## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
06 March 2020	Amended to update inclusion criteria.
21 May 2020	Amended to add Parts A2 and B.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
20 March 2020	Vertex Pharmaceuticals temporarily paused screening and enrollment in the VX19-814-101 study due to the outbreak of the COVID-19 pandemic.	28 April 2020

Notes:

### Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Based on elevated AST/ALT and low achieved VX-814 exposures, Vertex concluded to terminate study early as it was not feasible to safely reach VX-814 targeted exposure level. Therefore, data are incomplete and result should be interpreted with caution
