

Clinical trial results:

A TACL Phase 1/2 Study of PO Ixazomib in Combination with Chemotherapy for Childhood Relapsed or Refractory Acute Lymphoblastic Leukemia and Lymphoblastic Lymphoma

Summary

EudraCT number	2019-001947-28
Trial protocol	Outside EU/EEA
Global end of trial date	

Results information

Result version number	v1
This version publication date	03 December 2021
First version publication date	03 December 2021

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-001410-PIP02-17
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Interim
Date of interim/final analysis	18 May 2021
Is this the analysis of the primary completion data?	No

Global end of trial reached?	No
------------------------------	----

Notes:

General information about the trial

Main objective of the trial:

The main objective of this study was to determine the maximum tolerated dose (MTD) and/or recommended phase 2 dose (RP2D), define and describe toxicities, and characterized the pharmacokinetics of orally (PO) administered ixazomib in conjunction with block 1 re-induction chemotherapy in children with relapsed/refractory acute lymphoblastic leukaemia (ALL) or lymphoblastic lymphoma (LLy).

Protection of trial subjects:

All study participants were required to read and sign an Informed Consent Form.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	12 February 2019
Long term follow-up planned	Yes
Long term follow-up rationale	Safety
Long term follow-up duration	2 Years
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 10
Worldwide total number of subjects	10
EEA total number of subjects	0

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	6
Adolescents (12-17 years)	3
Adults (18-64 years)	1
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Participants took part in the study at 6 investigative sites in the United States from 12 February 2019 to 18 May 2021. The study is ongoing.

Pre-assignment

Screening details:

Participants with childhood relapsed or refractory acute lymphoblastic leukemia and lymphoblastic lymphoma were enrolled to receive ixazomib 1.6 mg/m²/day or 2 mg/m²/day.

Period 1

Period 1 title	Treatment Period: Day 1 to Week 4
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Ixazomib 1.6 mg/m ²

Arm description:

Ixazomib at dose level 1, 1.6 mg/m²/day, for participants 1 year of age or older (Strata A), and 0.05 mg/kg/day, for infants less than 1 year of age (Strata B), orally, once on Days 1, 4, 8 and 11 of each 28-day cycle, given in combination with VXL backbone chemotherapy (vincristine, dexamethasone, asparaginase, and doxorubicin), up to 4 weeks. Participants were followed for safety up to 100 weeks after last dose.

Arm type	Experimental
Investigational medicinal product name	Doxorubicin
Investigational medicinal product code	
Other name	Adriamycin
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Doxorubicin solution for infusion.

Investigational medicinal product name	Ixazomib
Investigational medicinal product code	
Other name	MLN9708
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Ixazomib capsules.

Investigational medicinal product name	Vincristine
Investigational medicinal product code	
Other name	Oncovin, VCR, LCR
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

Vincristine IV push

Investigational medicinal product name	Dexamethasone
Investigational medicinal product code	
Other name	Decadron, Hexadrol, Dexone, Dexameth
Pharmaceutical forms	Solution for injection

Routes of administration	Intravenous use, Oral use
Dosage and administration details: Dexamethasone PO or IV.	
Investigational medicinal product name	PEG-asparaginase
Investigational medicinal product code	
Other name	Oncaspar, Pegaspargase, Polyethylene Glycol Conjugated L-asparaginase-H
Pharmaceutical forms	Solution for injection/infusion
Routes of administration	Intramuscular and intravenous use
Dosage and administration details: PEG-asparaginase solution for injection/infusion.	
Arm title	Ixazomib 2 mg/m ²
Arm description: Ixazomib at dose level 2, 2 mg/m ² /day, for participants 1 year of age or older (Strata A), and 0.07 mg/kg/day, for infants less than 1 year of age (Strata B), orally, once on Days 1, 4, 8 and 11 of each 28-day cycle, given in combination with VXL backbone chemotherapy (vincristine, dexamethasone, asparaginase, and doxorubicin), up to 4 weeks. Participants were followed for safety up to 100 weeks after last dose.	
Arm type	Experimental
Investigational medicinal product name	Vincristine
Investigational medicinal product code	
Other name	Oncovin, VCR, LCR
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use
Dosage and administration details: Vincristine IV push	
Investigational medicinal product name	Ixazomib
Investigational medicinal product code	
Other name	MLN9708
Pharmaceutical forms	Capsule
Routes of administration	Oral use
Dosage and administration details: Ixazomib capsules.	
Investigational medicinal product name	PEG-asparaginase
Investigational medicinal product code	
Other name	Oncaspar, Pegaspargase, Polyethylene Glycol Conjugated L-asparaginase-H
Pharmaceutical forms	Solution for injection/infusion
Routes of administration	Intramuscular and intravenous use
Dosage and administration details: PEG-asparaginase solution for injection/infusion.	
Investigational medicinal product name	Doxorubicin
Investigational medicinal product code	
Other name	Adriamycin
Pharmaceutical forms	Capsule
Routes of administration	Oral use
Dosage and administration details: Doxorubicin solution for infusion.	
Investigational medicinal product name	Dexamethasone
Investigational medicinal product code	
Other name	Decadron, Hexadrol, Dexone, Dexameth
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use, Oral use

Dosage and administration details:

Dexamethasone PO or IV.

Number of subjects in period 1	Ixazomib 1.6 mg/m²	Ixazomib 2 mg/m²
Started	4	6
Completed	4	6

Period 2

Period 2 title	Follow-up Period: Week 5 to Week 104
Is this the baseline period?	No
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Ixazomib 1.6 mg/m ²

Arm description:

Ixazomib at dose level 1, 1.6 mg/m²/day, for participants 1 year of age or older (Strata A), and 0.05 mg/kg/day, for infants less than 1 year of age (Strata B), orally, once on Days 1, 4, 8 and 11 of each 28-day cycle, given in combination with VXL backbone chemotherapy (vincristine, dexamethasone, asparaginase, and doxorubicin), up to 4 weeks. Participants were followed for safety up to 100 weeks after last dose.

Primary: Number of Participants with Grade 3 or More Treatment Emergent Adverse Events (TEAEs) Graded Using Common Toxicity Criteria for Adverse Event (CTCAE) Criteria Version 5.0 During Block (Cycle) 1 of Chemotherapy

End point title	Number of Participants with Grade 3 or More Treatment Emergent Adverse Events (TEAEs) Graded Using Common Toxicity Criteria for Adverse Event (CTCAE) Criteria Version 5.0 During Block (Cycle) 1 of Chemotherapy ^[2]
-----------------	--

End point description:

TEAEs are defined as any AEs that occurred or worsened during the on-treatment period. TEAEs were graded using National Cancer Institute (NCI) CTCAE Version 5.0. SAEs are generally defined in this Phase 1 study as all Grade 3 and 4 events both unexpected and expected that are possibly, probably, or definitely related to Ixazomib or the chemotherapy backbone, excluding hematologic toxicities unless the event meets the criteria for a DLT. Participants from evaluable response set who were evaluable for safety.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Up to 104 weeks

Adverse event reporting additional description:

At each visit investigator had to document any occurrence of AE and abnormal laboratory findings. Any event reported by participant or by investigator was recorded, irrespective of the relation to study treatment. All-cause mortality: Evaluable response set(n=4,6). SAE and non-SAEs: Participants from evaluable response set with data for safety.

Assessment type	Systematic

Reporting groups

Reporting group title	Ixazomib 2 mg/m ²
-----------------------	------------------------------

Reporting group description:

Ixazomib at dose level 2, 2 mg/m²/day, for participants 1 year of age or older (Strata A), and 0.07 mg/kg/day, for infants less than 1 year of age (Strata B), orally, once on Days 1, 4, 8 and 11 of each 28-day cycle, given in combination with VXL backbone chemotherapy (vincristine, dexamethasone, asparaginase, and doxorubicin), up to 4 weeks. Participants were followed for safety up to 100 weeks after last dose.

Reporting group title	Ixazomib 1.6 mg/m ²
-----------------------	--------------------------------

Reporting group description:

Ixazomib at dose level 1, 1.6 mg/m²/day, for participants 1 year of age or older (Strata A), and 0.05 mg/kg/day, for infants less than 1 year of age (Strata B), orally, once on Days 1, 4, 8 and 11 of each 28-day cycle, given in combination with VXL backbone chemotherapy (vincristine, dexamethasone, asparaginase, and doxorubicin), up to 4 weeks. Participants were followed for safety up to 100 weeks after last dose.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
19 December 2019	The primary purpose of the amendment 1 was to make following changes: <ul style="list-style-type: none">• Dose Modification for Intrathecal Methotrexate/Triple Intrathecal Therapy toxicities: Mercaptopurine dose adjustments made to allow for genotype variations in either TPMT or NUDT15• Dose Modification for Intermediate-Dose Methotrexate toxicities: Added subsection 4.7.7.5 to provide guidance in the event of excess extravasation of fluids into tissues (third spacing)• Clinical and Laboratory Studies: Added neurological exam to be performed prior to each Ixazomib dosing• Bone Marrow Response Criteria for participants with leukemia: amended response definitions to replace CRp category with CRi and divide the CR category to include CR MRD-.
16 September 2020	The primary purpose of the amendment 2 was to make following changes: <ul style="list-style-type: none">• Exclusion criteria: updated the list of excluded CYP3A4 agents• Treatment program: under Block 1, 2, and Maintenance Block, revised timing of Leucovorin for Down syndrome Participants to be received at hours 24 and 30 after intrathecal methotrexate (IT MTX) or intrathecal triple therapy (ITT)• Dose Limiting Toxicity: changed platelet criteria for hematological toxicity definition to platelet $\geq 20,000/\mu\text{L}$, platelet infusion independent and length of evaluation time to 49 days.
11 May 2021	The primary purpose of the amendment 3 was to make following changes: <ul style="list-style-type: none">• Inclusion criteria: clarify the definition of what chemotherapy regimens and drugs and dosages (i.e. maintenance therapy drugs) are allowed prior to enrollment and what length of washout is required for the drugs and biologics• Treatment program: added clarification to allow for flexibility in the timing of chemotherapy administration, including the timing of Day 29 IT therapy, allowing for up to 72 hours flexibility for scheduling or other issues.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
