Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	21 June 2024
Is this the analysis of the primary completion data?	Yes
Primary completion date	21 June 2024
Global end of trial reached?	Yes
Global end of trial date	21 June 2024
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The purpose of this study was to evaluate the efficacy and safety of MK-8189 at a range of doses (8 mg, 16 mg, and 24 mg once daily [QD]) in adult participants who have an acute episode of schizophrenia according to Diagnostic and Statistical Manual of Mental Disorders 5th Edition (DSM-5) criteria. The primary hypotheses were the following: (1) that MK-8189 24 mg is superior to placebo in reducing the Week 6 mean change from baseline in Positive and Negative Syndrome Scale (PANSS) total score, and (2) that MK-8189 16 mg is superior to placebo in reducing the Week 6 mean change from baseline in PANSS total score. With Amendment 4, enrollment was changed to approximately 500 participants with removal of the MK-8189 8 mg treatment arm. Participants enrolled before Amendment 4 who were assigned to MK-8189 8 mg QD remained on that dose regimen per protocol.

Protection of trial subjects:

This study was conducted in conformance with Good Clinical Practice standards and applicable country and/or local statutes and regulations regarding ethical committee review, informed consent, and the protection of human subjects participating in biomedical research.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	15 December 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Bulgaria: 47
Country: Number of subjects enrolled	Croatia: 29
Country: Number of subjects enrolled	Japan: 7
Country: Number of subjects enrolled	Korea, Republic of: 1
Country: Number of subjects enrolled	Poland: 15
Country: Number of subjects enrolled	Romania: 18
Country: Number of subjects enrolled	Russian Federation: 25
Country: Number of subjects enrolled	Serbia: 32
Country: Number of subjects enrolled	Taiwan: 3
Country: Number of subjects enrolled	Ukraine: 28
Country: Number of subjects enrolled	United States: 294
Worldwide total number of subjects	499
EEA total number of subjects	109

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	499
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Participants were enrolled and randomized at 75 study sites in 11 countries.

Pre-assignment

Screening details:

Randomization into the MK-8189 8 mg arm ceased as of Amendment 4.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	MK-8189 8 mg

Arm description:

Participants received MK-8189 8 mg once daily (QD) from Weeks 1 to 12, with 2 weeks of follow-up.

Arm type	Experimental
Investigational medicinal product name	MK-8189
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

MK-8189 administered QD at a dose of 8 mg, 16 mg, or 24 mg via oral tablet.

Arm title	MK-8189 16 mg
------------------	---------------

Arm description:

Participants received MK-8189 16 mg QD from Weeks 1 to 12, with 2 weeks of follow-up.

Arm type	Experimental
Investigational medicinal product name	MK-8189
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

MK-8189 administered QD at a dose of 8 mg, 16 mg, or 24 mg via oral tablet.

Arm title	MK-8189 24 mg
------------------	---------------

Arm description:

Participants received MK-8189 24 mg QD from Weeks 1 to 12, with 2 weeks of follow-up.

Arm type	Experimental
Investigational medicinal product name	MK-8189
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

MK-8189 administered QD at a dose of 8 mg, 16 mg, or 24 mg via oral tablet.

Arm title	Risperidone 6 mg
Arm description: Participants received risperidone 6 mg QD from Weeks 1 to 12, with 2 weeks of follow-up.	
Arm type	Active comparator
Investigational medicinal product name	Risperidone
Investigational medicinal product code	
Other name	RISPERDAL
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Risperidone administered QD at a dose of 6 mg via oral capsule.

Arm title	Placebo and MK-8189 24 mg
Arm description: Participants received placebo QD from Weeks 1 to 6 and MK-8189 24 mg from Weeks 7 to 12, with 2 weeks of follow-up.	
Arm type	Placebo
Investigational medicinal product name	MK-8189
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

MK-8189 administered QD at a dose of 8 mg, 16 mg, or 24 mg via oral tablet.

Primary: Change from baseline in Positive and Negative Syndrome Scale (PANSS) total score at Week 6

End point title	Change from baseline in Positive and Negative Syndrome Scale (PANSS) total score at Week 6
End point description: The PANSS assesses the severity of schizophrenia symptoms through a 30-item clinician-rated inventory organized into a positive subscale (7 items), a negative subscale (7 items) and a general psychopathology subscale (16 items). For each item, symptoms are rated on a 7-point scale from 1 (absent) to 7 (extreme). The PANSS total score for each participant was calculated as the sum of the rating assigned to each of the 30 PANSS items, and ranges from 30 (lowest total score) to 210 (highest total score). Higher and lower change scores reflect symptom worsening and improvement, respectively. Per protocol, the effect of the 8 mg dose was not assessed; risperidone and placebo were active and inactive controls, respectively. All participants who receive ≥ 1 dose of MK-8189 (16 mg or 24 mg), risperidone, or placebo, and have both a baseline measurement and ≥ 1 valid post-baseline assessment, are included.	
End point type	Primary

Analysis specification	Pre-specified
Analysis type	
P-value	< 0.0001
Method	ANCOVA
Parameter estimate	LS Mean Difference
Point estimate	-3.7

Confidence interval	
level	Other: 97.5 %
sides	2-sided
lower limit	-4.8
upper limit	-2.5

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Up to ~14 weeks

Adverse event reporting additional description:

All treated participants are included. To accommodate the different treatments in the "Placebo and MK-8189 24 mg", data from Weeks 1 to 6 and Weeks 7 to 12 are presented separately.

Assessment type	Systematic

Reporting groups

Reporting group title	MK-8189 8 mg Weeks 1 to 6
-----------------------	---------------------------

Reporting group description:

Participants received MK-8189 8 mg QD from Weeks 1 to 6.

Reporting group title	MK-8189 16 mg Weeks 1 to 6
-----------------------	----------------------------

Reporting group description:

Participants (who received MK-8189 16 mg Weeks 1 to 6) received MK-8189 16 mg QD from Weeks 1 to 6.

Reporting group title	MK-8189 24 mg Weeks 1 to 6
-----------------------	----------------------------

Reporting group description:

Participants received MK-8189 24 mg QD from Weeks 1 to 6.

Reporting group title	Risperidone 6 mg Weeks 1 to 6
-----------------------	-------------------------------

Reporting group description:

Participants received risperidone 6 mg QD from Weeks 1 to 6.

Reporting group title	Placebo Weeks 1 to 6
-----------------------	----------------------

Reporting group description:

Participants received placebo QD from Weeks 1 to 6.

Reporting group title	MK-8189 16 mg Weeks 7 to 12
-----------------------	-----------------------------

Reporting group description:

Participants (who received MK-8189 16 mg Weeks 1 to 6) received MK-8189 16 mg QD from Weeks 7 to 12.

Reporting group title	MK-8189 8 mg Weeks 7 to 12
-----------------------	----------------------------

Reporting group description:

Participants (who received MK-8189 8 mg Weeks 1 to 6) received MK-8189 8 mg QD from Weeks 7 to 12.

Reporting group title	Risperidone 6 mg Weeks 7 to 12
-----------------------	--------------------------------

Reporting group description:

Participants (who received risperidone 6 mg Weeks 1 to 6) received risperidone 8 mg QD from Weeks 7 to 12.

Reporting group title	MK-8189 24 mg Weeks 7 to 12
-----------------------	-----------------------------

Reporting group description:

Participants (who received MK-8189 24 mg) received MK-8189 24 mg QD from Weeks 7 to 12.

Reporting group title	MK-8189 24 mg Weeks 7 to 12 (Placebo Weeks 1 to 6)
-----------------------	----------------------------------------------------

Reporting group description:

Participants (who received placebo Weeks 1 to 6) received MK-8189 24 mg Weeks 7 to 12.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
30 June 2020	AM1: The primary purpose was to update the number of capsules for risperidone due to change in dose.
24 November 2020	AM2: The primary purpose was to update exclusion criterion per FDA feedback.
17 December 2021	AM3: The primary purpose was to increase flexibility in eligibility criteria due to enrollment challenges.
16 November 2022	AM4: The primary purpose was to end enrollment into the MK-8189 8 mg arm.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
