

Clinical trial results:

A Randomized, Double-Blind, Placebo-Controlled, Parallel-Group Study to Evaluate the Efficacy and Safety of Dupilumab in Patients with Allergic Bronchopulmonary Aspergillosis

Summary

EudraCT number	2019-002619-24
Trial protocol	DE HU GB NL BG FR PL RO
Global end of trial date	09 February 2024

Results information

Result version number	v1 (current)
This version publication date	21 February 2025
First version publication date	21 February 2025

Trial information

Trial identification

Sponsor protocol code	R668-ABPA-1923
-----------------------	----------------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT04442269

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	09 February 2024
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	09 February 2024
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective of the study was to evaluate the efficacy of dupilumab on lung function in participants with Allergic Bronchopulmonary Aspergillosis (ABPA).

Protection of trial subjects:

It is the responsibility of both the sponsor and the investigator(s) to ensure that this clinical study will be conducted in accordance with the ethical principles that have their origin in the Declaration of Helsinki, and that are consistent with the ICH guidelines for GCP and applicable regulatory requirements.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	15 September 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Bulgaria: 3
Country: Number of subjects enrolled	France: 15
Country: Number of subjects enrolled	Germany: 4
Country: Number of subjects enrolled	Hungary: 1
Country: Number of subjects enrolled	Japan: 5
Country: Number of subjects enrolled	Netherlands: 6
Country: Number of subjects enrolled	Poland: 3
Country: Number of subjects enrolled	Romania: 6
Country: Number of subjects enrolled	United Kingdom: 6
Country: Number of subjects enrolled	United States: 13
Worldwide total number of subjects	62
EEA total number of subjects	38

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0

Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	43
From 65 to 84 years	18
85 years and over	1

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

A total of 62 participants were randomized in a 1:1 randomization ratio (35 participants were assigned to the dupilumab group and 27 participants to the placebo group).

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Data analyst, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Matching dupilumab without active substance

Arm type	Placebo
Investigational medicinal product name	placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection/infusion
Routes of administration	Subcutaneous use

Dosage and administration details:

Matching dupilumab without active substance

Arm title	Dupilumab 300 mg Q2W
------------------	----------------------

Arm description:

Subcutaneous (SC) dose every two weeks (Q2W)

Arm type	Experimental
Investigational medicinal product name	dupilumab
Investigational medicinal product code	REGN668
Other name	Dupixent
Pharmaceutical forms	Solution for injection/infusion
Routes of administration	Subcutaneous use

Dosage and administration details:

300 milligrams (mg) every 2 weeks (Q2W)

Number of subjects in period 1	Placebo	Dupilumab 300 mg Q2W
Started	27	35
Completed	20	29
Not completed	7	6
Adverse event, serious fatal	-	1

Consent withdrawn by subject	3	2
Adverse event, non-fatal	1	-
Decision by the Investigator/Sponsor	1	1
Protocol Deviation	-	1
Travel Limitations	1	1
Lost to follow-up	1	-

Secondary: Change from baseline in Asthma Control Questionnaire (ACQ)-5 Score

End point title	Change from baseline in Asthma Control Questionnaire (ACQ)-5 Score
-----------------	--

End point description:

ACQ is completed by participant to measure both the adequacy of asthma control and change in asthma control, which occurs either spontaneously or as a result of treatment. The ACQ-5 score is the mean of the first 5 questions, between 0 (totally controlled) and 6 (severely uncontrolled). A higher score indicates lower asthma control. Participants with a score below 1.0 reflect adequately controlled asthma and participants with scores above 1.0 reflect inadequately controlled asthma. The optimal cut-point score of 1.50 should be used to be confident that a participant has inadequately controlled asthma.

Randomized participants with a baseline measurement and at least one post-baseline measurement at the post-baseline time point of interest

End point type	Secondary
----------------	-----------

End point timeframe:

Over the 24 to 52 Week Treatment Period

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
29 January 2020	Language updates
11 February 2021	The purpose of this protocol amendment was to: update inclusion and exclusion criteria; add provisions to protect patient safety and data integrity during the COVID-19 pandemic; and for minor clarifications, editorial corrections and consistency.
02 February 2023	The purpose of this protocol amendment was to modify study phase, number of participants to be enrolled, study schedule, treatment period, and endpoints. This was due to difficulty in reaching study enrollment goal during the COVID-19 pandemic and low prevalence of ABPA.
24 March 2023	The purpose of this amendment was to modify the study phase.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
