

Clinical trial results:

A Multicenter, Open-Label PK Study of Mirikizumab in Pediatric Patients with Moderately to Severely Active Ulcerative Colitis

Summary

EudraCT number	2019-001298-96
Trial protocol	Outside EU/EEA
Global end of trial date	15 March 2023

Results information

Result version number	v1 (current)
This version publication date	28 September 2023
First version publication date	28 September 2023

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-002208-PIP01-17
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	15 March 2023
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	15 March 2023
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

This study was designed to evaluate how the body processes and removes mirikizumab. The study also evaluated safety and disease response in pediatric participants with UC taking mirikizumab. The study lasted about 52 weeks and included up to 18 visits.

Protection of trial subjects:

This study was conducted in accordance with International Conference on Harmonization (ICH) Good Clinical Practice, and the principles of the Declaration of Helsinki, in addition to following the laws and regulations of the country or countries in which a study is conducted.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	18 May 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Japan: 4
Country: Number of subjects enrolled	Korea, Republic of: 4
Country: Number of subjects enrolled	United States: 17
Country: Number of subjects enrolled	Israel: 1
Worldwide total number of subjects	26
EEA total number of subjects	0

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	7
Adolescents (12-17 years)	19
Adults (18-64 years)	0

From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Mirikizumab (Miri) dose groups to which pediatric participants are assigned at Week (wk) 0 (for induction period) and at wk 12 (for maintenance period) are dependent on participant's weight and their clinical response status at wk 12 for maintenance period.

Pre-assignment

Screening details:

All participants who achieved a modified Mayo score (MMS) clinical response at wk 12 or wk 24 [non-responders (NR) at wk 12 who received extended intravenous (IV) induction dosing for 12 more wks] were eligible for the maintenance period.

Period 1

Period 1 title	OL Induction Period (Wk 0-12)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	OL Induction Period: 5 milligram per kilogram (mg/kg) Miri IV

Arm description:

Participants (≤ 40 kg weight) received 5 mg/kg mirikizumab given as an IV infusion every 4 weeks (Q4W) on weeks 0, 4, 8 for 12 weeks.

Arm type	Experimental
Investigational medicinal product name	5 mg/kg mirikizumab
Investigational medicinal product code	LY3074828
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Participants (≤ 40 kg weight) received 5 mg/kg mirikizumab given as an IV infusion Q4W on weeks 0, 4, 8 for 12 weeks.

Arm title	OL Induction Period: 10 mg/kg Miri IV
------------------	---------------------------------------

Arm description:

Participants (≤ 40 kg weight) received 10 mg/kg mirikizumab given as an IV infusion Q4W on weeks 0, 4, 8 for 12 weeks.

Arm type	Experimental
Investigational medicinal product name	10 mg/kg mirikizumab
Investigational medicinal product code	LY3074828
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Participants (≤ 40 kg weight) received 10 mg/kg mirikizumab given as an IV infusion Q4W on weeks 0, 4, 8 for 12 weeks.

Arm title	OL Induction Period: 300 mg Miri IV
------------------	-------------------------------------

Arm description:

Participants (> 40 kg weight) received 300 mg mirikizumab given as an IV infusion Q4W on weeks 0, 4, 8 for 12 weeks.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	300 mg mirikizumab
Investigational medicinal product code	LY3074828
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants (>40 kg weight) received 300 mg mirikizumab given as an IV infusion Q4W on weeks 0, 4, 8 for 12 weeks.

Number of subjects in period 1	OL Induction Period: 5 milligram per kilogram (mg/kg) Miri IV	OL Induction Period: 10 mg/kg Miri IV	OL Induction Period: 300 mg Miri IV
Started	10	5	11
Completed	10	5	11

Period 2

Period 2 title	OL Maintenance Period (Wk 12-52)
Is this the baseline period?	No
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	OL Maintenance Period: 50 mg Miri Subcutaneous (SC)

Arm description:

Participants (≤ 20 kg weight) who were responders to mirikizumab at week 12 in induction received 50 mg SC Q4W from week 12 through week 48 or until loss of response was confirmed.

Arm type	Experimental
Investigational medicinal product name	50 mg mirikizumab
Investigational medicinal product code	LY3074828
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants (≤ 20 kg weight) who were responders to mirikizumab at week 12 in induction received 50 mg SC Q4W from week 12 through week 48 or until loss of response was confirmed.

Arm title	OL Maintenance Period: 100 mg Miri SC
------------------	---------------------------------------

Arm description:

Participants (>20 to ≤ 40 kg weight) who were responders to mirikizumab at week 12 in induction received 100 mg SC Q4W from week 12 through week 48 or until loss of response was confirmed.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	100 mg mirikizumab
Investigational medicinal product code	LY3074828
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants (>20 to ≤40 kg weight) who were responders to mirikizumab at week 12 in induction received 100 mg SC Q4W from week 12 through week 48 or until loss of response was confirmed.

Arm title	OL Maintenance Period: 200 mg Miri SC
------------------	---------------------------------------

Arm description:

Participants (>40 kg weight) who were responders to mirikizumab at week 12 in induction received 200 mg SC Q4W from week 12 through week 48 or until loss of response was confirmed.

Arm type	Experimental
Investigational medicinal product name	200 mg mirikizumab
Investigational medicinal product code	LY3074828
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants (>40 kg weight) who were responders to mirikizumab at week 12 in induction received 200 mg SC Q4W from week 12 through week 48 or until loss of response was confirmed.

Arm title	OL Maintenance Period: NR: 10 mg/kg Miri IV/50 mg Miri SC
------------------	---

Arm description:

Participants (≤40 kg) who were non responders to miri at week 12 in induction received 10 mg SC Q4W for 12 weeks or discontinued after repeat induction, and then received 50 mg miri (≤20 kg weight) SC Q4W through week 48 or until loss of response was confirmed.

Arm type	Experimental
Investigational medicinal product name	50 mg mirikizumab
Investigational medicinal product code	LY3074828
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants (≤40 kg) who were non responders to miri at week 12 in induction received 10 mg SC Q4W for 12 weeks or discontinued after repeat induction, and then received 50 mg miri (≤20 kg weight) SC Q4W through week 48 or until loss of response was confirmed.

Arm title	OL Maintenance Period: NR: 10 mg/kg Miri IV/100 mg Miri SC
------------------	--

Arm description:

Participants (≤40 kg) who were non responders to miri at week 12 in induction received 10 mg SC Q4W for 12 weeks or discontinued after repeat induction, and then received 100 mg miri (>20 to ≤40 kg weight) SC Q4W through week 48 or until loss of response was confirmed.

Arm type	Experimental
Investigational medicinal product name	100 mg mirikizumab
Investigational medicinal product code	LY3074828
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants (≤40 kg) who were non responders to miri at week 12 in induction received 10 mg SC Q4W for 12 weeks or discontinued after repeat induction, and then received 100 mg miri (>20 to ≤40 kg weight) SC Q4W through week 48 or until loss of response was confirmed.

Arm title	OL Maintenance Period: NR: 300 mg Miri IV /200 mg Miri SC
------------------	---

Arm description:

Participants (>40 kg) who were non responders to miri at week 12 in induction received 300 mg SC

Q4W for 12 weeks or discontinued after repeat induction, then received 200 mg miri SC Q4W through week 48 or until loss of response was confirmed.

Arm type	Experimental
Investigational medicinal product name	200 mg mirikizumab
Investigational medicinal product code	LY3074828
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants (>40 kg) who were non responders to miri at week 12 in induction received 300 mg SC Q4W for 12 weeks or discontinued after repeat induction, then received 200 mg miri SC Q4W through week 48 or until loss of response was confirmed.

End points

End points reporting groups

Reporting group title	OL Induction Period: 5 milligram per kilogram (mg/kg) Miri IV
Reporting group description: Participants (≤ 40 kg weight) received 5 mg/kg mirikizumab given as an IV infusion every 4 weeks (Q4W) on weeks 0, 4, 8 for 12 weeks.	
Reporting group title	OL Induction Period: 10 mg/kg Miri IV
Reporting group description: Participants (≤ 40 kg weight) received 10 mg/kg mirikizumab given as an IV infusion Q4W on weeks 0, 4, 8 for 12 weeks.	
Reporting group title	OL Induction Period: 300 mg Miri IV
Reporting group description: Participants (> 40 kg weight) received 300 mg mirikizumab given as an IV infusion Q4W on weeks 0, 4, 8 for 12 weeks.	
Reporting group title	OL Maintenance Period: 50 mg Miri Subcutaneous (SC)
Reporting group description: Participants (≤ 20 kg weight) who were responders to mirikizumab at week 12 in induction received 50 mg SC Q4W from week 12 through week 48 or until loss of response was confirmed.	
Reporting group title	OL Maintenance Period: 100 mg Miri SC
Reporting group description: Participants (> 20 to ≤ 40 kg weight) who were responders to mirikizumab at week 12 in induction received 100 mg SC Q4W from week 12 through week 48 or until loss of response was confirmed.	
Reporting group title	OL Maintenance Period: 200 mg Miri SC
Reporting group description: Participants (> 40 kg weight) who were responders to mirikizumab at week 12 in induction received 200 mg SC Q4W from week 12 through week 48 or until loss of response was confirmed.	
Reporting group title	OL Maintenance Period: NR: 10 mg/kg Miri IV/50 mg Miri SC
Reporting group description: Participants (≤ 40 kg) who were non responders to miri at week 12 in induction received 10 mg SC Q4W for 12 weeks or discontinued after repeat induction, and then received 50 mg miri (≤ 20 kg weight) SC Q4W through week 48 or until loss of response was confirmed.	
Reporting group title	OL Maintenance Period: NR: 10 mg/kg Miri IV/100 mg Miri SC
Reporting group description: Participants (≤ 40 kg) who were non responders to miri at week 12 in induction received 10 mg SC Q4W for 12 weeks or discontinued after repeat induction, and then received 100 mg miri (> 20 to ≤ 40 kg weight) SC Q4W through week 48 or until loss of response was confirmed.	
Reporting group title	OL Maintenance Period: NR: 300 mg Miri IV /200 mg Miri SC
Reporting group description: Participants (> 40 kg) who were non responders to miri at week 12 in induction received 300 mg SC Q4W for 12 weeks or discontinued after repeat induction, then received 200 mg miri SC Q4W through week 48 or until loss of response was confirmed.	
Reporting group title	OL Induction and Maintenance Period: 5 mg/kg Miri IV
Reporting group description: Participants (≤ 40 kg weight) received 5 mg/kg mirikizumab given as an IV infusion Q4W on weeks 0, 4, 8 for 12 weeks followed by IV or SC mirikizumab based on their week 12 response status and weight through week 48 or until loss of response was confirmed.	
Reporting group title	OL Induction and Maintenance Period: 10 mg/kg Miri IV
Reporting group description: Participants (≤ 40 kg weight) received 10 mg/kg mirikizumab given as an IV infusion Q4W on weeks 0, 4, 8 for 12 weeks followed by IV or SC mirikizumab based on their week 12 response status and weight through week 48 or until loss of response was confirmed.	
Reporting group title	OL Induction and Maintenance Period: 300 mg Miri IV
Reporting group description: Participants (> 40 kg weight) received 300 mg mirikizumab given as an IV infusion Q4W on weeks 0, 4, 8 for 12 weeks followed by IV or SC mirikizumab based on their week 12 response status and weight	

through week 48 or until loss of response was confirmed.

Subject analysis set title	Mirikizumab
Subject analysis set type	Per protocol

Subject analysis set description:

Participants weighing >40 kg received a mirikizumab induction dose of 300 mg via IV infusion and participants weighing ≤40 kg received induction doses of 5 mg/kg or 10 mg/kg via IV infusion at Weeks 0, 4, and 8 for 12 weeks.

Primary: Pharmacokinetics (PK): Clearance of Mirikizumab

End point title	Pharmacokinetics (PK): Clearance of Mirikizumab ^[1]
-----------------	--

End point description:

Clearance of mirikizumab was evaluated. The PK of mirikizumab is characterized at interim analysis points using mixed-effect (population PK) modelling approaches using the available induction and maintenance mirikizumab concentration data. Analysis population description (APD) included all randomized participants who received at least one dose of study drug and had evaluable PK data.

End point type	Primary
----------------	---------

End point timeframe:

Predose on week 4, 8, 12, 16, 24, 36, 52 and post dose on week 0 and 8

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No inferential statistics was planned for this endpoint.

End point values	Mirikizumab			
Subject group type	Subject analysis set			
Number of subjects analysed	26			
Units: Liters per hour per kilogram (L/hr/kg)				
geometric mean (geometric coefficient of variation)	0.000190 (± 59.74)			

Statistical analyses

No statistical analyses for this end point

Secondary: Percentage of Participants in Clinical Remission

End point title	Percentage of Participants in Clinical Remission
-----------------	--

End point description:

Clinical remission defined as achieving a 9-point modified Mayo score (MMS) for rectal bleeding (RB) = 0, stool frequency (SF) = 0 or 1 and endoscopy (ES) = 0 or 1 (excluding friability). The MMS is a composite score of ulcerative colitis disease activity calculated as the sum of three subscores: SF subscore, based on the participant's diary and scored from 0 (normal number of stools) to 3 (5 or more stools than normal); RB subscore, based on the participant's diary and scored from 0 (no blood seen) to 3 (blood alone passed); ES subscore, based on colonoscopy or sigmoidoscopy and scored from 0 (normal or inactive disease) to 3 (severe disease, spontaneous bleeding, ulceration). APD included Modified Intention-to-treat population (mITT): All randomized participants who received at least one dose of study drug and who had clinical remission measured correctly at baseline. Participants were analysed per their assigned treatment arm regardless of the treatment they actually received.

Secondary: Percentage of Participants in Clinical Remission Based on the Pediatric Ulcerative Colitis Activity Index (PUCAI)

End point title	Percentage of Participants in Clinical Remission Based on the Pediatric Ulcerative Colitis Activity Index (PUCAI)
-----------------	---

End point description:

The PUCAI is a clinician-administered, 6-item questionnaire that measures: abdominal pain; RB; stool consistency; number of stools; nocturnal stools; and activity level. For PUCAI score all items are answered as an average over the 'past 2 days'. A total disease activity score is calculated from 0 to 85, with Severe 65-85; Moderate:35-60; Mild:10-30, and None:<10. The clinician will record the participant or caregiver/legal guardian responses for the PUCAI electronically as source data in the tablet device at appropriate visits. PUCAI clinical remission is defined as a PUCAI score of <10 points. APD included mITT: All randomized participants who received at least one dose of study drug and who had the clinical remission based on the PUCAI measured correctly at baseline. Participants were analysed per their assigned treatment arm regardless of the treatment they actually received.

tinea infection			
alternative dictionary used: MedDRA 25.1			
subjects affected / exposed	0 / 5 (0.00%)	0 / 11 (0.00%)	1 / 11 (9.09%)
occurrences (all)	0	0	1

Notes:

[1] - The number of subjects exposed to this adverse event is less than the total number of subjects exposed for the reporting group. These numbers are expected to be equal.

Justification: Gender specific events only occurring in male or female participants have had the number of participants at Risk adjusted accordingly.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
26 August 2019	- Updated the definition of mucosal healing; - Exploratory endpoint has been added; -Removed text referring to randomization; - Clarification provided in schedule of activities; - Updated intestinal dysplasia language; - Added description of UCEIS; - Inclusion and exclusion criteria were revised; - Clarifications on treatments administered, physical examination, clinical laboratory tests, prohibited medications, Permitted medications with dose stabilization.
30 April 2021	- Secondary endpoint has been updated; - Clarification provided in schedule of activities; - Updated age for hormone collection; - Clarified overall design; wording; - Inclusion and exclusion criteria were revised; - Clarifications on treatments administered, physical examination, clinical laboratory tests, prohibited medications.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
