Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	24 February 2023
Is this the analysis of the primary completion data?	Yes
Primary completion date	03 March 2022
Global end of trial reached?	Yes
Global end of trial date	03 March 2022
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Prove that the administration of Naloxegol in the perioperative period of cardiac surgery reduces the duration of the postoperative ileus.

Protection of trial subjects:

This clinical trial was approved by a Committee for Protection of Human Subjects (CPP OUEST III - CPP 20.03.22/SI CNRIPH 20.02.25.46201) and the french national agency for medicines and health products safety (ANSM MEDAECNAT-2020-02-00024). The trial was conducted in accordance with the Declaration of Helsinki and the Good Clinical Practice. Prior to inclusion, written informed consent was obtained from all subjects after a thorough oral and written participant information had been given.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	14 October 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	France: 305
Worldwide total number of subjects	305
EEA total number of subjects	305

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	181
From 65 to 84 years	123
85 years and over	1

Subject disposition

Recruitment

Recruitment details:

Patients were included from October 2020 to January 2022.

Patients scheduled for cardiac surgery with cardiopulmonary bypass were informed of the study protocol during the cardiology visit. They were included before the surgery after signing informed consent. We enrolled patient over 18 years-old with social security.

Pre-assignment

Screening details:

Exclusion criteria : Allergy to Naloxegol or opioid antagonist; Severe hepatic failure; GFR<60ml/min; Treatment with cytochrome P450 3A4 inhibitor, laxative or methadone; History of gastro-intestinal obstruction or digestive arteritis; Alteration of the blood-brain-barrier or gastrointestinal lining; Cancer with risk of gastroduodenal perforation.

Pre-assignment period milestones

Number of subjects started	305
Number of subjects completed	304

Pre-assignment subject non-completion reasons

Reason: Number of subjects	Cancelled surgery: 1
----------------------------	----------------------

Period 1

Period 1 title	Overall period
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Naloxegol
------------------	-----------

Arm description:

One naloxegol 12.5 mg tablet will be administrated 2 hours before surgery. One 25 mg naloxegol tablet per day will be administrated from 24h post-surgery until bowel movement; for maximum 5 days.

Arm type	Experimental
Investigational medicinal product name	Naloxegol 12,5 mg and 25mg
Investigational medicinal product code	
Other name	Moventig
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

One naloxegol 12.5 mg tablet will be administrated 2hours before surgery. One 25 mg naloxegol tablet per day will be administrated from 24h post-surgery until bowel movement; for maximum 5 days.

Arm title	Placebo
------------------	---------

Arm description:

One inert tablet will be administrated 2 hours before surgery. One inert tablet per day will be administrated from 24h post-surgery until bowel movement; for maximum 5 days.

Arm type	Placebo
----------	---------

Investigational medicinal product name	Inert Tablet
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

One inert tablet will be administrated 2 hours before surgery. One inert tablet per day will be administrated from 24h post-surgery until bowel movement; for maximum 5 days.

Number of subjects in period 1	Naloxegol	Placebo
Started	153	151
Treated	151	150
Completed	151	150
Not completed	2	1
Consent withdrawn by subject	1	1
Cancelled surgery	1	-

Period 2

Period 2 title	Treated
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Naloxegol

Arm description:

One naloxegol 12.5 mg tablet will be administrated 2 hours before surgery. One 25 mg naloxegol tablet per day will be administrated from 24h post-surgery until bowel movement; for maximum 5 days.

Arm type	Experimental
Investigational medicinal product name	Naloxegol 12,5 mg and 25mg
Investigational medicinal product code	
Other name	Moventig
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

One naloxegol 12.5 mg tablet will be administrated 2hours before surgery. One 25 mg naloxegol tablet per day will be administrated from 24h post-surgery until bowel movement; for maximum 5 days.

Arm title	Placebo
------------------	---------

Arm description:

One inert tablet will be administrated 2 hours before surgery. One inert tablet per day will be administrated from 24h post-surgery until bowel movement; for maximum 5 days.

Arm type	Placebo
----------	---------

Investigational medicinal product name	Inert Tablet
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

One inert tablet will be administrated 2 hours before surgery. One inert tablet per day will be administrated from 24h post-surgery until bowel movement; for maximum 5 days.

Number of subjects in period 2	Naloxegol	Placebo
Started	151	150
Transit recovery	151	148
Completed	151	148
Not completed	0	2
Adverse event, serious fatal	-	2

Period 3

Period 3 title	Transit recovery
Is this the baseline period?	Yes ^[1]
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Naloxegol

Arm description:

One naloxegol 12.5 mg tablet will be administrated 2 hours before surgery. One 25 mg naloxegol tablet per day will be administrated from 24h post-surgery until bowel movement; for maximum 5 days.

Arm type	Experimental
Investigational medicinal product name	Naloxegol 12,5 mg and 25mg
Investigational medicinal product code	
Other name	Moventig
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

One naloxegol 12.5 mg tablet will be administrated 2hours before surgery. One 25 mg naloxegol tablet per day will be administrated from 24h post-surgery until bowel movement; for maximum 5 days.

Arm title	Placebo
------------------	---------

Arm description:

One inert tablet will be administrated 2 hours before surgery. One inert tablet per day will be administrated from 24h post-surgery until bowel movement; for maximum 5 days.

Arm type	Placebo
----------	---------

Investigational medicinal product name	Inert Tablet
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

One inert tablet will be administrated 2 hours before surgery. One inert tablet per day will be administrated from 24h post-surgery until bowel movement; for maximum 5 days.

Notes:

[1] - Period 1 is not the baseline period. It is expected that period 1 will be the baseline period.

Justification: As defined in the clinical trial protocol, we analyze the baseline characteristics and the end points for the patients treated and recovering transit.

The number of subjects treated and recovering transit are the number of subjects reported to be in the baseline period.

So the baseline period is the period 3 « Transit Recovery » and not the period 1 « Overall Period ».

Number of subjects in period 3^[2]	Naloxegol	Placebo
Started	151	148
Completed	151	148

Notes:

[2] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: As defined in the clinical trial protocol, we analyze the baseline characteristics and the end points for the patients treated and recovering transit.

The number of subjects treated and recovering transit are the number of subjects reported to be in the baseline period.

So the number of subjects reported to be in the baseline period are not the same as the worldwide enrolled in the trial.

Method	Fisher exact

Secondary: Respiratory complications - Reintubation

End point title	Respiratory complications - Reintubation
-----------------	--

End point description:

Respiratory complications defined as number of patients with reintubation for respiratory failure.

End point type	Secondary
----------------	-----------

End point timeframe:

30 days

End point values	Naloxegol	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	151	148		
Units: Number of patients	3	4		

Statistical analyses

Statistical analysis title	Respiratory complications - Reintubation - Fisher
Comparison groups	Naloxegol v Placebo
Number of subjects included in analysis	299
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.72
Method	Fisher exact

Secondary: Respiratory complications - Invasive or not invasive ventilation at day 2

End point title	Respiratory complications - Invasive or not invasive ventilation at day 2
End point description: Respiratory complications defined as number of patients with invasive or not invasive ventilation at day 2.	
End point type	Secondary
End point timeframe: 30 days	

End point values	Naloxegol	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	151	148		
Units: Number of patients	3	1		

Statistical analyses

Statistical analysis title	Respiratory complications-Ventilation D2-Fisher
Comparison groups	Naloxegol v Placebo
Number of subjects included in analysis	299
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.62
Method	Fisher exact

Secondary: Respiratory complications -Invasive ventilation

End point title	Respiratory complications -Invasive ventilation
End point description: Respiratory complications defined as duration of invasive ventilation.	
End point type	Secondary
End point timeframe: 30 days	

End point values	Naloxegol	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	151	148		
Units: Hours				
median (inter-quartile range (Q1-Q3))	3 (2 to 4)	2.5 (2 to 4)		

Statistical analyses

Statistical analysis title	Invasive ventilation - Mann Whitney
Comparison groups	Naloxegol v Placebo
Number of subjects included in analysis	299
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.34
Method	Wilcoxon (Mann-Whitney)

Secondary: Respiratory complications - Non invasive ventilation

End point title	Respiratory complications - Non invasive ventilation
End point description:	Respiratory complications defined as duration of non invasive ventilation.
End point type	Secondary
End point timeframe:	30 days

End point values	Naloxegol	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	151	148		
Units: Hours				
median (inter-quartile range (Q1-Q3))	0 (0 to 0)	0 (0 to 0)		

Statistical analyses

No statistical analyses for this end point

Secondary: Infection complications - Sepsis

End point title	Infection complications - Sepsis
-----------------	----------------------------------

End point description:	
Infection complications defined as number of patients with sepsis.	
End point type	Secondary
End point timeframe:	
30 days	

End point values	Naloxegol	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	151	148		
Units: Number of patients	0	0		

Statistical analyses

No statistical analyses for this end point

Secondary: Infection complications-Wound infection

End point title	Infection complications-Wound infection
End point description:	
Infection complications defined as number of patients with sternal wound infection.	
End point type	Secondary
End point timeframe:	
30 days	

End point values	Naloxegol	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	151	148		
Units: Number of patients	1	2		

Statistical analyses

Statistical analysis title	Infection complication - Sternal wound infection
Comparison groups	Naloxegol v Placebo
Number of subjects included in analysis	299
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.62
Method	Fisher exact

Adverse events

Adverse events information

Timeframe for reporting adverse events:

From time of inclusion to 30 days after surgery.

Adverse event reporting additional description:

All adverse events were evaluated and followed-up by all the investigator for all patients treated (number of patients 301).

Assessment type	Systematic
-----------------	------------

Dictionary used

Dictionary name	MedDRA
-----------------	--------

Dictionary version	25.0
--------------------	------

Reporting groups

Reporting group title	Naloxegol
-----------------------	-----------

Reporting group description:

One naloxegol 12.5 mg tablet will be administrated 2 hours before surgery. One 25 mg naloxegol tablet per day will be administrated from 24h post-surgery until bowel movement; for maximum 5 days.

Reporting group title	Placebo
-----------------------	---------

Reporting group description:

One inert tablet will be administrated 2 hours before surgery. One inert tablet per day will be administrated from 24h post-surgery until bowel movement; formaximum 5 days.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

We performed a modified intention-to-treat analysis on the baseline characteristics and on primary/secondary endpoints for all patients treated and patients with primary endpoint. Adverse event was analyzed for all patients treated.
