Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	06 June 2022
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	06 June 2022
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective of the study was to demonstrate equivalent efficacy of proposed biosimilar tocilizumab MSB11456 and EU-approved RoActemra when both were administered subcutaneously to patients with moderately to severely active rheumatoid arthritis.

Protection of trial subjects:

This study was conducted in compliance with Good Clinical Practice (GCP), including the archiving of essential documents.

Background therapy:

The study population comprised participants with moderately to severely active rheumatoid arthritis who had an inadequate response to at least 1 disease-modifying antirheumatic drug (either synthetic or biologic) and who were receiving a stable dose of methotrexate.

Evidence for comparator: -

Actual start date of recruitment	03 August 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Georgia: 94
Country: Number of subjects enrolled	Moldova, Republic of: 23
Country: Number of subjects enrolled	Russian Federation: 40
Country: Number of subjects enrolled	Serbia: 18
Country: Number of subjects enrolled	Czechia: 44
Country: Number of subjects enrolled	Poland: 303
Country: Number of subjects enrolled	Slovakia: 6
Country: Number of subjects enrolled	Bulgaria: 34
Country: Number of subjects enrolled	Hungary: 42
Worldwide total number of subjects	604
EEA total number of subjects	429

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37	0

wk	
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	499
From 65 to 84 years	105
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Participants were enrolled at research centers in Bulgaria, Czechia, Georgia, Hungary, the Republic of Moldova, Poland, Russia, Serbia and Slovakia from August 2020 to June 2022.

Pre-assignment

Screening details:

604 participants were enrolled and received treatment in the Core Treatment Period. 543 participants were re-randomized and 541 participants received treatment in the Extended Treatment Period.

Period 1

Period 1 title	Week 0 to Week 24
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Monitor, Subject, Data analyst, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Core Treatment Period: MSB11456

Arm description:

Participants received MSB11456 subcutaneously, once a week during the core treatment period (Baseline to Week 24).

Arm type	Experimental
Investigational medicinal product name	MSB11456
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Subcutaneous injection, once a week during the core treatment period (Baseline to Week 24).

Arm title	Core Treatment Period: RoActemra®
------------------	-----------------------------------

Arm description:

Participants received EU-approved RoActemra® subcutaneously, once a week during the core treatment period (Baseline to Week 24).

Arm type	Active comparator
Investigational medicinal product name	RoActemra®
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Subcutaneous injection, once a week during the core treatment period (Baseline to Week 24).

Number of subjects in period 1	Core Treatment Period: MSB11456	Core Treatment Period: RoActemra®
Started	302	302
Received Treatment	302	302
Completed	267	276

Discontinued treatment prior to Week 24	4	4
Adverse event, serious fatal	-	2
Consent withdrawn by subject	16	9
Did not meet eligibility but was randomized	-	1
Adverse event, non-fatal	14	10
Withdrawal By Sponsor`s Decision	1	-

Period 2

Period 2 title	Week 24 to Week 63
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Core Period; MSB11456; Extended Period: MSB11456

Arm description:

Participants who received MSB11456 during the core treatment period (Baseline to Week 24). Participants were then re-randomized to continue receiving MSB11456 subcutaneously, once a week for an additional 28-week during the extended treatment period (Week 24 to Week 52).

Arm type	Experimental
Investigational medicinal product name	MSB11456
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Subcutaneous injection, once a week during the core treatment period (Baseline to Week 24) and then once a week in the extended treatment period (Week 24 to Week 52).

Arm title	Core Period: RoActemra®; Extended Period: MSB11456
------------------	--

Arm description:

Participants who received EU-approved RoActemra® during the core treatment period (Baseline to Week 24). Participants were then re-randomized to begin receiving MSB11456 subcutaneously, once a week for an additional 28-week during the extended treatment period (Week 24 to Week 52).

Arm type	Experimental
----------	--------------

Investigational medicinal product name	RoActemra®

Subject analysis set type	Full analysis
Subject analysis set description: All participants who received MSB11456 at any time in either the Core Treatment Period (Baseline to Week 24) and/or the Extended Treatment Period (Week 24 to Week 52). Participants received MSB11456 subcutaneously, once a week.	
Subject analysis set title	EU-approved RoActemra®
Subject analysis set type	Full analysis
Subject analysis set description: All participants who only received EU-approved RoActemra® during the Core Treatment Period (Baseline to Week 24) and/or the Extended Treatment Period (Week 24 to Week 52). Participants received EU-approved RoActemra® subcutaneously, once a week.	

Primary: Change From Baseline in Disease Activity Score 28-Erythrocyte Sedimentation Rate (DAS28-ESR)

End point title	Change From Baseline in Disease Activity Score 28-Erythrocyte Sedimentation Rate (DAS28-ESR)
-----------------	--

End point description:

The DAS28-ESR is a measure of disease activity in 28 joints that consists of a composite numerical score of the following variables: Tender Joint Count, Swollen Joint Count, erythrocyte sedimentation rate and Patient's Global Assessment of Disease Activity.

The DAS28-ESR score was derived using the formula: $\text{DAS28-ESR} = 0.56 \cdot \sqrt{\text{TJC28}} + 0.28 \cdot \sqrt{\text{SJC28}} + 0.014 \cdot \text{GH} + 0.70 \cdot \ln(\text{ESR})$, where, TJC28 = 28 joint count for tenderness, SJC28 = 28 joint count for swelling, $\ln(\text{ESR})$ = natural logarithm of ESR, GH = the general health component of the DAS (i.e., Patient's Global Assessment of Disease Activity on a scale of 1 to 100 where 100 is maximal activity).

Higher values mean a higher disease activity. The level of disease activity can be interpreted as:

- Remission (score of <2.6).
- Low (score of ≤2.6 to <3.2).

- Moderate (score of ≤ 3.2 to ≤ 5.1).
- High (score of > 5.1)

A negative change from baseline indicates an improvement.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Day 1 up to Week 63

Adverse event reporting additional description:

Safety Analysis Set: includes all participants who received at least one dose of study drug (MBS11456 or EU-approved RoActemra®). The tables below only include treatment-emergent adverse events and "Other Adverse Events" only include non-serious TEAEs.

Assessment type	Non-systematic

Reporting groups

Reporting group title	MSB11456
-----------------------	----------

Reporting group description:

All participants who received MSB11456 in the Core Treatment Period (Baseline to Week 24) and then re-randomized to continue MSB11456 in the Extended Treatment Period (Week 24 to Week 52).

Participants received MSB11456 subcutaneously, once a week.

Reporting group title	Core Period: RoActemra®; Extended Period: MSB11456
-----------------------	--

Reporting group description:

Participants received EU-approved RoActemra® subcutaneously, once a week during the core treatment period (Baseline to Week 24). Participants were then re-randomized to begin receiving MSB11456 subcutaneously, once a week during the extended treatment period (Week 24 to Week 52).

Reporting group title	EU-approved RoActemra®
-----------------------	------------------------

Reporting group description:

All participants who received EU-approved RoActemra® in the Core Treatment Period (Baseline to Week 24) and then re-randomized to continue RoActemra® in the Extended Treatment Period (Week 24 to Week 52).

Participants received EU-approved RoActemra® subcutaneously, once a week.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
06 May 2020	<p>The following updates were implemented:</p> <ul style="list-style-type: none">* Due to the COVID-19 pandemic, measures were implemented to increase safeguarding for the patients, including:<ul style="list-style-type: none">- Implementation of risk minimization and the mitigation plan for COVID-19.- Provision of a separate ICF to inform patients of the nature and impact of COVID-19.- Updates to the exclusion criteria to exclude patients with confirmed or suspected active COVID-19 infection and to ensure that the investigator specifically evaluated the patient's eligibility taking into consideration COVID-19 risk factors and situation.- Provided details of action to take with the IMP due to COVID-19 and confirmed details of COVID-19 AE/SAE reporting.- Permitted the inclusion of local laboratories (with preapproval of the Sponsor) instead of central laboratories, if required due to the COVID-19 situation.* Provided fuller details of injection site reactions and reporting, and instructions for the investigator to ask the patient if any such reaction had occurred since the last assessment.* Replaced predefined AESIs with a statement that any AEs that lead to interruption of IMP, permanent discontinuation of IMP, or withdrawal from the study would be considered predefined AESIs.
01 February 2021	<p>The following changes were implemented:</p> <ul style="list-style-type: none">* Added that COVID-19 vaccination was not allowed from 4 weeks prior to randomization until the completion of the Week 30 visit (COVID-19-related protocol deviation); noted that COVID-19 vaccination was not recommended thereafter until the completion of the Week 55 visit and provided guidance regarding the timing of any such vaccination.* Removed details regarding North America, Asia, and the Rest of the World, including stratification by geographical region, as the study was being conducted in Europe only.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
