

## Clinical trial results:

### A Phase 2, 24-Week, Adaptive, Open Label, Sequential Cohort Trial To Evaluate The Efficacy, Safety, Tolerability and Pharmacokinetics of PF-06730512 Following Multiple Doses in Adult Subjects With Focal Segmental Glomerulosclerosis (FSGS)

#### Summary

EudraCT number	2019-003607-35
Trial protocol	DE SK PL CZ IT
Global end of trial date	14 February 2023

#### Results information

Result version number	v1 (current)
This version publication date	17 February 2024
First version publication date	17 February 2024

#### Trial information

##### Trial identification

Sponsor protocol code	C0221002
-----------------------	----------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT03448692
WHO universal trial number (UTN)	-
Other trial identifiers	ROBO2/PODO: C0221002

Notes:

##### Sponsors

Sponsor organisation name	Pfizer Inc.
Sponsor organisation address	235 E 42nd Street, New York, United States, NY 10017
Public contact	Pfizer ClinicalTrials.gov Call Centre, Pfizer Inc., 001 8007181021, ClinicalTrials.gov_Inquiries@pfizer.com
Scientific contact	Pfizer ClinicalTrials.gov Call Centre, Pfizer Inc., 001 8007181021, ClinicalTrials.gov_Inquiries@pfizer.com

Notes:

##### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	25 September 2023
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	14 February 2023
Was the trial ended prematurely?	Yes

Notes:

## General information about the trial

Main objective of the trial:

To evaluate the efficacy of PF-06730512 compared to baseline in the reduction of proteinuria following 12 weeks of treatment in subjects with FSGS.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and in compliance with all International Council for Harmonization (ICH) Good Clinical Practice (GCP) Guidelines. All the local regulatory requirements pertinent to safety of trials subjects were followed.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	15 October 2018
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Canada: 4
Country: Number of subjects enrolled	Czechia: 2
Country: Number of subjects enrolled	Germany: 2
Country: Number of subjects enrolled	Italy: 1
Country: Number of subjects enrolled	Japan: 5
Country: Number of subjects enrolled	Mexico: 1
Country: Number of subjects enrolled	Poland: 4
Country: Number of subjects enrolled	Slovakia: 5
Country: Number of subjects enrolled	Spain: 3
Country: Number of subjects enrolled	United Kingdom: 2
Country: Number of subjects enrolled	United States: 18
Worldwide total number of subjects	47
EEA total number of subjects	17

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37	0

wk	
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	45
From 65 to 84 years	2
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

A total of 47 subjects were enrolled into the study. All subjects received treatment.

### Period 1

Period 1 title	Disposition Phase:Screening:up to 43Days
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

<b>Arm title</b>	PF-06730512 1000 mg IV
------------------	------------------------

Arm description:

Subjects received PF-06730512 1000 milligram (mg) intravenously (IV) every 2 weeks (Q2W).

Arm type	Experimental
Investigational medicinal product name	PF-06730512
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Infusion
Routes of administration	Intravenous use

Dosage and administration details:

Subjects received PF-06730512 1000 mg IV Q2W.

<b>Arm title</b>	PF-06730512 300 mg IV
------------------	-----------------------

Arm description:

Subjects received PF-06730512 300 mg IV Q2W.

Arm type	Experimental
Investigational medicinal product name	PF-06730512
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Infusion
Routes of administration	Intravenous use

Dosage and administration details:

Subjects received PF-06730512 300 mg IV Q2W.

<b>Number of subjects in period 1</b>	PF-06730512 1000 mg IV	PF-06730512 300 mg IV
Started	23	24
Completed	23	24

<b>Period 2</b>	
Period 2 title	Lead in Period:8 Weeks (W)
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	PF-06730512 1000 mg IV

Arm description:

Subjects received PF-06730512 1000 milligram (mg) intravenously (IV) every 2 weeks (Q2W).

Subjects received PF-06730512 300 mg IV Q2W.	

### Primary: Percentage Change From Baseline in Urinary Protein to Creatinine Ratio (UPCR) Based on 24-hour Urine Collection at Week 13

End point title	Percentage Change From Baseline in Urinary Protein to Creatinine Ratio (UPCR) Based on 24-hour Urine Collection at Week 13 <sup>[1]</sup>
End point description:	
UPCR is a ratio between two measured substances in urine: milligram of protein per millimole (mmol) of creatinine, reported in units mg/mmol. A decrease in UPCR may be associated with improved renal and cardiovascular function. The Full Analysis Set (FAS) was defined as all enrolled subjects who had received at least one dose of study treatment and had at least one post-baseline measurement of UPCR based on 24-hour urine collection. Here, "Number of Subjects Analysed" signifies subjects evaluable for this endpoint.	
End point type	Primary
End point timeframe:	
Baseline, Week 13	

#### Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive analysis was planned for this endpoint.

## Secondary: Number of Subjects With Treatment Emergent Adverse Events (TEAEs)

End point title	Number of Subjects With Treatment Emergent Adverse Events (TEAEs)
-----------------	---

End point description:

An adverse event was considered treatment emergent relative to a given treatment if the event occurred for the first time during the investigational treatment period and was not seen prior to the start of treatment (during the lead-in period), or the event was seen prior to the start of treatment but increased in severity during treatment. Adverse events occurring during the lead-in period were considered non-treatment emergent. Events that occurred during the follow-up period were counted as

treatment emergent and attributed to the previous treatment taken. SAS was defined as all enrolled subjects who had received at least one dose of study treatment.

End point type	Secondary
----------------	-----------

End point timeframe:

From Day 1 of treatment up to 9 weeks after last dose of study treatment (up to Week 33)

## Secondary: Percentage Change From Baseline in Estimated Glomerular Filtration Rate (eGFR ) at Weeks 3, 5, 9 and 13

End point title	Percentage Change From Baseline in Estimated Glomerular Filtration Rate (eGFR ) at Weeks 3, 5, 9 and 13
End point description: The eGFR was calculated using 4 variable formula developed by the modification of diet in renal disease (MDRD) study group. The 4 variables needed to estimate glomerular filtration rate (GFR) using this formula were serum creatinine concentration, age, sex (for females, eGFR was multiplied by 0.742) and ethnic origin (for African-Caribbean people only, eGFR was multiplied by 1.212). Thus eGFR in milliliter per minute per 1.73 square meter (mL/min/1.73 m <sup>2</sup> ) = 175*(sCr/88.4) <sup>-1.154</sup> *(Age) <sup>-0.203</sup> *(0.742 if female)*(1.212 if African-Caribbean). Baseline eGFR was determined predose at Week 0 (Day 1). For Baseline eGFR, the "Low eGFR" group was defined as baseline eGFR < 45 mL/min/1.73m <sup>2</sup> , and the "High eGFR" group was defined as baseline eGFR > 45 mL/min/1.73 m <sup>2</sup> . FAS was defined as all enrolled subjects who had received at least one dose of study treatment and had at least one post-baseline measurement of UPCR based on 24-hour urine collected. n= subjects evaluable for specific timepoints.

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

From Day 1 of treatment up to 9 weeks after last dose of study treatment (up to Week 33)

Adverse event reporting additional description:

Same event may appear as both non-SAE and a serious AE. However, what is presented are distinct events. An event may be categorised as serious in one subject and as non-serious in another subject, or one subject may have experienced both a serious and non-serious event during the study.

Assessment type	Non-systematic

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
09 May 2018	Specifications for dose levels, dosing frequency and route of administration have been included. Randomisation of subjects to the high versus the low dose has been removed. Instead, a sequential design has been implemented allowing Cohort 1 enrollment to complete prior to enrolment of Cohort 2.
10 June 2019	Changes in Inclusion and Exclusion Criteria and addition of the optional renal biopsy sub-study.
03 January 2020	Changes to Inclusion/Exclusion criteria.
12 June 2020	Revision/Clarification to contraception language for EU member states and Japan.
18 August 2021	The purpose of this amendment was to extend treatment duration from 12 weeks to 24 weeks, and to add an optional cohort to potentially explore a higher dose.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
