

Clinical trial results:

An Open-label Multiple-Dose Study to Evaluate the Pharmacokinetics, Safety, and Tolerability of Upadacitinib in Pediatric Subjects with Severe Atopic Dermatitis

Summary

EudraCT number	2018-004409-17
Trial protocol	NO NL
Global end of trial date	29 August 2024

Results information

Result version number	v1 (current)
This version publication date	22 February 2025
First version publication date	22 February 2025

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-001741-PIP04-17
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	29 August 2024
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	29 August 2024
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Part 1:

- To evaluate the pharmacokinetics, activity, safety and tolerability of multiple doses of upadacitinib in pediatric subjects with severe atopic dermatitis.
- To evaluate the palatability of upadacitinib oral solution in pediatric subjects.

Part 2:

- To evaluate the long-term safety and tolerability of multiple doses of upadacitinib in pediatric subjects with severe atopic dermatitis.

Protection of trial subjects:

Subject and/or legal guardian read and understood the information provided about the study and gave written permission.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	31 January 2019
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Puerto Rico: 3
Country: Number of subjects enrolled	United States: 32
Worldwide total number of subjects	35
EEA total number of subjects	0

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	35
Adolescents (12-17 years)	0
Adults (18-64 years)	0

From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

Within 35 days prior to the Baseline/Day 1 Visit, subject and subject's legally authorized representative received a full explanation of the study design and study procedures, provided a written informed consent/assent, and underwent the screening procedures outlined in the protocol.

Period 1

Period 1 title	Part 1
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Cohort 1: Low Dose Upadacitinib, 6 to < 12 years

Arm description:

Participants, 6 to <12 years of age, received weight-dependent low dose of upadacitinib.

Arm type	Experimental
Investigational medicinal product name	Upadacitinib (ABT-494)
Investigational medicinal product code	ABT-494
Other name	RINVOQ
Pharmaceutical forms	Film-coated tablet, Oral solution
Routes of administration	Oral use

Dosage and administration details:

Low Dose: 10 < 20 kg body weight: 3 mg twice daily (BID; oral solution); 20 < 30 kg body weight: 4 mg BID (oral solution); ≥30 kg body weight: 15 mg once daily (QD; tablet) or 6 mg BID (oral solution) if unable to swallow tablet.

Arm title	Cohort 2: High Dose Upadacitinib, 6 to < 12 years
------------------	---------------------------------------------------

Arm description:

Participants, 6 to <12 years of age, received weight-dependent high dose of upadacitinib.

Arm type	Experimental
Investigational medicinal product name	Upadacitinib (ABT-494)
Investigational medicinal product code	ABT-494
Other name	RINVOQ
Pharmaceutical forms	Film-coated tablet, Oral solution
Routes of administration	Oral use

Dosage and administration details:

High Dose: 10 < 20 kg body weight: 6 mg BID (oral solution); 20 < 30 kg body weight: 8 mg BID (oral solution); ≥30 kg body weight: 30 mg (QD) or 12 mg BID (oral solution) if unable to swallow tablet.

Arm title	Cohort 3: Low Dose Upadacitinib, 2 < 6 years
------------------	----------------------------------------------

Arm description:

Participants, 2 to <6 years of age, received weight-dependent low dose of upadacitinib.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Upadacitinib (ABT-494)
Investigational medicinal product code	ABT-494
Other name	RINVOQ
Pharmaceutical forms	Film-coated tablet, Oral solution
Routes of administration	Oral use

Dosage and administration details:

Low Dose: 10 < 20 kg body weight: 3 mg twice daily (BID; oral solution); 20 < 30 kg body weight: 4 mg BID (oral solution); ≥30 kg body weight: 15 mg once daily (QD; tablet) or 6 mg BID (oral solution) if unable to swallow tablet.

Arm title	Cohort 4: High Dose Upadacitinib, 2 < 6 years
------------------	-----------------------------------------------

Arm description:

Participants, 2 to <6 years of age, received weight-dependent high dose of upadacitinib.

Arm type	Experimental
Investigational medicinal product name	Upadacitinib (ABT-494)
Investigational medicinal product code	ABT-494
Other name	RINVOQ
Pharmaceutical forms	Film-coated tablet, Oral solution
Routes of administration	Oral use

Dosage and administration details:

High Dose: 10 < 20 kg body weight: 6 mg BID (oral solution); 20 < 30 kg body weight: 8 mg BID (oral solution); ≥30 kg body weight: 30 mg (QD) or 12 mg BID (oral solution) if unable to swallow tablet.

Number of subjects in period 1	Cohort 1: Low Dose Upadacitinib, 6 to < 12 years	Cohort 2: High Dose Upadacitinib, 6 to < 12 years	Cohort 3: Low Dose Upadacitinib, 2 < 6 years
Started	9	8	9
Completed	9	8	8
Not completed	0	0	1
Consent withdrawn by subject	-	-	1

Number of subjects in period 1	Cohort 4: High Dose Upadacitinib, 2 < 6 years
Started	9
Completed	8
Not completed	1
Consent withdrawn by subject	-
Study drug noncompliance	1

Period 2

Period 2 title	Part 2
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Part 2: Aged 6 to < 12 years
------------------	------------------------------

Arm description:

Eligible participants, aged 6 to < 12 years, who completed Part 1 received weight-dependent low dose of upadacitinib.

Arm type	Experimental
Investigational medicinal product name	Upadacitinib (ABT-494)
Investigational medicinal product code	ABT-494
Other name	RINVOQ
Pharmaceutical forms	Film-coated tablet, Oral solution
Routes of administration	Oral use

Dosage and administration details:

Low Dose: 10 < 20 kg body weight: 3 mg twice daily (BID; oral solution); 20 < 30 kg body weight: 4 mg BID (oral solution); ≥30 kg body weight: 15 mg once daily (QD; tablet) or 6 mg BID (oral solution) if unable to swallow tablet.

Arm title	Part 2: Aged 2 to < 6 Years
------------------	-----------------------------

Arm description:

Eligible participants, aged 2 to < 6 years, who completed Part 1 received weight-dependent low dose of upadacitinib.

Arm type	Experimental
Investigational medicinal product name	Upadacitinib (ABT-494)
Investigational medicinal product code	ABT-494
Other name	RINVOQ
Pharmaceutical forms	Film-coated tablet, Oral solution
Routes of administration	Oral use

Dosage and administration details:

Low Dose: 10 < 20 kg body weight: 3 mg twice daily (BID; oral solution); 20 < 30 kg body weight: 4 mg BID (oral solution); ≥30 kg body weight: 15 mg once daily (QD; tablet) or 6 mg BID (oral solution) if unable to swallow tablet.

Number of subjects in period 2	Part 2: Aged 6 to < 12 years	Part 2: Aged 2 to < 6 Years
Started	17	16
Completed	10	9
Not completed	7	7
Consent withdrawn by subject	1	2
Adverse event	3	1
FDA recommended discontinuation (> 3 years)	-	2
Lost to follow-up	1	-
Lack of efficacy	2	2

Baseline characteristics

Reporting groups

Reporting group title	Cohort 1: Low Dose Upadacitinib, 6 to < 12 years
Reporting group description: Participants, 6 to <12 years of age, received weight-dependent low dose of upadacitinib.	
Reporting group title	Cohort 2: High Dose Upadacitinib, 6 to < 12 years
Reporting group description: Participants, 6 to <12 years of age, received weight-dependent high dose of upadacitinib.	
Reporting group title	Cohort 3: Low Dose Upadacitinib, 2 < 6 years
Reporting group description: Participants, 2 to <6 years of age, received weight-dependent low dose of upadacitinib.	
Reporting group title	Cohort 4: High Dose Upadacitinib, 2 < 6 years
Reporting group description: Participants, 2 to <6 years of age, received weight-dependent high dose of upadacitinib.	

Reporting group values	Cohort 1: Low Dose Upadacitinib, 6 to < 12 years	Cohort 2: High Dose Upadacitinib, 6 to < 12 years	Cohort 3: Low Dose Upadacitinib, 2 < 6 years
Number of subjects	9	8	9
Age categorical Units: Subjects			

Age continuous Units: years arithmetic mean standard deviation	8.3 ± 1.58	8.0 ± 1.77	4.0 ± 1.00
Gender categorical Units: Subjects			
Female	6	6	5
Male	3	2	4

Reporting group values	Cohort 4: High Dose Upadacitinib, 2 < 6 years	Total	
Number of subjects	9	35	
Age categorical Units: Subjects			

Age continuous Units: years arithmetic mean standard deviation	3.2 ± 0.83	-	
Gender categorical Units: Subjects

Primary: Number of Participants With Treatment Emergent Adverse Events (TEAE)

End point title	Number of Participants With Treatment Emergent Adverse Events (TEAE) ^[5]
-----------------	-------------------------------------------------------------------------------------

End point description:

An adverse event (AE) is defined as any untoward medical occurrence in a patient or clinical investigation participant administered a pharmaceutical product which does not necessarily have a causal relationship with this treatment. The investigator assesses the relationship of each event to the use of study drug as either probably related, possibly related, probably not related or not related. A serious adverse event (SAE) is an event that results in death, is life-threatening, requires or prolongs hospitalization, results in a congenital anomaly, persistent or significant disability/incapacity or is an important medical event that, based on medical judgment, may jeopardize the participant and may require medical or surgical intervention to prevent any of the outcomes listed above. Treatment-emergent adverse events (TEAEs) are defined as AEs with an onset date that is after the first dose of study drug, and no more than 30 days of the drug after the last dose of study drug.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
21 December 2018	<p>The purpose of this amendment is to correct minor clerical errors for consistency throughout the protocol in addition to the following:</p> <ul style="list-style-type: none">- Add pharmacodynamic assessment and palatability evaluation of upadacitinib oral solution to Part 1 objectives in Section 1 (Synopsis) and Section 3.1 (Objectives).- Add statistical analyses of palatability evaluation to Section 7.5- Add minimum enrollment of 4 subjects to each bodyweight category to Section 1 (Synopsis) and Section 4.1 (Investigational Plan).- Add additional details regarding limiting subject discomfort in Section 4.2 (Discussion of Study Design), on discontinuation of subjects in Section 5.6 (Withdrawal of Subjects and Discontinuation of Study), on QTc criterion in Section 6.2 (Toxicity Management and on end of study in Section 11 (Completion of Study).- Section 5.2 Contraception Requirements for Females. Additional description for females of childbearing potential.- Section 6.1 (Complaints and Adverse Events). Updated information on CTCAE and pregnancy.- Removed "in a blinded manner" from cardiovascular paragraph. Section 6.2 (Toxicity Management).- Added Section 6.3 (Data Monitoring Committee and Cardiovascular Adjudication Committee)" to Section 6.4.- Update abbreviations in Appendix A (Study Specific Abbreviations and Terms).- Update Appendix D (Study Activities Table) to clarify study activities including addition of a ± 7 day window to study visits in Part 2- Operations Manual. Section 3.16, Follow-Up. Remove telephone follow-up.- Operations Manual. Section 3.18, Dispense Study Drug. Move section and add additional details.- Operations Manual. Section 5.2, Packaging and Labeling. Specified that upadacitinib oral solution should be protected from freezing and add temperature excursion information.- Operations Manual. Section 5.3, Method of Assigning Subjects to Treatment Groups. Update the subject identification number from 6 to 8 digits.
21 December 2018	<p>(continued)</p> <ul style="list-style-type: none">- Operations Manual. Section 5, Study Drug, Subsections 5.4, 5.5 and 5.6. Provide additional information regarding study drug procedures.- Operations Manual. Replace TB RISK ASSESSMENT FORM EXAMPLE and TANNER STAGES.- Operations Manual. Update the definitions in ECZEMA AREA AND SEVERITY INDEX (EASI) SCORING EXAMPLE.- Added two appendices to Operations Manual ORAL SOLUTION DOSING INFORMATION WITH REQUIRED SYRINGE SIZE and INSTRUCTIONS FOR USE: ORAL SOLUTION.- Operations Manual. Added to appendices of protocol.
26 February 2020	<p>The purpose of this amendment is to correct minor clerical errors for consistency throughout the protocol in addition to the following:</p> <ul style="list-style-type: none">- Update the study design to include an additional group of subjects 6 months to less than 2 years of age.- Add a new oral upadacitinib formulation of 0.5 mg/mL.- Update the safety related language throughout the protocol.- Update language for moderate/strong inhibitors.- Update Section 5.6: Treatment Compliance in the Operations Manual.

11 February 2021	<p>The purpose of this amendment is to correct minor clerical errors for consistency throughout the protocol in addition to the following:</p> <ul style="list-style-type: none"> - Updated sponsor/emergency medical contact. - Updated dose levels and body weight categories in Table 2 for subjects 2 to < 12 years of age and added dosing recommendations for subjects 6 months to < 2 years in cohorts 5 and 6 in Table 3. - Added citation to selection of doses discussion. - Added summary of conclusions on efficacy and safety from the available Phase 3 AD studies in Section 2.1, Benefits and Risks to Subjects. - Updated Eligibility Criterion 3 to have separate weight limits based on age. - Added information regarding development of oral solutions. - Added information regarding COVID-19 procedures throughout the document. - Replace PF 04965842 with abrocitinib in JAK inhibitor list in Prior/Concomitant Therapy - Added information regarding adjudication committee used to assess potential gastrointestinal perforation AEs. - Updated language regarding study drug withdrawal criterion and toxicity management related to gastrointestinal perforation. - Added a study stopping criteria related to elevations in creatinine phosphokinase: Two or more subjects administered study drug experience a confirmed symptomatic creatinine phosphokinase (CPK) elevation $\geq 4x$ upper limit of normal considered related to study drug. - Updated sample size estimation. - Added additional text regarding dose adjustment for subjects in Part 1 of the study. - Updated text for re-screening procedure in Appendix F, Section 3.2 - Added text to collect full date of birth to Appendix F, Section 3.3. - Removed home urine pregnancy test paragraph from Appendix F, Section 3.13, Clinical Laboratory Tests. - Added information regarding at self-scoring of Tanner stage in Appendix F, Section 3.12. - Updated table in Operations Manual Appendix G with new weight categories.
19 July 2021	<p>The purpose of this amendment is to correct minor clerical errors for consistency throughout the protocol in addition to the following:</p> <ul style="list-style-type: none"> - Clarified that for the calculation of the EASI score, the age at the respective visit is used (Appendix E of the Operations Manual). - Changed the contact information for reporting protocol deviations and product complaints in the operations manual.
15 December 2021	<p>The purpose of this amendment is to correct minor clerical errors for consistency throughout the protocol in addition to the following:</p> <ul style="list-style-type: none"> - SPONSOR/EMERGENCY MEDICAL CONTACT updated. - Updated the safety team's email address. - Changed central laboratory to Labcorp Central Laboratory Services Limited Partnership. - In Eligibility criterion number 3, updated minimum age to 3 years of age starting with protocol version 6.0. - In Eligibility criteria number 12, added "history of retinopathy of prematurity, congenital structural abnormalities of the eye (e.g., Marfan's Syndrome), inherited vitreoretinal degenerations or vitreoretinopathies (e.g., Stickler syndrome) or prior history of retinal detachment" as exclusionary conditions. - Throughout the document updated minimum age of subjects in study to 2 years of age - Removed Cohorts 5 and 6 from the study design and all language related to these cohorts throughout the document. - Added ophthalmology assessment every 3 months to check visual acuity of subjects that are < 3 years old until they reach their third year of age, or as needed for subjects ≥ 3 years of age.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats
