

## Clinical trial results:

### A Phase 3, Multicenter, Randomized, Double-Blind, Placebo-Controlled Study to Evaluate Efficacy, Safety, and Tolerability of MT-7117 in Adults and Adolescents with Erythropoietic Protoporphyria or X-Linked Protoporphyria

#### Summary

EudraCT number	2019-004226-16
Trial protocol	NO SE GB DE FI IT
Global end of trial date	26 July 2022

#### Results information

Result version number	v1 (current)
This version publication date	15 July 2023
First version publication date	15 July 2023

#### Trial information

##### Trial identification

Sponsor protocol code	MT-7117-G01
-----------------------	-------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT04402489
WHO universal trial number (UTN)	-
Other trial identifiers	jRCT: jRCT2080225355

Notes:

Sponsor organisation name	Mitsubishi Tanabe Pharma America (MTPA), Inc.
Sponsor organisation address	525 Washington Boulevard, Suite 1100, Jersey City, United States, 07310
Public contact	General Information, Mitsubishi Tanabe Pharma Europe Ltd, regulatory@mt-pharma-eu.com
Scientific contact	General Information, Mitsubishi Tanabe Pharma Europe Ltd, regulatory@mt-pharma-eu.com

Notes:

##### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-002850-PIP02-21
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	26 July 2022
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	26 July 2022
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To investigate the efficacy of MT-7117 on time to onset and severity of first prodromal symptoms (burning, tingling, itching, or stinging) associated with sunlight exposure in adults and adolescents with Erythropoietic Protoporphyrria (EPP) or X-Linked Protoporphyrria (XLP).

Protection of trial subjects:

The study was conducted in accordance with the 2013 (Fortaleza) revision of the Declaration of Helsinki, Good Clinical Practice as required by the International Council for Harmonisation guidelines, applicable regional and local legislation, and standard operating procedures (SOPs) in place at MTPA. Clinical monitoring at the investigational site(s) was delegated to the Contract Research Organization (CRO), along with the responsibility to conform to the CRO's ethical standards and SOPs.

An external independent Data Monitoring Committee was established to perform regular review of safety data to ensure the ongoing safety of participating subjects until the last subject completed the Double blind extension period.

A subject was withdrawn from study if ANY of the following criteria were met:

1. The subject requests to voluntarily withdraw from further participation in study.
2. The subject is significantly noncompliant with the protocol.
3. Continuing in the study would be detrimental to the subject's safety in the opinion of the Investigator, e.g.,
  - a. The subject experiences intolerable AEs, SAEs, or AESIs.
  - b. The subject has clinically significant changes in safety parameters at any of the post-dose time points, as confirmed with a repeat assessment performed as soon as possible after the initial out-of-range result.
  - c. The subject experiences any clinically significant adverse findings from postbaseline nevi evaluation and adverse change is demonstrated histologically and confirmed by central pathologist. Visual evaluation of change will not be acceptable criteria for permanent discharge from treatment.
  - d. Development of any clinically significant liver dysfunction, as follows:
    - i. ALT or AST  $>8 \times$  ULN.
    - ii. ALT or AST  $>5 \times$  ULN for more than 2 weeks.
    - iii. Elevated total bilirubin  $>2 \times$  ULN and ALT or AST  $>3 \times$  ULN or
    - iv. Symptoms consistent with liver dysfunction (e.g., fatigue, nausea, vomiting, abdominal pain or tenderness)

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 June 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Norway: 3
Country: Number of subjects enrolled	Spain: 11
Country: Number of subjects enrolled	Sweden: 5

Country: Number of subjects enrolled	United Kingdom: 14
Country: Number of subjects enrolled	Germany: 6
Country: Number of subjects enrolled	Italy: 21
Country: Number of subjects enrolled	United States: 93
Country: Number of subjects enrolled	Japan: 11
Country: Number of subjects enrolled	Australia: 12
Country: Number of subjects enrolled	Canada: 8
Worldwide total number of subjects	184
EEA total number of subjects	46

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	37
Adults (18-64 years)	138
From 65 to 84 years	9
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

A sufficient number of subjects were screened to ensure the planned sample size was achieved. Each subject were screened according to the criteria. Only subjects eligible for the study were randomized.

### Pre-assignment

Screening details:

Subjects attended the screening visit (Visit 1) up to 6 weeks before Randomization (Visit 2), to confirm eligibility, obtain pre-study safety assessments including nevi evaluation, and to receive instruction on how to use the electronic sunlight exposure diary (SED).

### Period 1

Period 1 title	26 weeks Double-Blind Treatment
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	placebo

Arm description: -

Arm type	Placebo
Investigational medicinal product name	MT-7117 matching placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects self-administered 2 tablets of investigational medicinal product (IMP) with or without food each morning

<b>Arm title</b>	MT-7117 low dose
------------------	------------------

Arm description: -

Arm type	Experimental
Investigational medicinal product name	MT-7117
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects self-administered 2 tablets of investigational medicinal product (IMP) with or without food each morning. Subjects received 1 tablet of MT-7117 and 1 tablet of matching placebo.

Investigational medicinal product name	MT-7117 matching placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects self-administered 2 tablets of investigational medicinal product (IMP) with or without food each morning. Subjects received 1 tablet of MT-7117 and 1 tablet of matching placebo.

<b>Arm title</b>	MT-7117 high dose
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	MT-7117
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

**Dosage and administration details:**

Subjects self-administered 2 tablets of investigational medicinal product (IMP) with or without food each morning.

Started	55
Completed	52
Not completed	3
Adverse event, serious fatal	1
Consent withdrawn by subject	2
Lost to follow-up	-

Notes:

[1] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: Not all subjects took the offer to participate in a 6-month extension which all participants were on active drug but were double-blinded to dose starting immediately after the end of DBT period. Subjects who received MT-7117 during the DBT period continued the DBE in the same treatment arm and remained blinded. Subjects who received placebo were randomized to receive MT-7117 low or high dose in 1:1 ratio for the DBE period.

Investigations			
Aspartate aminotransferase increased	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	1 / 54 (1.85%)		
occurrences (all)	0		
Alanine aminotransferase increased	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	2 / 54 (3.70%)		
occurrences (all)	0		
Gamma-glutamyltransferase increased	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	0 / 54 (0.00%)		
occurrences (all)	0		
SARS-CoV-2 test positive	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	1 / 54 (1.85%)		
occurrences (all)	0		
Weight decreased	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	0 / 54 (0.00%)		
occurrences (all)	0		
Injury, poisoning and procedural complications			
Vaccination complication	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	2 / 54 (3.70%)		
occurrences (all)	0		
Post vaccination syndrome	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	2 / 54 (3.70%)		
occurrences (all)	0		
Cardiac disorders			
Sinus bradycardia	Additional description: Number of occurrences for each event were not reported in this study.		

subjects affected / exposed	2 / 54 (3.70%)		
occurrences (all)	0		
Nervous system disorders			
Headache	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	2 / 54 (3.70%)		
occurrences (all)	0		
General disorders and administration site conditions			
Fatigue	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	1 / 54 (1.85%)		
occurrences (all)	0		
Pyrexia	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	0 / 54 (0.00%)		
occurrences (all)	0		
Gastrointestinal disorders			
Nausea	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	2 / 54 (3.70%)		
occurrences (all)	0		
Diarrhoea	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	1 / 54 (1.85%)		
occurrences (all)	0		
Abdominal pain	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	0 / 54 (0.00%)		
occurrences (all)	0		
Abdominal discomfort	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	1 / 54 (1.85%)		
occurrences (all)	0		
Pigmentation lip	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	1 / 54 (1.85%)		
occurrences (all)	0		
Dyspepsia	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	0 / 54 (0.00%)		
occurrences (all)	0		
Vomiting	Additional description: Number of occurrences for each event were not reported in this study.		

subjects affected / exposed	2 / 54 (3.70%)		
occurrences (all)	0		
Abdominal pain upper	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	1 / 54 (1.85%)		
occurrences (all)	0		
Frequent bowel movements	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	0 / 54 (0.00%)		
occurrences (all)	0		
Respiratory, thoracic and mediastinal disorders			
Oropharyngeal pain	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	1 / 54 (1.85%)		
occurrences (all)	0		
Skin and subcutaneous tissue disorders			
Skin discolouration	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	0 / 54 (0.00%)		
occurrences (all)	0		
Skin hyperpigmentation	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	0 / 54 (0.00%)		
occurrences (all)	0		
Ephelides	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	0 / 54 (0.00%)		
occurrences (all)	0		
Acne	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	0 / 54 (0.00%)		
occurrences (all)	0		
Hair colour changes	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	0 / 54 (0.00%)		
occurrences (all)	0		
Photosensitivity reaction	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	2 / 54 (3.70%)		
occurrences (all)	0		
Solar lentigo	Additional description: Number of occurrences for each event were not reported in this study.		

subjects affected / exposed	0 / 54 (0.00%)		
occurrences (all)	0		
Pigmentation disorder	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	0 / 54 (0.00%)		
occurrences (all)	0

Back pain	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	0 / 54 (0.00%)		
occurrences (all)	0		
Infections and infestations			
COVID-19	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	10 / 54 (18.52%)		
occurrences (all)	0		
Upper respiratory tract infection	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	0 / 54 (0.00%)		
occurrences (all)	0		
Nasopharyngitis	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	3 / 54 (5.56%)		
occurrences (all)	0		
Metabolism and nutrition disorders			
Decreased appetite	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	0 / 54 (0.00%)		
occurrences (all)	0		
Vitamin D deficiency	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	2 / 54 (3.70%)		
occurrences (all)	0		
Iron deficiency	Additional description: Number of occurrences for each event were not reported in this study.		
subjects affected / exposed	2 / 54 (3.70%)		
occurrences (all)	0		

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
05 July 2020	Amendment 1 V2.0. The main changes were: <ul style="list-style-type: none"><li>-reflect inclusion of adolescents.</li><li>- Sample size of the study was increased due to statistical considerations.</li><li>- Secondary and Exploratory efficacy endpoints were amended.</li><li>-Additional demographic information will be collected.</li><li>-Description of the subgroup analyses was added.</li><li>-Description of prohibited or precautionary concomitant medications was amended.</li><li>-Approved prohibited concomitant medications were revised.</li></ul>
08 June 2021	Amendment 2 v3.0. The main changes were: <ul style="list-style-type: none"><li>- One exploratory objective to investigate the effect of mutations in MCIR gene on efficacy was added.</li><li>- Study methodology was updated to clarify the randomization rule for subjects with adolescents and better clarify the schedule of assessments.</li><li>-The language in Number of planned subjects was revised correctly considering the stratification rule with subjects under 45 kg body weight.</li><li>- Exclusion criteria 11 was revised to specify the criteria to exclude more than stage 3a Chronic Kidney Disease patients based on eGFR, and the equations for calculating eGFR for adolescents were specified.</li><li>- The language in Risk: Benefit statement was updated to include the new findings of non-clinical findings (pre- and postnatal development study in rats) and COVID-19 pandemic.</li></ul>
25 October 2021	Amendment 3.0 v4.0. v4.0 was replaced by Amendment 3.1 v4.1 and approved as a part of v4.1 which was non-substantial amendment. The main changes were: <ul style="list-style-type: none"><li>- Sponsor's UK representative address was added'</li><li>-Increased number of patients and sample size estimation.</li><li>-Withdrawal of Individual Subjects section was updated.</li><li>-QP certification revised to define UK and EU certification.</li><li>-Adverse Events of Special Interest section was updated.</li><li>-Management and Evaluation of Hepatic Adverse Events of Special Interest section was defined in more detail.</li><li>-An external independent Data Monitoring Committee (iDMC) will be established.</li></ul>

Notes:

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
