

Clinical trial results:

A Phase 2, Randomized Clinical Study of Intravenous or Intratumoral Administration of V937 in Combination with Pembrolizumab (MK-3475) Versus Pembrolizumab Alone in Participants with Advanced/Metastatic Melanoma

Summary

EudraCT number	2019-002034-36
Trial protocol	NO GB ES FR DE IT
Global end of trial date	12 July 2023

Results information

Result version number	v2 (current)
This version publication date	05 September 2025
First version publication date	03 July 2024
Version creation reason

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	12 July 2023
Is this the analysis of the primary completion data?	Yes
Primary completion date	12 July 2023
Global end of trial reached?	Yes
Global end of trial date	12 July 2023
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

To evaluate the objective response rate (ORR) of participants treated with IV V937 administered in combination with pembrolizumab, ITu V937 administered in combination with pembrolizumab, or pembrolizumab alone per Response Evaluation Criteria in Solid Tumors Version 1.1 (RECIST 1.1) by blinded independent central review (BICR).

Protection of trial subjects:

This study was conducted in conformance with Good Clinical Practice standards and applicable country and/or local statutes and regulations regarding ethical committee review, informed consent, and the protection of human subjects participating in biomedical research.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	05 June 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Australia: 6
Country: Number of subjects enrolled	Chile: 10
Country: Number of subjects enrolled	Germany: 7
Country: Number of subjects enrolled	Spain: 4
Country: Number of subjects enrolled	France: 2
Country: Number of subjects enrolled	Israel: 5
Country: Number of subjects enrolled	Italy: 2
Country: Number of subjects enrolled	Korea, Republic of: 3
Country: Number of subjects enrolled	Norway: 2
Country: Number of subjects enrolled	United States: 1
Country: Number of subjects enrolled	South Africa: 43
Worldwide total number of subjects	85
EEA total number of subjects	17

Notes:

Subjects enrolled per age group

In utero	0
----------	---

Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	52
From 65 to 84 years	30
85 years and over	3

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

Screening procedures completed within 28 days prior to treatment initiation, exceptions included were laboratory tests, evaluation of Eastern Cooperative Oncology Group, a urine or serum pregnancy test for women of childbearing potential within 72 hours; newly obtained tumor tissue was obtained within 90 days of treatment initiation.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Intravenous (IV) Gebasaxturev + IV Pembrolizumab
------------------	--

Arm description:

Participants received gebasaxturev at a dose of 1×10^9 50% tissue culture infectious dose (TCID₅₀) by IV infusion on Days 1, 3, 5, and 8 of Cycle 1 (28-day cycle) and Day 1 of Cycles 2-8 (21-day cycles) plus pembrolizumab 200 mg by IV infusion on Day 8 of Cycle 1 (28-day cycle) and Day 1 of each subsequent 21-day cycle. Gebasaxturev was administered for up to 8 cycles (up to 6 months). Pembrolizumab was administered for up to 35 cycles (up to 2 years).

Arm type	Experimental
Investigational medicinal product name	Gebasaxturev IV
Investigational medicinal product code	
Other name	Coxsackievirus A21 (CVA21) Formerly known as CAVATAK® CAV21 V937
Pharmaceutical forms	Infusion
Routes of administration	Intravenous use

Dosage and administration details:

Administered as an IV infusion of 1×10^9 TCID₅₀

Arm title	Intratumoral (ITu) Gebasaxturev + IV Pembrolizumab
------------------	--

Arm description:

Participants received gebasaxturev at a dose of 3×10^8 TCID₅₀ by ITu injection on Days 1, 3, 5, and 8 of Cycle 1 (28-day cycle) and Day 1 of Cycles 2-8 (21-day cycles) plus pembrolizumab 200 mg by IV infusion on Day 8 of Cycle 1 (28-day cycle) and Day 1 of each subsequent 21-day cycle. Gebasaxturev was administered for up to 8 cycles (up to 6 months). Pembrolizumab was administered for up to 35 cycles (up to 2 years).

Arm type	Experimental
Investigational medicinal product name	Gebasaxturev ITu
Investigational medicinal product code	
Other name	Coxsackievirus A21 (CVA21) Formerly known as CAVATAK® CAV21 V937
Pharmaceutical forms	Infusion
Routes of administration	Intratumoral use

Dosage and administration details:

Administered as an ITu injection of 3×10^8 TCID₅₀

Arm title	Pembrolizumab IV
------------------	------------------

Arm description:

Participants received pembrolizumab 200 mg by IV infusion on Day 8 of Cycle 1 (28-day cycle) and Day

1 of each subsequent 21-day cycle. Pembrolizumab was administered for up to 35 cycles (up to 2 years).

Arm type	Experimental
Investigational medicinal product name	Pembrolizumab
Investigational medicinal product code	
Other name	MK-3475 Keytruda®
Pharmaceutical forms	Infusion
Routes of administration	Intravenous use

Dosage and administration details:

Administered as an IV infusion of 200 mg

Number of subjects in period 1	Intravenous (IV) Gebasaxturev + IV Pembrolizumab	Intratumoral (ITu) Gebasaxturev + IV Pembrolizumab	Pembrolizumab IV

Baseline characteristics

Reporting groups

Reporting group title	Intravenous (IV) Gebasaxturev + IV Pembrolizumab
-----------------------	--

Reporting group description:

Participants received gebasaxturev at a dose of 1×10^9 50% tissue culture infectious dose (TCID50) by IV infusion on Days 1, 3, 5, and 8 of Cycle 1 (28-day cycle) and Day 1 of Cycles 2-8 (21-day cycles) plus pembrolizumab 200 mg by IV infusion on Day 8 of Cycle 1 (28-day cycle) and Day 1 of each subsequent 21-day cycle. Gebasaxturev was administered for up to 8 cycles (up to 6 months). Pembrolizumab was administered for up to 35 cycles (up to 2 years).

Reporting group title	Intratumoral (ITu) Gebasaxturev + IV Pembrolizumab
-----------------------	--

Reporting group description:

Participants received gebasaxturev at a dose of 3×10^8 TCID50 by ITu injection on Days 1, 3, 5, and 8 of Cycle 1 (28-day cycle) and Day 1 of Cycles 2-8 (21-day cycles) plus pembrolizumab 200 mg by IV infusion on Day 8 of Cycle 1 (28-day cycle) and Day 1 of each subsequent 21-day cycle. Gebasaxturev was administered for up to 8 cycles (up to 6 months). Pembrolizumab was administered for up to 35 cycles (up to 2 years).

Reporting group title	Pembrolizumab IV
-----------------------	------------------

Reporting group description:

Participants received pembrolizumab 200 mg by IV infusion on Day 8 of Cycle 1 (28-day cycle) and Day 1 of each subsequent 21-day cycle. Pembrolizumab was administered for up to 35 cycles (up to 2 years).

Primary: Objective Response Rate (ORR) per Response Evaluation Criteria In Solid Tumors Version 1.1 (RECIST 1.1) as Assessed by Blinded Independent Central Review (BICR)

End point title	Objective Response Rate (ORR) per Response Evaluation Criteria In Solid Tumors Version 1.1 (RECIST 1.1) as Assessed by Blinded Independent Central Review (BICR)
-----------------	--

End point description:

ORR is defined as the percentage of participants who have a Complete Response (CR: disappearance of all lesions) or a Partial Response (PR: at least a 30% decrease in the sum of diameters of target lesions, without evidence of progression based on non-target or new lesions) as assessed by BICR per RECIST 1.1 which was modified for this study to follow a maximum of 10 target lesions and a maximum of 5 target lesions per organ. The percentage of participants who experienced a CR or PR based on modified RECIST 1.1 is presented.

Secondary: Progression Free Survival (PFS) per Response Evaluation Criteria in Solid Tumors Version 1.1 (RECIST 1.1) as Assessed by Blinded Independent Central Review (BICR)	
End point title	Progression Free Survival (PFS) per Response Evaluation Criteria in Solid Tumors Version 1.1 (RECIST 1.1) as Assessed by Blinded Independent Central Review (BICR)
End point description: PFS is defined as the time from randomization to the first documented progressive disease (PD) or death due to any cause, whichever occurs first. Per RECIST 1.1, PD was defined as ≥20% increase in the sum of diameters of target lesions. In addition to the relative increase of 20%, the sum must also demonstrate an absolute increase of ≥5 mm. Note: The appearance of one or more new lesions is also considered PD. A value of 9999 indicates that upper limit not reached at time of data cut-off due to insufficient number of participants with an event.

Secondary: Duration of Response (DOR) per RECIST 1.1, as assessed by the investigator

End point title	Duration of Response (DOR) per RECIST 1.1, as assessed by the investigator
-----------------	--

End point description:

For participants who demonstrated a confirmed complete response (CR: disappearance of all lesions) or confirmed Partial Response (PR: at least a 30% decrease in the sum of diameters of target lesions) per RECIST 1.1 as assessed by the investigator, DOR was defined as the time from first documented evidence of CR or PR until disease progression or death.. A value of 9999 indicates that the median, upper and lower limit not reached at time of data cut-off due to insufficient number of participants with an event.

End point type	Secondary
----------------	-----------

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Up to ~ 37 months

Adverse event reporting additional description:

All-cause mortality (ACM) was analyzed in all randomized participants. Safety analyses were conducted in all randomized participants who received at least 1 dose of study intervention. Per protocol, MedDRA terms "Neoplasm progression (NP)", "Malignant NP" & "Disease progression" unrelated to study drug are excluded as AEs.

Assessment type	Systematic

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
13 May 2020	The amendment purpose was to change the timing of peripheral blood mononuclear cells (PBMC) collection to Day 1 of Cycle 3, and to indicate it is to be performed only at selected study site(s).
27 September 2020	The purpose of the amendment was to eliminate the requirement of collecting throat swabs or sputum samples from close contacts or healthcare workers in relation to the viral transmission of V937 from participants. It aimed to address the requests made by the Health Authority and provide further clarifications.
10 February 2021	This amendment aims to remove C1D1 collection of blood/serum samples from Arm 3 and all biopsies from Arm 3.
24 August 2021	This amendment is for updating the dose modification and toxicity management guidelines for irAEs.
30 August 2022	Amendment 5 aimed for Merck Sharp & Dohme Corp. underwent an entity name and address change to Merck Sharp & Dohme LLC, Rahway, NJ, USA. This conversion resulted only in an entity name change and update to the address.
22 December 2022	Amendment 6 aimed for discontinuation of V937-011 due to the Sponsor's development decision. The overall rationale for this amendment is to allow eligible participants who are receiving pembrolizumab may be enrolled in a pembrolizumab extension study to continue receiving pembrolizumab monotherapy for up to 35 cycles.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

This study was terminated due to the sponsor's development decision.

Notes:
