

Clinical trial results:

A Randomized, Open-Label Phase I/II Study Evaluating Ramucirumab in Pediatric Patients and Young Adults with relapsed, Recurrent, or Refractory Synovial Sarcoma.

Summary

EudraCT number	2018-004243-23
Trial protocol	FR DE BE ES GB IT
Global end of trial date	23 February 2023

Results information

Result version number	v1 (current)
This version publication date	08 September 2023
First version publication date	08 September 2023

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	23 February 2023
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	23 February 2023
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

This study is being conducted to test the safety and efficacy of ramucirumab in combination with other chemotherapy in the treatment of relapsed, recurrent, or refractory synovial sarcoma (SS) in children and young adults. This trial is part of the CAMPFIRE master protocol which is a platform to accelerate the development of new treatments for pediatric and young adult participants with cancer. Your participation in this trial could last 12 months or longer, depending on how you and your tumor respond.

Protection of trial subjects:

This study was conducted in accordance with International Conference on Harmonization (ICH) Good Clinical Practice, and the principles of the Declaration of Helsinki, in addition to following the laws and regulations of the country or countries in which a study is conducted.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	04 March 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Australia: 2
Country: Number of subjects enrolled	Italy: 7
Country: Number of subjects enrolled	Spain: 1
Country: Number of subjects enrolled	United Kingdom: 8
Country: Number of subjects enrolled	United States: 5
Worldwide total number of subjects	23
EEA total number of subjects	8

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	1

Adolescents (12-17 years)	7
Adults (18-64 years)	15
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Completers included participants who died from any cause.

Pre-assignment

Screening details:

No Text Available

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Ramucirumab + Gemcitabine + Docetaxel

Arm description:

Participants received intravenous infusions of ramucirumab 9 milligrams per kilogram (mg/kg), gemcitabine 900 milligrams per meter square (mg/m²) on days 1, 8, and docetaxel 75 mg/m² on day 8 of a 21-day cycle until disease progression or a criterion for discontinuation were met.

Arm type	Experimental
Investigational medicinal product name	Ramucirumab
Investigational medicinal product code	
Other name	LY3009806
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Participants received intravenous infusion of ramucirumab 9 mg/kg on days 1, 8 of a 21-day cycle until disease progression or a criterion for discontinuation were met.

Investigational medicinal product name	Gemcitabine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Participants received intravenous infusion of gemcitabine 900 mg/m² on days 1, 8 of a 21-day cycle until disease progression or a criterion for discontinuation were met.

Investigational medicinal product name	Docetaxel
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Participants received intravenous infusion of docetaxel 75 mg/m² on day 8 of a 21-day cycle until disease progression or a criterion for discontinuation were met.

Arm title	Gemcitabine + Docetaxel
------------------	-------------------------

Arm description:

Participants received intravenous infusions of gemcitabine 900 mg/m² on days 1, 8, and docetaxel 75 mg/m² on day 8 of a 21-day cycle until disease progression or a criterion for discontinuation were met.

Arm type	Active comparator
----------	-------------------

Investigational medicinal product name	Gemcitabine

End points

End points reporting groups

Reporting group title	Ramucirumab + Gemcitabine + Docetaxel
Reporting group description: Participants received intravenous infusions of ramucirumab 9 milligrams per kilogram (mg/kg), gemcitabine 900 milligrams per meter square (mg/m ²) on days 1, 8, and docetaxel 75 mg/m ² on day 8 of a 21-day cycle until disease progression or a criterion for discontinuation were met.	
Reporting group title	Gemcitabine + Docetaxel
Reporting group description: Participants received intravenous infusions of gemcitabine 900 mg/m ² on days 1, 8, and docetaxel 75 mg/m ² on day 8 of a 21-day cycle until disease progression or a criterion for discontinuation were met.	

Primary: Progression Free Survival (PFS)

End point title	Progression Free Survival (PFS)
End point description: PFS is defined as the time from randomization until the first investigator-determined objective progression as defined by Response Evaluation Criteria In Solid Tumors, Version 1.1 (RECIST v1.1) or death from any cause in the absence of progressive disease. Participants known to be alive and without disease progression will be censored at the time of the last adequate tumor assessment or date of randomization, whichever is later. Analysis Population Description: All randomized participants (including the censored participants). Number of participants censored in Ramucirumab + Gemcitabine + Docetaxel=4, Gemcitabine + Docetaxel=2.	
End point type	Primary
End point timeframe: Baseline to Objective Progression or Death Due to Any Cause (Up To 6.4 Months)	

End point values	Ramucirumab + Gemcitabine + Docetaxel	Gemcitabine + Docetaxel		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	16	7 ^[1]		
Units: Months				
median (confidence interval 80%)	2.10 (2 to 6)	2.03 (1.38 to 9999)		

Notes:

[1] - 9999=NA=There were not enough events to estimate the upper confidence limit.

Statistical analyses

Statistical analysis title	Statistical analysis 1
Statistical analysis description: To conclude success for the intervention, the Bayesian analysis must yield a minimum of 99% posterior probability for PFS Hazard ratio less than 1 [i.e., Pr(HR<1)>99%]. The Bayesian analyses below include posterior mean of Hazard ratio, posterior probabilities instead of p-values, and credible intervals instead of confidence intervals.	
Comparison groups	Ramucirumab + Gemcitabine + Docetaxel v Gemcitabine + Docetaxel

Number of subjects included in analysis	23
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.051
Method	Bayesian hierarchical model]
Parameter estimate	Posterior Mean Hazard Ratio
Point estimate	2.62
Confidence interval	
level	Other: 80 %
sides	2-sided
lower limit	1.19
upper limit	4.46

Secondary: Overall Response Rate (ORR): Percentage of Participants Who Achieve Complete Response (CR) or Partial Response (PR)

End point title	Overall Response Rate (ORR): Percentage of Participants Who Achieve Complete Response (CR) or Partial Response (PR)
-----------------	---

End point description:

ORR is the best overall tumor response of complete response (CR) or partial response (PR) as classified by the investigator according to the Response Evaluation Criteria In Solid Tumors (RECIST v1.1). CR is a disappearance of all target and non-target lesions and normalization of tumor marker level. PR is an at least 30% decrease in the sum of the diameters of target lesions (taking as reference the baseline sum diameter) without progression of non-target lesions or appearance of new lesions.

Analysis Population Description: All randomized participants.

End point type	Secondary
----------------	-----------

End point timeframe:

Baseline through Measured Progressive Disease (Up To 6.4 Months)

End point values	Ramucirumab + Gemcitabine + Docetaxel	Gemcitabine + Docetaxel		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	16	7		
Units: Percentage of participants				
number (confidence interval 80%)	6.3 (0.7 to 22.2)	0 (0 to 28)		

Statistical analyses

No statistical analyses for this end point

Secondary: Duration of Response (DoR)

End point title	Duration of Response (DoR)
-----------------	----------------------------

End point description:

DoR is defined as the time from the date that measurement criteria for CR or PR (whichever is first recorded) are first met until the first date that disease is recurrent or objective disease progression is

observed, per RECIST 1.1 criteria, or the date of death from any cause in the absence of documented disease progression or recurrence.

Analysis Population Description: All randomized participants who had CR or PR responses. For Gemcitabine + Docetaxel, there were no participants with CR or PR responses to evaluate DoR, hence, zero participants analysed.

End point type	Secondary
----------------	-----------

End point timeframe:

Date of CR or PR to Date of Objective Disease Progression or Death Due to Any Cause (Up To 4.13 Months)

End point values	Ramucirumab + Gemcitabine + Docetaxel	Gemcitabine + Docetaxel		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	1 ^[2]	0 ^[3]		
Units: Months				
number (not applicable)	9999			

Notes:

[2] - 9999=N/A=DoR couldn't be calculated as the participant did not achieve the event and was censored.

[3] - Zero participants analysed as there were no participants with CR or PR responses to evaluate DoR.

Statistical analyses

No statistical analyses for this end point

Secondary: Complete Response (CR): Percentage of Participants Who Achieve CR

End point title	Complete Response (CR): Percentage of Participants Who Achieve CR
-----------------	---

End point description:

CR is a disappearance of all target and non-target lesions and normalization of tumor marker level.

Analysis Population Description: All randomized participants.

End point type	Secondary
----------------	-----------

End point timeframe:

Baseline Up to 6.94 months

End point values	Ramucirumab + Gemcitabine + Docetaxel	Gemcitabine + Docetaxel		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	16	7		
Units: Percentage of participants				
number (confidence interval 80%)	0 (0 to 13.4)	0 (0 to 28)		

Statistical analyses

No statistical analyses for this end point

Secondary: Pharmacokinetics (PK): Maximum Serum Concentration of Ramucirumab (Cmax)

End point title	Pharmacokinetics (PK): Maximum Serum Concentration of Ramucirumab (Cmax) ^[4]
-----------------	---

End point description:

Cmax was the concentration of study drug in the blood after the dose is administered. It was measured post-dose and was summarized using descriptive statistics.

Analysis Population Description: All randomized participants who received at least one dose of Ramucirumab and had evaluable PK data.

End point type	Secondary
----------------	-----------

End point timeframe:

0.5 hours after the end of ramucirumab infusion on Day 1 of Cycle 1

Notes:

[4] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period. Justification: This outcome is planned for Ramucirumab arm only.

End point values	Ramucirumab + Gemcitabine + Docetaxel			
Subject group type	Reporting group			
Number of subjects analysed	10			
Units: microgram per milliliter (µg/mL)				
geometric mean (geometric coefficient of variation)	231 (± 43)			

Statistical analyses

No statistical analyses for this end point

Secondary: PK: Minimum Serum Concentration of Ramucirumab (Cmin)

End point title	PK: Minimum Serum Concentration of Ramucirumab (Cmin) ^[5]
-----------------	--

End point description:

Cmin was the concentration of study drug in the blood immediately before the next dose was administered. It was measured pre-dose at all visits and was summarized using descriptive statistics.

Analysis Population Description: All randomized participants who received at least one dose of Ramucirumab and had evaluable PK data.

End point type	Secondary
----------------	-----------

End point timeframe:

Prior to ramucirumab infusion on Day 8 of Cycle 1, Day 1 of Cycle 2 and Day 1 of Cycle 5

Notes:

[5] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period. Justification: This outcome is planned for Ramucirumab arm only.

End point values	Ramucirumab + Gemcitabine + Docetaxel			
Subject group type	Reporting group			
Number of subjects analysed	10 ^[6]			
Units: microgram per milliliter (µg/mL)				
geometric mean (geometric coefficient of variation)				
Day 8 of Cycle 1, N=9	73.3 (± 39)			
Day 1 of Cycle 2, N=10	55.4 (± 24)			
Day 1 of Cycle 5, N=2	9999 (± 9999)			

Notes:

[6] - 9999=N/A due to insufficient participants. Individual values reported: 32.4 µg/mL, 41.3 µg/mL.

Statistical analyses

No statistical analyses for this end point

Secondary: Number of Participants with Treatment-Emergent Anti-Drug Antibodies (TE-ADA)

End point title	Number of Participants with Treatment-Emergent Anti-Drug Antibodies (TE-ADA)
-----------------	--

End point description:

A TE-ADA evaluable participant is considered to be TE-ADA positive if the participant has at least one post baseline titer that is a 4-fold or greater increase in titer from baseline measurement (treatment-boosted). If baseline result is ADA Not Present, then the participant is TE ADA positive if there is at least one post baseline result of ADA Present with titer ≥ 20 (treatment-induced).

Analysis Population Description: All randomized participants who received at least one dose of study drug and had at least one non-missing baseline, post baseline ADA value.

End point type	Secondary
----------------	-----------

End point timeframe:

Baseline Up to 6.94 months

End point values	Ramucirumab + Gemcitabine + Docetaxel	Gemcitabine + Docetaxel		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	7	1		
Units: participants	0	0		

Statistical analyses

No statistical analyses for this end point

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Baseline Up to 6.94 months

Adverse event reporting additional description:

All randomized participants who received at least one dose of study drug.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

The limitation to this study was the highly varied estimates of the PFS HR and the probability of PFS HR < 1 due to influence from the matched historical controls whose PFS substantially outperformed PFS from the prospectively randomized control.

Notes:
