August 2024
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	30 August 2024
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The purpose of the study was to evaluate the safety and efficacy of a reduced ribociclib starting dose of 400 mg in combination with a non-steroidal aromatase inhibitor (NSAI) (letrozole or anastrozole) for the treatment of pre- and postmenopausal women with hormone receptor-positive (HR-positive), HER2-negative advanced breast cancer (aBC) who have received no prior therapy for advanced disease. Premenopausal women were required to receive goserelin in both treatment arms.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	11 June 2019
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	252
From 65 to 84 years	119
85 years and over	5

Subject disposition

Recruitment

Recruitment details:

Participants were enrolled in 90 centers across 23 countries.

Pre-assignment

Screening details:

A total of 558 subjects were screened of which 376 participants were randomized on a 1:1 basis.

Period 1

Period 1 title	Treatment period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Ribociclib 400 mg
------------------	-------------------

Arm description:

Ribociclib 400 mg QD 3 weeks on/1 week off + letrozole or anastrozole (+goserelin in premenopausal women)

Arm type	Experimental
Investigational medicinal product name	Ribociclib
Investigational medicinal product code	
Other name	LEE011
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Ribociclib (at a dosage of 400 mg or 600 mg) QD orally taken on days 1 to 21 of a 28-day cycle, followed by 7 days off ribociclib (days 22 to 28). Ribociclib was supplied as 200 mg tablets as individual patient supply packaged bottles.

Investigational medicinal product name	Goserelin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Implant in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Goserelin 3.6 mg subcutaneously once every 4 weeks (pre-menopausal women only)

Investigational medicinal product name	Letrozole
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Letrozole 2.5 mg tablets for oral use QD continuously

Investigational medicinal product name	Anastrozole
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Anastrozole 1 mg tablets for oral use QD continuously

Arm title	Ribociclib 600 mg
Arm description: Ribociclib 600 mg QD 3 weeks on/1 week off + letrozole or anastrozole (+ goserelin in premenopausal women)	
Arm type	Active comparator
Investigational medicinal product name	Ribociclib
Investigational medicinal product code	
Other name	LEE011
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details: Ribociclib (at a dosage of 400 mg or 600 mg) QD orally taken on days 1 to 21 of a 28-day cycle, followed by 7 days off ribociclib (days 22 to 28). Ribociclib was supplied as 200 mg tablets as individual patient supply packaged bottles.

arithmetic mean (standard deviation)	12.5 (\pm 12.91)	19.7 (\pm 18.50)		

Statistical analyses

No statistical analyses for this end point

Secondary: Progression-free survival (PFS)

End point title	Progression-free survival (PFS)
End point description: Progression free survival (PFS) was defined as the time from the date of randomization to the date of the first documented disease progression or death due to any cause. PFS was censored if no PFS event was observed. The censoring date was the date of the last adequate tumor assessment. Clinical deterioration without objective radiological evidence was not considered as documented disease progression. PFS was assessed via a local radiology assessment as well as Blinded Independent Review Committee (BIRC) according to RECIST 1.1.

Statistical analyses

No statistical analyses for this end point

Secondary: Clinical benefit rate (CBR)

End point title	Clinical benefit rate (CBR)
-----------------	-----------------------------

End point description:

Clinical benefit rate (CBR) was defined as the proportion of patients with a best overall response of complete response (CR), or partial response (PR), or an overall response of stable disease (SD), lasting for at least 24 weeks. CR, PR, and SD were defined as per local review as well as Blinded Independent Review Committee (BIRC) according to RECIST 1.1. A patient was considered to have SD for 24 weeks or longer if a SD response was recorded at 24-1=23 weeks or later from randomization, allowing for the ± 1 week visit window for tumor assessments.

CR: Disappearance of all lesions with lymph nodes measuring < 10 mm.

PR: At least a 30% decrease in the sum of diameter of all target lesions, taking as reference the baseline sum of diameters.

SD: Neither sufficient shrinkage to qualify for PR or CR nor an increase in lesions which would qualify for progressive disease.

End point type	Secondary

Secondary: Time to response (TTR)

End point title	Time to response (TTR)
-----------------	------------------------

End point description:

Time to response (TTR) was defined as the time from the date of randomization to the first documented response of either complete response (CR) or partial response (PR), which had to be subsequently confirmed (although the date of initial response was used, not the date of confirmation). CR and PR were based on tumor response data as per local review and according to RECIST 1.1.

CR: Disappearance of all lesions with lymph nodes measuring < 10 mm.

PR: At least a 30% decrease in the sum of diameter of all target lesions, taking as reference the baseline sum of diameters.

End point type	Secondary

Statistical analyses

No statistical analyses for this end point

Secondary: Duration of response (DOR)

End point title	Duration of response (DOR)
-----------------	----------------------------

End point description:

Duration of response (DOR) only applied to patients whose best overall response was complete response (CR) or partial response (PR) according to RECIST 1.1 based on tumor response data per local review. The start date was the date of first documented response of CR or PR (i.e. the start date of response, not the date when response was confirmed), and the end date was defined as the date of the first documented progression or death due to underlying cancer. Patients continuing without progression or death due to underlying cancer were censored at the date of their last adequate tumor assessment. CR: Disappearance of all lesions with lymph nodes measuring < 10 mm. PR: At least a 30% decrease in the sum of diameter of all target lesions, taking as reference the baseline sum of diameters.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse events (AEs) were collected from first dose of study treatment to 30 days after last dose of study medication (on-treatment), up to 23.8 months.

Adverse event reporting additional description:

Consistent with EudraCT disclosure specifications, Novartis has reported under the Serious adverse events field "number of deaths resulting from adverse events" all those deaths, resulting from serious adverse events that are deemed to be causally related to treatment by the investigator.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
24 January 2020	<p>Key changes introduced in Amendment 1 for ribociclib:</p> <ol style="list-style-type: none">1. ILD/pneumonitis observed with all CDK4/6 inhibitors; ribociclib dose adjustment and management guidance added.2. TEN reported post-marketing (not in trials); guidance updated to discontinue ribociclib if diagnosed.3. For patients on tamoxifen/toremifene: a. These drugs must be stopped for a 5 half-life washout before randomization due to QT risk. b. Postmenopausal status criteria updated per NCCN v4 2018.4. Sodium and phosphorus level checks removed from inclusion criteria; concurrent HRT use added as exclusion.5. Patients with prior treatment toxicities (not safety risks) now allowed.6. Uncorrected hypocalcemia added as exclusion due to QT risk.7. Corticosteroid use guidance aligned with 'Concomitant medications' section.8. Hormonal contraceptives prohibited due to breast cancer risk.9. Vasectomy as contraception requires medical confirmation (per CTFG).10. Clarified eligibility for patients in other medical research.11. Lists of prohibited and cautionary medications during treatment added.12. Justification for PK analysis sample size included.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Due to EudraCT system limitations, which EMA is aware of, data using 999 as data points in this record are not an accurate representation of the clinical trial results.

Notes:
