

## Clinical trial results:

**MyRisk: Efficacy and safety evaluation of oral Akynzeo® in patients receiving MEC at high risk of developing CINV based on a prediction tool. A multinational and multicenter study.**

### Summary

EudraCT number	2019-004686-41
Trial protocol	GB GR CZ DE ES
Global end of trial date	02 July 2024

### Results information

Result version number	v1 (current)
This version publication date	16 July 2025
First version publication date	16 July 2025

### Trial information

#### Trial identification

Sponsor protocol code	IBA1160
-----------------------	---------

#### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT04817189
WHO universal trial number (UTN)	-

Notes:

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	24 June 2025
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	02 July 2024
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To evaluate if the use of NEPA (netupitant and palonosetron) in patients treated with IV moderately emetogenic chemotherapy and at high risk of CINV is more effective in preventing CINV than standard of care antiemetics over three cycles of chemotherapy

Protection of trial subjects:

The trial subjects were treated according to a common clinical practice. The only intervention in the trial was randomization.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 February 2021
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 75
Country: Number of subjects enrolled	United Kingdom: 17
Country: Number of subjects enrolled	Czechia: 84
Country: Number of subjects enrolled	Germany: 97
Country: Number of subjects enrolled	Greece: 76
Country: Number of subjects enrolled	China: 53
Country: Number of subjects enrolled	Switzerland: 12
Worldwide total number of subjects	414
EEA total number of subjects	332

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0

Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	223
From 65 to 84 years	190
85 years and over	1

## Subject disposition

### Recruitment

Recruitment details:

Start recruitment date (FPI): 01.02.2021

Stop recruitment date (LPI): 04.04.2024

Territories: Czech Republic, Greece, Germany, Switzerland, United Kingdom, China, Spain

### Pre-assignment

Screening details:

Screened patients: 427

Screen failure: 12

Total analysis set: 415

### Period 1

Period 1 title	Overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	NEPA

Arm description:

One capsule of NEPA and Dexamethasone 8 mg (or equivalent corticosteroids) by the oral route on Day 1, approximately 1 hour before chemotherapy

Arm type	Experimental
Investigational medicinal product name	Akynzeo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

One capsule of NEPA by the oral route on Day 1, approximately 1 hour before chemotherapy

<b>Arm title</b>	Standard of care
------------------	------------------

Arm description:

- One of the 5-HT<sub>3</sub>-RAs recommended by MASCC/ESMO guidelines (standard of care), i.e. either: Granisetron, 2 mg (oral) or 1 mg (IV)

OR

Palonosetron, 0.5 mg (oral) or 0.25mg (IV)

OR

Ondansetron, 16 mg (oral) or 8 mg (IV)

OR

Dolasetron 100 mg (oral)

OR

Tropisetron 5 mg (oral or IV)

- Dexamethasone (or equivalent corticosteroids) 8 mg administered by the oral route (or equivalent IV dose) on Day 1, approximately 1 hour before chemotherapy

Arm type	Active comparator
----------	-------------------

Investigational medicinal product name	Granisetron
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Intravesical solution, Tablet
Routes of administration	Oral use

Dosage and administration details:

Granisetron, 2 mg (oral) or 1 mg (IV)

<b>Number of subjects in period 1</b>	NEPA	Standard of care
Started	206	208
Completed	171	177

Lost to follow-up	5	3
Non-qualification to perform consecutive cycles (e	3	10
Protocol deviation	3	1

## Baseline characteristics

### Reporting groups

Reporting group title	Overall trial
Reporting group description: -	

Reporting group values	Overall trial	Total	
Number of subjects	414	414	
Age categorical			
Units: Subjects			
In utero	0	0	
Preterm newborn infants (gestational age < 37 wks)	0	0	
Newborns (0-27 days)	0	0	
Infants and toddlers (28 days-23 months)	0	0	
Children (2-11 years)	0	0	
Adolescents (12-17 years)	0	0	
Adults (18-64 years)	223	223	
From 65-84 years	190	190	
85 years and over	1	1	
Age continuous			
Units: years			
arithmetic mean	62.7		
standard deviation	± 11.5	-	
Gender categorical			
Units: Subjects			
Female	187	187	
Male	227	227	

### Subject analysis sets

Subject analysis set title	Full Analysis set
Subject analysis set type	Full analysis

Subject analysis set description:

The Full Analysis Set (FAS) consists of 401 (NEPA: 196, SoC: 205) randomised patients to whom study drug was dispensed.

Reporting group values	Full Analysis set		
Number of subjects	401		
Age categorical			
Units: Subjects			
In utero	0		
Preterm newborn infants (gestational age < 37 wks)	0		
Newborns (0-27 days)	0		
Infants and toddlers (28 days-23 months)	0		
Children (2-11 years)	0		
Adolescents (12-17 years)	0		

Adults (18-64 years)	210		
From 65-84 years	190		
85 years and over	1		
Age continuous			
Units: years			
arithmetic mean	62.7		
standard deviation	± 11.5		
Gender categorical			
Units: Subjects			
Female	180		
Male	221		

## End points

### End points reporting groups

Reporting group title	NEPA
-----------------------	------

Reporting group description:

One capsule of NEPA and Dexamethasone 8 mg (or equivalent corticosteroids) by the oral route on Day 1, approximately 1 hour before chemotherapy

Reporting group title	Standard of care
-----------------------	------------------

Reporting group description:

- One of the 5-HT3-RAs recommended by MASCC/ESMO guidelines (standard of care), i.e. either:  
Granisetron, 2 mg (oral) or 1 mg (IV)  
OR  
Palonosetron, 0.5 mg (oral) or 0.25mg (IV)  
OR  
Ondansetron, 16 mg (oral) or 8 mg (IV)  
OR  
Dolasetron 100 mg (oral)  
OR  
Tropisetron 5 mg (oral or IV)

- Dexamethasone (or equivalent corticosteroids) 8 mg administered by the oral route (or equivalent IV dose) on Day 1, approximately 1 hour before chemotherapy

Units: Probability (%)				
number (not applicable)	81.0	71.8		

## Statistical analyses

<b>Statistical analysis title</b>	Probability to experience complete response
Statistical analysis description:	
Primary endpoint was defined as complete response over three cycles of chemotherapy. To estimate the probability of complete response, a generalized linear model with covariates was used to evaluate the treatment effect of the NEPA compared to the SoC arm. Estimated OR from model was used to derive the difference in the probability of responders between treatment arms. Model-based statistics were used to calculate the difference in the probability to experience a "per cycle" complete response.	
Comparison groups	NEPA v Standard of care
Number of subjects included in analysis	388
Analysis specification	Pre-specified
Analysis type	superiority
P-value	< 0.05
Method	a generalized linear model with covariat

### Secondary: Complete response during the acute (0-24h), delayed phase (>24-120h), overall (0-120h) and daily in each cycle

End point title	Complete response during the acute (0-24h), delayed phase (>24-120h), overall (0-120h) and daily in each cycle
