

Clinical trial results:

Effects of Montelukast on neuroinflammation in Parkinson's Disease. An open-label single-center trial.

Summary

EudraCT number	2020-000148-76
Trial protocol	SE
Global end of trial date	07 July 2022

Results information

Result version number	v1 (current)
This version publication date	01 May 2023
First version publication date	01 May 2023

Trial information

Trial identification

Sponsor protocol code	3.0

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	01 January 2023
Is this the analysis of the primary completion data?	Yes
Primary completion date	07 July 2022
Global end of trial reached?	Yes
Global end of trial date	07 July 2022
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Safety and tolerability of Montelukast treatment in Parkinson's disease.

Protection of trial subjects:

Study subjects were treated with Montelukast, an approved drug for 12 weeks. Dosage was higher than in regular clinical practice. Adverse events were closely monitored. Other examinations did not differ from regular clinical practice for patients with Parkinson's disease.

Background therapy:

Regular dopaminergic treatment for Parkinson's disease.

Evidence for comparator: -

Actual start date of recruitment	09 February 2021
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Sweden: 15
Worldwide total number of subjects	15
EEA total number of subjects	15

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	7
From 65 to 84 years	8
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Candidates for the trial will be patients followed at the Academic Specialist Centre, Stockholm, a highly specialized outpatient clinic for parkinsonian disorders. More than 600 patients with PD are treated at the Academic Specialist Centrum.

Pre-assignment

Screening details:

Patients will be screened using the history of their Parkinson's disease, supported by any available clinical correspondence according to usual standard of care.

Participants will be considered eligible for enrolment in this trial if they fulfil all the inclusion criteria and none of the exclusion criteria.

Period 1

Period 1 title	Baseline
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Blinding implementation details:

All participants received Montelukast treatment.

Arms

Arm title	Baseline
-----------	----------

Arm description:

Only one arm. 40 mg of Montelukast daily.

Arm type	Experimental
Investigational medicinal product name	Montelukast
Investigational medicinal product code	
Other name	Singulair
Pharmaceutical forms	Coated tablet
Routes of administration	Oral use

Dosage and administration details:

2 tablettis of 10 mg Montelukast were taken by the subject at morning and evening for a total daily dose of 40 mg.

Number of subjects in period 1	Baseline
Started	15
Completed	15

Period 2

Period 2 title	12 weeks
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	12 weeks of Montelukast
------------------	-------------------------

Arm description:

Only one arm. 40 mg of Montelukast daily.

Arm type	Experimental
Investigational medicinal product name	Montelukast
Investigational medicinal product code	
Other name	Singulair
Pharmaceutical forms	Coated tablet
Routes of administration	Oral use

Dosage and administration details:

2 tablettts of 10 mg Montelukast were taken by the subject at morning and evening for a total daily dose of 40 mg.

Number of subjects in period 2	12 weeks of Montelukast
Started	15
Completed	15

Baseline characteristics

Reporting groups

Reporting group title	Baseline
-----------------------	----------

Reporting group description: -

Reporting group values	Baseline	Total	
Number of subjects	15	15	
Age categorical			
Units: Subjects			
Adults (18-64 years)	7	7	
From 65-84 years	8	8	
Age continuous			
Units: years			
median	65		
inter-quartile range (Q1-Q3)	63 to 69	-	
Gender categorical			
Units: Subjects			
Female	8	8	
Male	7	7	

End points

End points reporting groups

Reporting group title	Baseline
Reporting group description: Only one arm. 40 mg of Montelukast daily.	
Reporting group title	12 weeks of Montelukast
Reporting group description: Only one arm. 40 mg of Montelukast daily.	

Primary: • Safety and tolerability of Montelukast in PD patients

End point title	• Safety and tolerability of Montelukast in PD patients ^[1]
End point description:	

End point type	Primary
End point timeframe: Between baseline and 12 weeks of treatment	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Primary endpoint was safety and tolerability. All participants finished the trial. No meaningful statistical analysis can be made from the count of adverse events since there is no control group.

End point values	Baseline	12 weeks of Montelukast		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	15	15

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Telephone inquiry two weeks after baseline, 4 week follow-up visit, 6 week telephone inquiry, 9 week telephone inquiry and lastly at 12 week final visit.

Assessment type	Systematic

Reporting groups

Reporting group title	All participants
-----------------------	------------------

Reporting group description:

Only one arm in the study. All exposed to trial treatment.

Serious adverse events	All participants		
Total subjects affected by serious adverse events			
subjects affected / exposed	1 / 15 (6.67%)		
number of deaths (all causes)	0		
number of deaths resulting from adverse events			
Vascular disorders			
Pulmonary embolism	Additional description: 1 patient got an pulmonary embolism after immobilisation post-op. It was not deemed connected to IMP. The condition resolved with anti-coagulant therapy.		
subjects affected / exposed	1 / 15 (6.67%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		

Frequency threshold for reporting non-serious adverse events: 0 %

Non-serious adverse events	All participants		
Total subjects affected by non-serious adverse events			
subjects affected / exposed	9 / 15 (60.00%)		
Injury, poisoning and procedural complications			
Catheter site hematoma	Additional description: From arterial catheter placed for PET examination		
subjects affected / exposed	2 / 15 (13.33%)		
occurrences (all)	2		
Surgical and medical procedures			

Lumbar puncture headache subjects affected / exposed occurrences (all)	4 / 15 (26.67%) 4		
Nervous system disorders			
Tremor	Additional description: Worsening of Parkinsonian tremor.		
subjects affected / exposed occurrences (all)	1 / 15 (6.67%) 1		
Gastrointestinal disorders			
Stools loose subjects affected / exposed occurrences (all)	3 / 15 (20.00%) 3		
Psychiatric disorders			
Fatigue subjects affected / exposed occurrences (all)	1 / 15 (6.67%) 1		
Musculoskeletal and connective tissue disorders			
Musculoskeletal stiffness subjects affected / exposed occurrences (all)	2 / 15 (13.33%) 1		
Infections and infestations			
Upper respiratory tract infection subjects affected / exposed occurrences (all)	1 / 15 (6.67%) 1		

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Small sample size of 15 patients. No control group. Short treatment period. The primary endpoint was reached however and we plan a larger RCT based on these results.

Notes:
