

## Clinical trial results:

### A phase I/Ib open-label, multi-center dose escalation study of JBH492 in patients with relapsed/refractory chronic lymphocytic leukemia (CLL) and Non-Hodgkin's Lymphoma (NHL)

#### Summary

EudraCT number	2019-002666-12
Trial protocol	FI DE
Global end of trial date	05 September 2024

#### Results information

Result version number	v1 (current)
This version publication date	19 July 2025
First version publication date	19 July 2025

#### Trial information

##### Trial identification

Sponsor protocol code	CJBH492A12101
-----------------------	---------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT04240704
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Novartis Pharma AG
Sponsor organisation address	Lichtstrasse 35, Basel, Switzerland, 4056
Public contact	Clinical Disclosure Office, Novartis Pharma AG, 41 613241111, Novartis.email@Novartis.com
Scientific contact	Clinical Disclosure Office, Novartis Pharma AG, 41 613241111, Novartis.email@Novartis.com

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	05 September 2024
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	05 September 2024
Was the trial ended prematurely?	Yes

Notes:

## General information about the trial

Main objective of the trial:

To characterize safety, tolerability, and maximum tolerated dose (MTD)/recommended dose (RD) for expansion of JBH492 single agent in participants with relapsed/refractory (r/r) CLL and r/r NHL.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	07 September 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Japan: 4
Country: Number of subjects enrolled	Korea, Republic of: 1
Country: Number of subjects enrolled	Singapore: 1
Country: Number of subjects enrolled	Spain: 9
Country: Number of subjects enrolled	Finland: 4
Country: Number of subjects enrolled	Germany: 4
Country: Number of subjects enrolled	Israel: 2
Worldwide total number of subjects	25
EEA total number of subjects	17

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0

Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	10
From 65 to 84 years	14
85 years and over	1

## Subject disposition

### Recruitment

Recruitment details:

Participants were enrolled in 8 investigative sites in 7 countries.

### Pre-assignment

Screening details:

The screening period began once patients had signed the study informed consent. Screening evaluations had to be completed within 28 days prior to the first dose of study treatment. After screening, the treatment period started on Cycle 1 Day 1.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	JBH492 0.4 mg/kg

Arm description:

JBH492 0.4 mg/kg intravenously once every 3 weeks

Arm type	Experimental
Investigational medicinal product name	JBH492
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

0.4 mg/Kg once every 3 weeks

<b>Arm title</b>	JBH492 0.8 mg/kg
------------------	------------------

Arm description:

JBH492 0.8 mg/kg intravenously once every 3 weeks

Arm type	Experimental
Investigational medicinal product name	JBH492
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

0.8 mg/Kg once every 3 weeks

<b>Arm title</b>	JBH492 1.6mg/kg
------------------	-----------------

Arm description:

JBH492 1.6 mg/kg intravenously once every 3 weeks

Arm type	Experimental
Investigational medicinal product name	JBH492
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

1.6 mg/Kg once every 3 weeks

<b>Arm title</b>	JBH492 2.4mg/kg
------------------	-----------------

Arm description:

JBH492 2.4 mg/kg intravenously once every 3 weeks

Arm type	Experimental
Investigational medicinal product name	JBH492
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

2.4 mg/Kg once every 3 weeks

<b>Arm title</b>	JHB492 3.6mg/kg
------------------	-----------------

Arm description:

JBH492 3.6 mg/kg intravenously once every 3 weeks

Arm type	Experimental
Investigational medicinal product name	JBH492
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

3.6 mg/Kg once every 3 weeks

<b>Number of subjects in period 1</b>	JBH492 0.4 mg/kg	JBH492 0.8 mg/kg	JBH492 1.6mg/kg
Started	4	3	5
Completed	0	0	0
Not completed	4	3	5
Participant decision	-	-	-

### Primary: Number of participants with dose limiting toxicities (DLTs)

End point title	Number of participants with dose limiting toxicities (DLTs) <sup>[1]</sup>
End point description: A dose-limiting toxicity (DLT) is defined as an adverse event (AE) or abnormal laboratory value that occurs during the first cycle of treatment with JBH492 and meets any of the protocol specified criteria, unless incontrovertibly related to underlying disease, intercurrent illness or concomitant medications.  AE grades to characterize the severity of the AEs were based on the Common Terminology Criteria for Adverse Events (CTCAE) version 5. For CTCAE, Grade 1 = mild; Grade 2 = moderate; Grade 3 = severe; Grade 4 = life-threatening; Grade 5 = death related to AE  No statistical analysis was planned for this primary outcome.	
End point type	Primary
End point timeframe: First cycle of treatment (21 days)	

#### Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical hypothesis testing was planned for this primary endpoint

End point values	JBH492 0.4 mg/kg	JBH492 0.8 mg/kg	JBH492 1.6mg/kg	JBH492 2.4mg/kg

Number of subjects analysed	5			
Units: Participants	0			

## Statistical analyses

No statistical analyses for this end point

### Primary: Number of participants with on treatment Adverse Events (AEs)

End point title	Number of participants with on treatment Adverse Events
-----------------	---

End point description:

An adverse event ( treatment emergent) is defined as the appearance of (or worsening of any pre-existing) undesirable sign(s), symptom(s), or medical condition(s) that occur after patient's signed informed consent has been obtained.

AE grades to characterize the severity of the AEs were based on the Common Terminology Criteria for Adverse Events (CTCAE) version 5. For CTCAE, Grade 1 = mild; Grade 2 = moderate; Grade 3 = severe; Grade 4 = life-threatening; Grade 5 = death related to AE

No statistical analysis was planned for this primary outcome.

End point type	Primary
----------------	---------

End point timeframe:

From treatment day 1 until 30 days post last treatment up to approximately 1.6 years

Notes:

[2] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical hypothesis testing was planned for this primary endpoint

End point values	JBH492 0.4 mg/kg	JBH492 0.8 mg/kg	JBH492 1.6mg/kg	JBH492 2.4mg/kg

## Statistical analyses

No statistical analyses for this end point

### Primary: Number of participants with on treatment Serious Adverse Events (SAEs)

End point title	Number of participants with on treatment Serious Adverse Events (SAEs) <sup>[3]</sup>
-----------------	---

End point description:

A Serious adverse event (SAE) is defined as one of the following:

- Is fatal or life-threatening
- Results in persistent or significant disability/incapacity
- Constitutes a congenital anomaly/birth defect
- Is medically significant
- Requires inpatient hospitalization or prolongation of existing hospitalization.

No statistical analysis was planned for this primary outcome.

End point type	Primary
----------------	---------

End point timeframe:

From treatment day 1 until 30 days post last treatment up to approximately 1.6 years

Notes:

[3] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical hypothesis testing was planned for this primary endpoint

End point values	JBH492 0.4 mg/kg	JBH492 0.8 mg/kg	JBH492 1.6mg/kg	JBH492 2.4mg/kg

## Secondary: Incidence of anti-JBH492 antibodies

End point title	Incidence of anti-JBH492 antibodies
-----------------	-------------------------------------

End point description:

Number of subjects with anti-JBH492 antibodies (Anti-Drug Antibodies)

End point type	Secondary
----------------	-----------

End point timeframe:

From baseline until last dose of study treatment up to approximately 1.5 years

End point values	JBH492 0.4 mg/kg	JBH492 0.8 mg/kg	JBH492 1.6mg/kg	JBH492 2.4mg/kg
Subject group type	Reporting group	Reporting group	Reporting group	Reporting group
Number of subjects analysed	4	3	5	7
Units: participants				
ADA positive at baseline	0	0	2	1
ADA positive with study treatment	0	1	3	2

End point values	JHB492 3.6mg/kg			
Subject group type	Reporting group			
Number of subjects analysed	5			
Units: participants				
ADA positive at baseline	0			
ADA positive with study treatment	1			

## Statistical analyses

No statistical analyses for this end point

## Post-hoc: All collected deaths

End point title	All collected deaths
-----------------	----------------------

End point description:

On-treatment and post-treatment safety follow-up (FU) deaths were collected from first dose of study treatment to 157 days after last dose.

Survival FU deaths were collected from 157 days after last dose until end of study.

All deaths refer to the sum of pre-treatment deaths, on-treatment and post-treatment safety FU deaths,

and survival FU deaths.

End point type	Post-hoc
End point timeframe:	
From first dose of study treatment up to over 157 days after last treatment	
On-treatment and post-treatment safety FU deaths: up to approximately 1.6 years . Survival FU deaths: up to approximately 1.9 years	

End point values	JBH492 0.4 mg/kg	JBH492 0.8 mg/kg	JBH492 1.6mg/kg	JBH492 2.4mg/kg
Subject group type	Reporting group	Reporting group	Reporting group	Reporting group

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Adverse events: from first dose of study treatment until 157 days after last treatment up to maximum duration of 1.6 years

Deaths: from first dose of study treatment until 157 days after last treatment up to maximum duration of 1.6 years

Adverse event reporting additional description:

Consistent with EudraCT disclosure specifications, Novartis has reported under the Serious adverse events field "number of deaths resulting from adverse events" all those deaths resulting from serious adverse events that are deemed to be causally related to treatment by the investigator.

Assessment type	Systematic

occurrences (all)	0	0	1

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
01 January 2020	<p>Incorporated health authority feedback</p> <ul style="list-style-type: none"><li>• Inclusion criteria updated to specify histologic subtypes of NHL permitted in the dose escalation part</li><li>• Clarified inclusion criteria related to enrollment of patients with r/r CLL, r/r NHL, indolent lymphoma, Richter's transformation, and prior CAR-T therapy</li><li>• Added recommendation for premedication to prevent IRRs in subsequent participants if early cohort participants experienced IRRs</li><li>• Specified that in participants with grade 1 IRR, infusion rate to be decreased by 50% until recovery of symptoms to baseline</li><li>• Added recommendations for the management of grade 2 and grade 3 IRRs and grade 3 and grade 4 tumor lysis syndrome</li><li>• Definition of DLT updated; grade 4 hemolytic anemia, grade 4 thrombocytopenia, grade 3 skin rash, grade 2 pneumonitis, and grade 3 motor and/or sensory neuropathy were added as DLTs</li></ul>
01 August 2020	<p>Incorporated health authority feedback</p> <ul style="list-style-type: none"><li>• Clarified inclusion criteria related to relapsed or refractory disease, i.e., patients should have received and failed prior standard of care therapies and be intolerant or ineligible to approved therapies (conditions specified for CLL, NHL, and indolent lymphomas)</li><li>• Inclusion criterion updated to add additional approved chemotherapeutics</li><li>• Added ≥CTCAE grade 3 cytokine release syndrome as DLT</li><li>• Added possibility of hospitalization up to 48 hours at Cycle 1 Day 1 in the dose escalation part, if required by health authority, to the Safety and tolerability section</li></ul>

30 November 2021	<p>Updated exclusion criteria to allow patients with rapidly progressing NHL to be enrolled without unnecessary delay</p> <ul style="list-style-type: none"> <li>• Added exclusion criterion: patients who received any live vaccine against infectious diseases within 4 weeks prior to first dose of study treatment were not eligible</li> <li>• Added public health emergency mitigation procedures per updated regulation</li> <li>• Updated schedule of assessments to align with the section on ocular assessments where ophthalmologic exams during safety follow-up period if abnormal findings observed at EOT were included</li> <li>• For Japan only, change based on IB safety data: updated Japan hospitalization requirement from all of Cycle 1 to through C1D8 and included language for a longer stay based on general status of the participant</li> <li>• Updated schedule of assessments to clarify that lumbar puncture and CSF cytology were required at screening only for patients with CNS involvement or signs/symptoms of CNS involvement to reduce the burden of assessments for patients without CNS involvement</li> <li>• Specified that analysis of CCR7 expression may be performed on tumor material submitted from screen failure patients to utilize all samples collected in the escalation part, given that patient populations from the study selected indications are challenging to find</li> <li>• Aligned breastfeeding information with the IB: breast-feeding should not be performed while on study treatment, and for 180 days after discontinuation of JBH492 plus 60 days or five half-lives (whichever is longer)</li> <li>• Assessment of the benefit/risk concluded the absence of additional risks related to Covid-19</li> <li>• Added physical exam for efficacy evaluations for NHL participants; physical exam would focus on assessment of constitutional symptoms as well as investigation of skin lesions</li> <li>• Multiple local clinical laboratory parameters were removed from collection because they are no longer required</li> <li>• Added HBV DNA to viral serology in local clinical laboratory parameters</li> </ul>
------------------	--

Notes:

## Interruptions (globally)

Were there any global interruptions to the trial? No

## Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Due to EudraCT system limitations, which EMA is aware of, data using 999 as data points in this record are not an accurate representation of the clinical trial results. Please use <https://www.novctrd.com/CtrdWeb/home.nov> for complete trial results.

Notes:
