

## Clinical trial results: Dapagliflozin Effects on Cardiometabolic Outcomes in Patients With an Acute Heart Attack. (DAPA-MI)

### Summary

EudraCT number	2020-000664-31
Trial protocol	SE GB
Global end of trial date	23 November 2023

### Results information

Result version number	v1 (current)
This version publication date	07 July 2024
First version publication date	07 July 2024

### Trial information

#### Trial identification

Sponsor protocol code	D169DC00001
-----------------------	-------------

#### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT04564742
WHO universal trial number (UTN)	-

Notes:

Notes:

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	23 November 2023
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	23 November 2023
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary objective of the study was to determine if the clinical benefit of dapagliflozin was superior as compared with placebo, utilizing a hierarchical composite endpoint and win-ratio (WR) method. With a presumed WR of 1.20, 4000 patients were provide an 80% statistical power for the primary endpoint, maintaining a 1:1 allocation between treatments. The primary analysis was based on the intention-to-treat principle using the Full Analysis Set.

Protection of trial subjects:

An independent DMC was appointed jointly by AstraZeneca and the academic leadership of the study. The DMC was responsible for safeguarding the interests of the participants in the outcome study by assessing the safety of the intervention during the trial, and for reviewing the overall conduct of the CT. They reviewed the overall safety in the trial. An independent statistical group had access to the individual treatment codes and were able to merge these with the collected study data and provided this to the DMC while the study was ongoing. The DMC operated under a separate DMC charter.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	22 December 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	United Kingdom: 2839
Country: Number of subjects enrolled	Sweden: 1178
Worldwide total number of subjects	4017
EEA total number of subjects	1178

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0

Adolescents (12-17 years)	0
Adults (18-64 years)	2387
From 65 to 84 years	1630
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

This study was conducted at 103 sites; 39 sites in Sweden and 64 sites in the UK.

### Pre-assignment

Screening details:

Patients admitted with MI to Coronary care units were consecutively screened for participation. All the study assessments were performed as per the schedule of assessments. Participants who met the eligibility criteria were randomised to study intervention in addition to receiving background local standard of care therapy.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

### Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

<b>Arm title</b>	Dapa 10 mg
------------------	------------

Arm description:

Active

Arm type	Active comparator
Investigational medicinal product name	Dapagliflozin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Dapagliflozin 10 mg once daily

<b>Arm title</b>	Placebo
------------------	---------

Arm description:

## End points

### End points reporting groups

Reporting group title	Dapa 10 mg
Reporting group description: Active	
Reporting group title	Placebo
Reporting group description: Control	

### Primary: Analysis of the hierarchical primary composite endpoint (full analysis set)

End point title	Analysis of the hierarchical primary composite endpoint (full analysis set)
End point description: Study participants received dapagliflozin 10 mg or matching placebo, given once daily in addition to SoC. Overall, the mean study duration was 12.0 months (time in study until last visit) with an accumulated 4023.9 participant-years. The maximum study duration for any participant was 29 months.	
End point type	Primary
End point timeframe: 29 months	

End point values	Dapa 10 mg	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	2019	1998		
Units: Participants				
All components Number of Events	1990	1970		
Death, adjudicated Number of Events	41	33		
Hospitalisation due to HF Number of Events	32	41		
Non-fatal MI Number of Events	29	32		
AF/Flutter event Number of Events	8	15		
New onset of T2DM Number of Events	40	74		
NYHA Class at last visit Number of Events	1839	1773		
Body Weight decrease  Number of Events	684	468		

### Statistical analyses

Statistical analysis title	Analysis of the Hierarchical Composite Endpoint
Statistical analysis description: The primary objective of the study was to determine if the clinical benefit of dapagliflozin was superior as compared with placebo, utilizing a hierarchical composite endpoint and win-ratio (WR) method. With a presumed WR of 1.20, 4000 patients were provide an 80% statistical power for the primary endpoint, maintaining a 1:1 allocation between treatments. The primary analysis was based on the intention-to-	

treat principle using the Full Analysis Set.

Comparison groups	Dapa 10 mg v Placebo
Number of subjects included in analysis	4017
Analysis specification	Pre-specified
Analysis type	
P-value	< 0.001 <sup>[1]</sup>
Method	Win Ratio Analysis
Parameter estimate	Win Ratio (WR)
Point estimate	1.34
Confidence interval	
level	95 %
sides	2-sided
lower limit	1.2
upper limit	1.5

Notes:

[1] - A closed testing procedure including a pre-specified hierarchical ordering of the primary and secondary endpoints was utilised. No multiplicity control was placed on the exploratory endpoints.

### Secondary: Analysis of the hierarchical secondary composite endpoint (Full Analysis Set)

End point title	Analysis of the hierarchical secondary composite endpoint (Full Analysis Set)
End point description:	
End point type	Secondary
End point timeframe:	
29 months

All components	1989	1968		
Death, adjudicated	41	33		
Hospitalisation due to HF	32	41		
Non-fatal MI	29	32		
AF/Flutter event	8	15		
New onset of T2DM	40	74		
NYHA Class at last visit	1839	1773		

### Statistical analyses

Statistical analysis title	Hierarchical secondary composite endpoint
----------------------------	---

Statistical analysis description:

The key secondary objective of the study is to determine if the clinical benefit of dapagliflozin is superior in relation to placebo and this objective will be assessed with a hierarchical composite endpoint of death, heart failure events, non-fatal MI, atrial fibrillation/flutter event, new onset of T2DM and NYHA class at last visit, based on

the hierarchical order of clinical importance. The analysis is based on the win-ratio method.

Comparison groups	Dapa 10 mg v Placebo
Number of subjects included in analysis	4017
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.015
Method	Win Ratio (WR)

### Reporting groups

Reporting group title	Placebo
-----------------------	---------

Reporting group description:

Participants received placebo per oral once daily

Reporting group title	Dapa 10 mg
-----------------------	------------

Reporting group description:

Participants received once daily oral dose of 10 mg dapagliflozin

Notes:

[1] - There are no non-serious adverse events recorded for these results. It is expected that there will be at least one non-serious adverse event reported.

Justification: This field is not applicable to this study as it was not an objective of this study to collect non-serious adverse events.

Frequency threshold for reporting non-serious adverse events: 1 %

<b>Non-serious adverse events</b>	Placebo	Dapa 10 mg	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	0 / 1977 (0.00%)	0 / 1995 (0.00%)	

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
25 May 2021	The amendment extended the randomisation window to allow randomisation of patients within 10 days after MI and included additional information on awareness of ketoacidosis. The amendment also contained information on an additional option for study drug delivery to patients due to the COVID-19 pandemic. At the same time minor clarifications and editorial changes were made.
14 December 2021	The amendment provided changes in inclusion criteria to broaden the study population to also include patients with impaired regional or global LV systolic function without numerical cut-off LVEF < 50%. At the same time minor clarifications were made.
23 February 2023	In February 2023, the observed blinded primary endpoint event rate in the DAPA-MI trial was substantially lower than anticipated. To maximize the scientific value of the study, without substantially increasing the sample size or prolonging the study duration, the primary endpoint and the primary analysis method were revised to evaluate the effect of dapagliflozin on a series of cardiometabolic outcomes, assessed as a hierarchical composite endpoint using a win-ratio analysis.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
